SECTION II: RISK FACTORS

RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. Prospective investors should carefully consider all of the information set forth in this Red Herring Prospectus, particularly the related notes and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 436 of this Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in the Equity Shares. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of the Equity Shares and the loss of all or part of an investment in the Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment which may differ in certain respects from that of other countries.

This Red Herring Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. For further details, see “Forward-Looking Statements” on page 25 of this Red Herring Prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. Further, unless otherwise indicated, industry and market data used in this section has been derived from industry publications and other publicly available information, including, in particular, the Technopak Report (extracts of which have been appropriately incorporated as part of “Industry Overview” beginning on page 161). We commissioned the Technopak Report for the purpose of confirming our understanding of the Indian food services industry for which Technopak is in the process of being paid by the Company pursuant to its engagement letter dated January 12, 2021. The Technopak Report was submitted on February 19, 2021. For details, see “Risk Factors – This Red Herring Prospectus contains information from an industry report which we have commissioned from Technopak” on page 73. Unless otherwise indicated, all financial, operational, industry and other related information derived from the Technopak Report and included herein with respect to any particular year refers to such information for the relevant Fiscal. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved. You should not invest in this Offer unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares. Unless otherwise stated, the financial information of our Company used in this section is derived from our Restated Consolidated Financial Information. For further information, see “Financial Statements” beginning on page 278.

INTERNAL RISK FACTORS

- 1. The outbreak of the 2019 novel coronavirus (“COVID-19”) pandemic, as well as GoI measures to reduce the spread of COVID-19, have had a substantial impact on our restaurant operations and the timing of how long the COVID- 19 pandemic and the related GoI measures will last is still uncertain.***

The outbreak of the COVID-19 pandemic, as well as the measures taken by the Government of India to reduce the spread of COVID-19, have had a substantial impact on our restaurant operations since the last week of March 2020. Further, the duration of the COVID-19 pandemic continues to remain uncertain, particularly since various mutations of the virus have emerged in several countries. In some cases, some of these mutations are reported to be more virulent. Whilst vaccines are starting to be made available, they are at present only being administered to vulnerable groups. In addition, the vaccines have varying degrees of reported efficacy and their effectiveness against different strains of the virus remains uncertain. In addition, restaurants operated by the Company across different states and regions in India have been disproportionately affected by COVID-19 and the measures implemented in each state have varied due to regional and regulatory differences. As a result of COVID-19, the Company has had to temporarily close various

restaurants across India commencing from March 2020 and has also experienced reduced restaurant-level operations, including reduced operating hours and restaurant closures. Our footfalls and sales have since started to recover, although not to the levels prior to outbreak of COVID-19. The reduction in the level of business activity due to the COVID-19 crisis has also led to (i) write-offs of food inventory and related commitments since the Company's inventory includes food items which are perishable in nature; (ii) disruptions due to logistical constraints; and (iii) losses in the business. Similarly, the Company's corporate offices also experienced closures and certain employees have been restricted from commuting to their places of work. Consequently, the financial impact of COVID-19 has had, and is expected to continue to have, an adverse effect on the Company's liquidity.

As of December 31, 2020, we had 147 Barbeque Nation Restaurants (including opened, temporarily closed and under construction outlets), six International Barbeque Nation Restaurants and 11 Italian Restaurants of which nine are operated under the brand name "Toscano" and one each under the brand names "La Terrace" and "Collage", respectively, of which 9 were operational, often with limited operations or limitations on capacity for dine-in guests, depending on local regulations. Our financial results were materially and adversely affected as a direct consequence of COVID-19. We incurred consolidated losses after taxes as restated of INR 1,006.48 million for the eight month period ended November 30, 2020 and our networth become negative as at November 30, 2020. Our trade payables have also increased as at November 30, 2020 compared with the fiscal years ended 2019 and 2020. For further details, see "*Financial Statements*" on page 278 of this Red Herring Prospectus. There can be no assurance that our financial results will recover, or the timing of their recovery, from the impact of the COVID-19 crisis.

Further, FSSAI has issued a guidance note on 'Food Hygiene and Safety Guidelines for Food Businesses during Coronavirus Disease (COVID-19) Pandemic' ("**FSSAI Guidelines**") with an intent to provide guidance to food businesses like ours, including their personnel involved in handling of food and other employees to prevent spread of COVID-19 in the work environment and any incidental contamination of food/food packages. The FSSAI Guidelines, *inter-alia*, mandates strict adherence to General Hygiene Practices and Good Manufacturing Practices specified under Schedule 4 of Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011. The schedule enumerates multiple compulsory measures to be adopted by food business operators in the interest of human nutrition, safety and hygiene which may result in increased costs. Although we are currently in compliance with the FSSAI Guidelines, any failure in the future to fully comply or adhere to the measures and guidelines set out in the FSSAI Guidelines or any other similar regulations could lead to the imposition of penalties, fines or other sanctions, which could have an adverse impact on our business.

Notwithstanding measures we have adopted to increase safety and hygiene levels, there can be no assurance that footfalls in our restaurant outlets, same store sales, sales from food and beverages and demand for our products will recover from the impact of the COVID-19 crisis, and if they do not recover as a result of the COVID-19 crisis continuing or worsening, or otherwise, our business and results of operations would be significantly and adversely impacted, which could also adversely impact our market share. Further, due to the rising number of infected cases of COVID-19 in India, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we will not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, results of operations, financial condition, cash flows, reputation and prospects. In addition, if our key management personnel or a significant percentage of our workforce is unable to work due to COVID-19 illness, quarantine, limitations on travel or other government restrictions in connection with the COVID-19 pandemic, our operations may be negatively impacted. An outbreak or perceived outbreak of the COVID-19 pandemic connected to one or more of our Barbeque Nation Restaurants or Toscano Restaurants could also cause negative publicity directed at any of our brand and cause customers to avoid our restaurants, which could have a material adverse effect on our business, results of operations, financial condition, cash flows, reputation and prospects.

As a consequence of the COVID-19 pandemic, the expansion of our restaurant network has slowed significantly, and the COVID-19 pandemic has also adversely affected our ability to open new restaurants and expand our restaurant network temporarily. We have delayed some new restaurant openings and will continue to evaluate the pace and quantity of new restaurant openings and the expansion of our restaurant network until more clarity on the restaurant industry operating environment in India emerges.

The financial impact of COVID-19 has had, and is expected to continue to have, an adverse effect on our liquidity, and we continue to monitor and assess our access to appropriate sources of liquidity in order to sustain our business

throughout this crisis. The net worth of our Company turned negative for the eight month period ending on November 30, 2020. However, our Company has completed a Pre-IPO placement of ₹1,499.69 million. For further details in relation to the Pre-IPO Placement, please see section “*Capital Structure*” on page 103 of this Red Herring Prospectus.

The financial impact of COVID-19 has also had an adverse effect on the liquidity of some of the members of our Promoter Group companies and Group Companies. Some of these companies were already in breach of their payment obligations prior to COVID-19 and have either received a notice of demand or applications to initiate insolvency proceedings have been filed, and in certain cases have even been commenced against them. Their lenders may evaluate whether our individual Promoters, who are associated with such Promoter Group companies or Group Companies, are to be declared as wilful defaulters. If any of our individual Promoters, who are associated with such Promoter Group companies or Group Companies are declared as wilful defaulters, this may have an adverse effect on our reputation and the ability of such individual Promoters to continue to be directors of our Company. For further details in relation to the insolvency proceedings, please see “*Our Group Entities – Information Regarding Significant Adverse Factors Related to the Group Entities*” on page 274 of this Red Herring Prospectus.

However, depending on how long the COVID-19 pandemic lasts, we may need to seek additional sources of liquidity, which may or may not be available. The COVID-19 pandemic is adversely affecting the availability of liquidity generally in the credit markets, and there can be no guarantee that additional liquidity from other sources will be available to us on favourable terms, or at all, especially the longer the COVID-19 pandemic lasts or if it were to worsen. While we have assessed the impact of the COVID-19 pandemic on our business and on recoverability of all current and non-current assets and recognised necessary adjustments in carrying value of the assets, given the uncertainties associated, we will continuously monitor and consider necessary impact on financial conditions, results of operation and cash flows. Further, while we cannot currently estimate the duration or future negative impact of the COVID-19 pandemic on our business or on the Indian or global economy, we expect the negative effects to continue into the fourth quarter of Fiscal 2021 and beyond and for such further period that COVID-19 persists. Similarly, we cannot predict the effects the COVID-19 pandemic will have on the restaurant industry as a whole or the share of customer traffic to our restaurants compared to other restaurants or outlets. In addition, there can be no assurance that the COVID-19 crisis will not cause the Indian or global macroeconomic environment to worsen. In these circumstances, if additional liquidity is not available in the amounts or under the terms that we required, this could have a material adverse a material adverse effect on our business, results of operations, financial condition, cash flows, reputation and prospects.

2. *Deterioration in the performance of, or our relationships with, third-party delivery aggregators, may adversely affect our business, results of operations and financial condition.*

Demand for food delivery services through delivery aggregators online and through mobile applications has witnessed an increase in recent years across the restaurant industry. The introduction and growth of online ordering and mobile applications, as well as the increasing number and growth of third-party delivery aggregators, have made delivery a significant part of our business, and we believe the increasing presence of delivery aggregators in India will have a significant impact on our business going forward. We leverage the large third-party delivery aggregators that have their own mobile applications and delivery fleets and have integrated our customer base with certain delivery aggregators. However, the activities of delivery aggregators have increased competition with other restaurant brands and new food service platforms, such as cloud kitchens, which do not offer in-restaurant services and only serve food through third party delivery aggregators, requiring less capital expenditure to offer food services. If food delivery through third party delivery aggregators continues to increase, it is possible that footfalls in our restaurants could decrease, especially in light of the COVID-19 pandemic, unless we adapt our business model to account for this change in consumer preference. We currently depend on third party delivery aggregators for a substantial portion of our food delivery services and that could increase in the future, especially as a result of the impact of COVID-19 and the resulting growth in delivery. It is possible that the negotiating leverage of third party delivery aggregators with respect to our agreements with them could increase as their businesses grow, which means we may have to pay higher fees for their services or may have difficulty extending or renewing our agreements with them on commercially acceptable terms, or at all, in the future, especially if we fail to sufficiently develop our own food delivery services or find alternative means to serve the increasing number of customers who choose to order their food online or through mobile applications. In addition, in order to increase their market share, certain delivery aggregators offer significant discounts for their services and as their businesses mature, they may choose or be required to raise their fees, which could adversely impact the fees we pay for their services. Any adverse development with respect to the third party

delivery aggregators that we use to deliver our products, our relationship with them or their services, such as their failing to meet our service standards, actions or events attributed to them that impact customer perception of our brand, or any stoppage of their operations due to financial difficulties or otherwise, could adversely affect our ability to reach customers who choose to order food through third party delivery aggregators, which could have a material adverse effect on our business, results of operations and financial condition.

3. *If we are unable to implement our growth strategy successfully including in relation to selecting cities and locations for our new restaurants our results of operations and financial condition may be adversely affected.*

The first Barbeque Nation Restaurant was opened in India by SHL, one of our Promoters. We launched our Barbeque Nation Restaurant in India in 2008 and have expanded to 147 Barbeque Nation Restaurants (including opened, temporarily closed and under construction outlets) across 77 cities in India and six International Barbeque Nation Restaurants in three countries outside India as of December 31, 2020. In addition, as of December 31, 2020, we had granted franchise rights in respect of one Barbeque Nation Restaurant. Consequently, our total consolidated revenue from continuing operations has grown from ₹5,904.48 million in Fiscal 2018 to ₹8,507.94 million in Fiscal 2020 at a CAGR of 20.04%. This growth has placed, and will continue to place, significant demands on our managerial, operational and capital resources. While we intend to continue to expand our operations in India and select overseas markets, we may not be able to sustain historic growth levels and may not be able to leverage our experience in our existing markets in order to grow our business in new markets. An inability to effectively manage our expanded operations or pursue our growth strategy may lead to operational and financial inefficiencies, which could have a material adverse effect on our business prospects, financial condition and results of operations.

As part of our overall strategy, we may undertake investments, acquire certain businesses, assets and technologies and develop new business lines, products and distribution channels, launch new restaurant formats and acquire or develop additional brands to cater to different segments of the population. For example, in Fiscal 2020, we acquired 61.35% of the share capital (on a fully diluted basis) of Red Apple, which operates the Italian Restaurants, for an aggregate consideration of ₹674.87 million. For further details in relation to the acquisition of Red Apple, please see section “*History and Certain Corporate Matters – Details regarding material acquisition or divestments of business/undertakings, mergers, amalgamation, revaluation of assets, if any, in the last ten years*” on page 228 of this Red Herring Prospectus. The continued successful expansion of our business activities depends on our ability to:

- position our new restaurants to successfully establish a foothold in new markets and to execute our business strategy in new markets;
- successfully integrate the new restaurants with our existing operations and achieve related synergies;
- introduce an optimal mix of cuisine which successfully meets local guest preferences at attractive prices;
- negotiate and obtain favourable terms from our suppliers;
- effectively run our marketing campaigns;
- hire, train and retain skilled personnel;
- effectively compete with existing and new restaurants in the region; and
- manage any development or construction plans around our planned sites which could have an impact on the traffic flow to our restaurants.

In addition, our business success will depend on a number of factors, some of which are beyond our control, including:

- consumer trends (including our ability to adapt our format and offering to meet such trends);
- hiring, training and retaining qualified personnel;

- finding suitable locations for our new restaurants;
- identifying suitable supply and delivery resources;
- creating consumer awareness for our restaurants in new markets;
- competition in our markets in the CDR market; and
- availability of financing at competitive terms and conditions.

Any investment, acquisition and business initiative, such as our acquisition of Red Apple which operates the Italian Restaurants, could require our management to develop expertise in new areas, manage new business relationships and attract new types of guests, and divert their attention and resources, all of which could have a material impact on our ability to manage our business. These investments, acquisitions and business initiatives may also expose us to risks associated with the integration of new business lines, operations and personnel, the diversion of resources from our existing business and technologies, the potential loss of, or harm to, relationships with employees and guests, as well as other unforeseen liabilities. Also, we may have less control over their activities and these businesses may face more uncertainties with respect to their operational needs.

Expansion into new geographic regions, including different states in India and countries outside India, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions or territories, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including:

- compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in laws, regulations and practices and their interpretation;
- uncertainties with new local business partners;
- ability to understand consumer preferences and local trends in such new regions or territories;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

If any of our new restaurants does not break even or achieve our expected level of profitability within our expected timeframe, or at all, our expansion plans, results of operations, financial condition and profitability may be materially and adversely affected and we may decide to relocate or even close some of our restaurants. For further details, see *“Our Business – Our Operations - Overview – Restaurant Closures”* and *“Risk Factors – If we are unable to identify and obtain suitable locations for our new restaurants this may result in lower footfalls and table turn rates which would adversely affect our anticipated growth in business.”* on pages 215 and 47, respectively. If we are forced to close any of our restaurants, we may not be able to realise our investment cost since our restaurants are custom-built for our business.

In addition, we have in the past and may in the future experience delays or higher-than-anticipated costs in opening new restaurants. We may also experience delays or fail to obtain required government approvals or licenses and permits to operate our restaurants. Any such delays or failures to obtain relevant government approvals and/or licenses and permits could have an adverse impact on our revenues, as we may start incurring rental costs when we run past

our fit-out period under the terms of our lease / license agreements. We may also start incurring significant employee-related expenses, as we typically relocate our restaurant management and staff to new restaurants typically approximately 30 to 60 days in advance of a new restaurant opening.

Consequently, there can be no assurance that we will be able to achieve our expansion goals, that new restaurants will be opened in a timely manner, or at all, or that new restaurants opened will be profitable. Additionally, expansion and future growth will increase demands on our management team, systems and resources, financial controls and information systems. These increased demands may adversely affect our ability to open new restaurants and to oversee our existing restaurants. If we fail to continue to improve our infrastructure or to manage other factors necessary for us to meet our expansion objectives, our growth rate and operating results could be materially and adversely affected.

4. Our Company has been issued a notice from the National Anti-Profiteering Authority under the Central Goods and Services Tax Act, 2017. Any adverse decision in these matters may have a direct adverse impact on the business, operations, future prospects and financial position of our Company and an indirect impact on the reputation, profitability and business of our Company.

Our Company has received a notice dated September 30, 2019 from the National Anti-Profiteering Authority (GST), Department of Revenue, Ministry of Finance, Government of India (“NAA”), forwarding the report of the Director General of Anti Profiteering (“DGAP”) which has alleged profiteering, amounting to ₹325.88 million against the Company under Section 171 of the GST Act. The matter was initiated to investigate whether GST reduction benefit from 18% to 5% was passed by the Company on to the end consumer. The period for which such investigation was carried out was from November 15, 2017 to March 31, 2019. The notice issued by the NAA directs the Company to show cause as to why the report should not be accepted and the liability for profiteering should not be determined. Our Company appeared before the NAA for hearings on various dates and has made its written submissions to the NAA on November 14, 2019, December 2, 2019, and February 15, 2020. The NAA passed an interim order in the matter on May 20, 2020 stating that the report of the DGAP could not be accepted and directed the DGAP to submit a fresh report after conducting further investigation, and also recompute the profiteered amount, which investigation should be completed within a period of three months from the date of this order. Pursuant to the order of the NAA, the DGAP issued various notices to our Company, seeking information or documents in relation to the alleged profiteering. Our Company has filed a writ petition before the High Court of Karnataka challenging the order of the NAA dated May 20, 2020. On July 15, 2020, the High Court of Karnataka granted interim relief to the Company and granted a stay of the order passed by the NAA for a period of eight weeks, which interim stay was extended till further orders on August 12, 2020. On September 10, 2020, the NAA has filed a transfer petition before the Supreme Court of India, for transfer of the writ petition to the Delhi High Court. In December 2020, the respondents filed their statement of objections to the writ petition filed by the Company before the High Court of Karnataka. The matter is currently pending. For further details, see “*Outstanding Litigation and Material Developments – Litigation involving our Company – Actions by statutory/ regulatory authorities against our Company*” on page 479.

In the event an adverse order is passed against our Company, our Company may be required to: (a) reduce the price of its offerings; (b) return an amount as determined by the NAA to its customers; (c) deposit an amount determined by the NAA to the Consumer Welfare Fund; or (d) pay a monetary penalty. Additionally, our GST registration may be cancelled. Such an order may have a direct adverse impact on the business, operations, future prospects and financial position of our Company and an indirect impact on the reputation, profitability and business of our Company.

Some of these proceedings have resulted in adverse findings being recorded by SEBI including imposition of penalties by SEBI. In respect of these matters, our Promoters and Promoter Group members have paid all such penalties. In certain other instances, the matters have been settled by payment of settlement amounts as prescribed by SEBI. 6. One of our Non-Executive and Independent Directors, Mr. Abhay Chaudhari, has been named in the CIBIL suit filed accounts list. In the event his name features in the wilful defaulter list, we may be required to reconstitute our Board. Any such event may result in an adverse impact on the Offer, our reputation and operations.

The name of Abhay Chaudhari, one of our Non-Executive and Independent Directors, appears on the CIBIL list of suit filed accounts – defaulters ₹1 crore and above as on December 31, 2019 (“**CIBIL List**”). In 2017, Abhay Chaudhari was nominated to the board of directors of Athena Chhattisgarh Power Limited (“**Athena**”) as a nominee of State Bank of India, a lender, for a period of two years. Abhay Chaudhari resigned as the nominee director from the board of directors of Athena on March 14, 2018 prior to the expiration of this two-year period. Subsequently, after his resignation, Athena was not able to service its debt obligations and insolvency proceedings were initiated against it. As a result, certain lenders of Athena reported such defaults for publication in the CIBIL List. Athena’s resolution professional has requested the lenders of Athena to remove Abhay Chaudhari’s name from the CIBIL List. Further, on February 6, 2020 Abhay Chaudhari received a show cause notice from the Income-tax Department in relation to proceedings that have been initiated against Athena. For further details, please see “*Outstanding Litigation and Material Developments – Litigation involving our Directors, other than our Promoters – Actions by statutory/regulatory authorities against our Directors, other than our Promoters*” on page 492.

Abhay Chaudhari’s name also appears on the CIBIL List as a director of CLT Infra Build Private Limited (“**CLT Infra**”). However, according to the publicly available information, Abhay Chaudhari was never a director of CLT Infra. The relevant lender of CLT Infra has admitted that, upon verification of its records, Abhay Chaudhari was not linked to CLT Infra.

Although steps have been initiated to remove Abhay Chaudhari’s name from the CIBIL List, there can be no assurance that the relevant lenders of Athena and CLT Infra will remove his name from the CIBIL List in a timely manner or at all. Currently, his name does not feature in the wilful defaulters’ list; however, in the event his name is included in such list, we may be required to reconstitute our Board. Any such event may result in an adverse impact on the Offer, our reputation and our operations.

7. *Some of our Promoters and Directors operate or control entities engaged in a similar line of business as our Company, which may lead to competition with these entities and could potentially result in a loss of business opportunity for our Company.*

Some of our Promoters, including one of our corporate promoters, SHL and Directors directly or indirectly operate or control entities which are engaged in similar line of business as our Company and Red Apple. Such companies are involved in the restaurant and hospitality business and may offer cuisines or menu items similar or identical to those offered in our restaurants. Further, SHL is involved in the hospitality sector and operates hotels and restaurants, *inter alia*, within the premises of its hotels or within the premises of third-party hotels and certain standalone restaurants. Some of our Promoters may have conflicts of interest with our interests or the interests of our Shareholders and favour these companies in certain situations, or not direct opportunities to us. While such Promoters and Directors have executed an undertaking dated August 5, 2017 to refrain, until their shareholding is not less than certain thresholds or they cease to control our Company, from operating or controlling restaurants or food ventures, in India or outside India, subject to certain exemptions, there can be no assurance that situation of conflict of interest will not arise in the future. The non-compete undertaking is subject to the provisions of the Indian Contract Act, 1872, as amended, with respect to enforceability. Further, one of our Directors, Tarun Khanna, is a director on the board of Sapphire Foods India Private Limited and Thalappakatti Hotels Private Limited, which are engaged in businesses similar to that of the Company. Any of the above may impact the trading price of our Equity Shares, our business, financial condition and results of operations. For further details in relation to the non-compete arrangement, please see section “*History and Certain Corporate Matters – Summary of Key Agreements and Shareholders Agreements – Non-compete undertaking dated August 5, 2017 by our Promoters*” on page 235 *Non-compete undertaking dated August 5, 2017 by our Promoters* of this Red Herring Prospectus.

8. *Our new restaurants may not be profitable or perform as planned and could also adversely impact sales in our existing restaurants, which could adversely affect our business, results of operations and financial condition.*

We plan to utilize a portion of the Net Proceeds to set-up new Barbeque Nation Restaurants. The profitability and performance of our new restaurants depend on a number of factors, and we cannot assure you that our new restaurants will be profitable or perform as planned.

In particular, some of our new restaurants are and may in the future be located in areas where we have little or no operating experience, which may expose us to additional risks. These areas may have different competitive conditions, consumer tastes, discretionary spending patterns and economic conditions than our existing locations, which may cause our new restaurants to be less successful than our existing restaurants or to incur losses. Sales at restaurants opened in those new areas may take longer to reach, or may never breakeven, especially during the current COVID-19 crisis, which may adversely affect our business, results of operations and financial condition. In addition, costs of opening new restaurants in areas in which we have little or no operating experience and in which customer awareness of our brand is low may require us to incur additional costs in relation to the promotion of those restaurants which may be substantially greater than those incurred by our restaurants in other areas.

In addition, the opening of a new restaurant in or near markets in which we already have restaurants could also adversely affect the restaurant sales of those existing restaurants. Existing restaurants could also make it more difficult to build our consumer base for a new restaurant in the same market. Cannibalisation of restaurant sales within our system may become significant in the future as we continue to expand our operations, in particular as our restaurant continues to grow and become more dense, which could adversely affect our same-restaurant sales growth. If we fail to successfully open new restaurants that are economically viable and expand our business in a manner that does not adversely impact our existing restaurants, our business, results of operations and financial condition could be materially and adversely affected.

9. *If we are unable to continue to build the Barbeque Nation brand or the Toscano brand, our business, reputation and results of operations may be adversely affected.*

We believe the “Barbeque Nation” brand and the “Toscano” brand command strong brand recognition due to their long and successful presence in the markets in which we operate and maintaining and enhancing these brands is therefore important for maintaining our competitive advantage. Our Barbeque Nation Restaurants, International

Barbeque Nation Restaurants and our Italian Restaurants may become less attractive due to changing consumer preferences and our inability to adapt to such changes in a timely manner may affect our results of operations.

The high media scrutiny and public attention that the Indian restaurant industry is subjected to, in addition with increasing consumer activism in India, increases the risk to the reputation of the restaurant industry in general, and a risk of negative publicity and damage to the “Barbeque-Nation” and “Toscano” brands if we are presented in a negative light. Litigation, employee misconduct, operational failures, regulatory investigations, press speculation and negative publicity, among others relating to us, our Promoters, members of our Promoter Group or Group Entities, whether founded or unfounded, could damage the “Barbeque Nation” and “Toscano” brands or our reputation. Our brands and our reputation could also be harmed if products or services recommended by us (or any of our intermediaries) do not perform as expected (whether or not the expectations are founded), or there is a change in customers’ expectations from the product. Negative publicity could be based, for instance, on allegations that we have failed to comply with regulatory requirements or result from failure in business continuity or performance of our information technology systems, loss of customer data or confidential information, unsatisfactory service and support levels or insufficient transparency. Incidents or developments negatively affecting SHL’s brand may also negatively affect our brand and our reputation.

Our success depends on our ability to maintain the brand images of our existing products and effectively build our brand images for new products and brand extensions. Any damage to our brands or our reputation could hamper the trust placed in these brands and cause existing customers or intermediaries to withdraw their business and potential customers or intermediaries to reconsider doing business with us. Furthermore, negative publicity may result in increased regulation and legislative scrutiny of industry practices as well as increased litigation, which may further increase our costs of doing business and adversely affect our profitability. Negative publicity may also influence market or rating agencies’ perception of us, which could make it more difficult for us to maintain our credit rating. There can be no assurance that our established brand names will not be adversely affected in the future by events that are beyond our control. In the event that we are unable to use the Barbeque Nation name or the Toscano name for any reason or in case guest complaints or adverse publicity damage our brands, our business, financial condition and results of operations would be adversely affected.

As majority of our income is derived from our Barbeque Nation Restaurants, creating and maintaining public awareness of our brand is crucial to our business and we accordingly invest in various marketing and advertising campaigns. If these campaigns are poorly executed, or guests lose confidence in our brand for any reason, it could harm our ability to attract and retain guests. There can be no assurances that we will be able to sustain effective marketing, advertising and branding initiatives in the future. Maintaining and enhancing our brand may require us to make substantial investments in areas such as restaurant operations, marketing and employee training, and these investments may not be successful.

We also anticipate that as our business expands into new markets and as our markets become increasingly competitive, maintaining and enhancing our brand may become increasingly difficult and expensive. If we are unable to maintain or enhance our brand recognition, our business, financial condition, results of operations and prospects may be materially and adversely affected.

10. One of our Promoters and Directors, Raof Dhanani is involved in a criminal proceeding and in an insolvency proceeding. Any adverse decision in these matters may have an indirect impact on the reputation and business of our Company.

One of our Promoters and Directors, Raof Dhanani is involved in a criminal proceeding initiated by Videocon Leasing and Industrial Finance Limited (“**Videocon**”) before the Additional Criminal Judicial Magistrate, Ghaziabad under Sections 34, 415, 418 and 420 of the IPC and Section 200 of the Criminal Procedure Code in relation to dishonestly inducing Videocon to, *inter alia*, part with ₹160 million for issuance of non-convertible, redeemable debentures of Divya Chemicals Limited, which were not issued. Subsequently, pursuant to an application filed by Raof Dhanani, the High Court of Allahabad passed an order dated October 27, 2005, quashing the proceedings and directing the Additional Criminal Judicial Magistrate, Ghaziabad to decide the question of territorial jurisdiction, in the matter. The matter is currently pending.

Further, Raof Dhanani is also involved in an insolvency proceeding initiated by SICOM Limited before the High Court of Bombay in relation to recovery of ₹6.01 million, with interest on the sum of ₹2.75 million at the rate of 12% per annum from January 24, 2007 until payment, as set out in an order passed by the Debt Recovery Tribunal-II, Mumbai in 2005, which amount Raof Dhanani and other defendants had failed to pay. Pursuant to an order dated July 5, 2016, the High Court of Bombay reserved the matter for directions until the Supreme Court of India decides whether an insolvency notice can be issued on the basis of a judgment and order passed by the debt recovery tribunal. The matter is currently pending.

If adverse orders are passed in any of these matters against Raof Dhanani, the reputation of our Company and its operations maybe adversely affected. For further details, please see section “*Outstanding Litigation and Material Developments – Litigation involving our Promoters – Litigation involving Raof Dhanani*” on page 488 of this Red Herring Prospectus.

11. *Our erstwhile subsidiary, PGPL, which operated Johnny Rockets restaurants had incurred losses. Our experience with Johnny Rockets restaurants may influence decision of other global brands to partner with us.*

Our erstwhile subsidiary, Prime Gourmet Private Limited (“**PGPL**”), which previously operated Johnny Rockets restaurants in India incurred losses since its acquisition by us in 2016. PGPL operated up to seven Johnny Rockets restaurants in India, however, all the Johnny Rockets restaurants were eventually closed due to commercial reasons and subsequent termination of the International Master Development Agreement dated January 25, 2013 (“**IMDA**”). PGPL closed all Johnny Rockets restaurants by October 10, 2018 and paid all fees payable under the IMDA. As on the date of this Red Herring Prospectus, there are no pending liabilities associated with the termination of the IMDA. We transferred our shares in PGPL pursuant to a share transfer agreement dated December 4, 2018 (the “**PGPL Agreement**”). Under the terms of the PGPL Agreement, the Company has agreed to indemnify and hold harmless the purchasers, their affiliates and their respective shareholders, officers, directors, managers, members, partners, representatives, successors and permitted assigns from and against and pay on behalf of as and when incurred for any loss suffered as a result of or in connection with, *inter-alia*: (i) any facts or circumstances which constitute a breach of any representation or warranty; (ii) any non-fulfilment or breach of any covenant or provision; and (iii) any violation or non-compliance with applicable law. For further details, see “*Our Business – Our Operations - Overview – Restaurant Closures*” and “*History and Certain Corporate Matters – Details regarding material acquisition or divestments of business/undertakings, mergers, amalgamation, revaluation of assets, if any, in the last ten years – Share transfer agreement dated December 4, 2018 executed among our Company, PGPL, Salim Hajiumar Sheikh and Sabiya Sheikh*” on pages 215 and 230 respectively. Our experience with Johnny Rockets restaurants may influence the decision of other global brands to partner with us and this may affect any growth plans we may have in the future.

12. *Despite an increase in the number of our Barbeque Nation Restaurants and growth in consolidated revenues, we have incurred losses in some of the recent fiscals. There can be no assurance that our consolidated or standalone net profit after tax will not decline in future.*

Our total number of Barbeque Nation Restaurants owned and operated by us in India has grown from 102 in Fiscal 2018 to 126, 150 and 147 (including opened, temporarily closed and under construction outlets) in Fiscals 2019, 2020 and the eight-month period until November 30, 2020, respectively. Our total number of International Barbeque Nation Restaurants owned and operated by us has grown from 2 in Fiscal 2018 to 5, 6 and 6 in Fiscals 2019, 2020 and the eight-month period until November 30, 2020, respectively. Consequently, our consolidated total revenue has grown from ₹5,904.48 million in Fiscal 2018 to ₹7,425.41 million in Fiscal 2019 and ₹8,507.94 million in Fiscal 2020. Our consolidated total revenue was ₹2,366.08 million in the eight-month period until November 30, 2020. Despite this growth in the number of our Barbeque Nation Restaurants and in our consolidated revenues, we incurred losses (as set forth below) in Fiscals 2018, 2019, 2020 and the eight-month period ended November 30, 2020.

Particulars	Eight months ended November 30, 2020	Fiscal 2020	Fiscal 2019	Fiscal 2018
Profit after tax (from continuing operations) (in ₹ million)	(1,006.48)	(329.28)	(212.02)	67.79
Profit for the year/period (in ₹ million)	(1,006.48)	(329.28)	(383.86)	(58.00)

We have incurred consolidated losses due to losses in international operations, losses in operations of Johnny Rockets restaurants (operations of which were discontinued by our Company in Fiscal 2019) and as some of our expenses (primarily, employee benefits expenses and occupancy cost and other operating expenses) have grown relatively faster than our revenues from operations. The profits have been negatively impacted in Fiscal 2020 and the eight months period ended November 30, 2020 due to the impact of COVID-19. For further details, see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on page 436. There can be no assurance that our consolidated net profit after tax will not decline in future or that we will not sustain losses or that we will continue to maintain our profit margins.

13. If we are unable to identify and obtain suitable locations for our new restaurants this may result in lower footfalls and table turn rates which would adversely affect our anticipated growth in business.

We have steadily grown our owned and operated Barbeque Nation Restaurant network from a single restaurant in 2008 to 147 Barbeque Nation Restaurants (including opened, temporarily closed and under construction outlets) across 77 cities in India and six International Barbeque Nation Restaurants in three countries outside India as of December 31, 2020. As part of our growth strategy, we plan to increase our Barbeque Nation Restaurant network and Toscano Restaurant network in India and select overseas markets. Identifying and securing ideal locations for our new restaurants is essential to our business. For further details, see “*Our Business – Our Strategies – Continue expansion in Indian cities*” and “*Our Business – Our Strategies – Expansion through owned & franchise formats in select international markets*” on pages 205 and 206, respectively.

Desirable locations may be limited for many reasons, including the general lack of prime real estate in the markets in which we compete and restrictions in some of these markets on the use of certain locations for restaurants. As a result, desirable locations for new restaurants or for the relocation of existing restaurants may not be available on commercially acceptable terms or at all. For example, since Fiscal 2018, we have closed two International Barbeque Nation Restaurants in Ras al Khaima and Jumeirah, UAE and three Barbeque Nation Restaurants in Fiscal 2021 due to commercial reasons. For further details, see “*Our Business – Overview – Restaurant Closures*” on page 215. Further, we may not correctly identify ideal locations that can support the restaurants we open. Certain additional factors, some of which are beyond our control, that could adversely affect our new restaurants include the availability of adequate financing and fit-out costs.

If we are unable to identify and obtain suitable locations for our new restaurants, we may witness lower footfalls and table turns which would adversely affect our ability to achieve our anticipated growth in revenue and profitability.

14. Our Company had withdrawn its application for listing of our Equity Shares on the NSE.

We had filed an application for grant of in-principle approval for listing of our Equity Shares on the NSE pursuant to an application dated August 14, 2017. However, our Company did not meet one of the eligibility criteria of NSE, which requires that in respect of, *inter alia*, promoters of the applicant company, there shall be no material regulatory or disciplinary action by a stock exchange or regulatory authority in the past one year, owing to penalties levied on account of non-compliance with minimum public shareholding norms and violation of insider trading regulations. Accordingly, our Board decided to withdraw the said application pursuant to a board resolution dated December 18, 2017.

We currently meet, and shall continue to meet, the eligibility criteria prescribed by the NSE including compliance with minimum public shareholding and SEBI Insider Trading Regulations 2015. If the eligibility criteria is amended by the NSE in a manner that we are unable to meet the amended eligibility criteria, such amendments may result in

our failure to obtain final approval for listing of our Equity Shares on the NSE. In the event that our Equity Shares are not listed on the stock exchanges in future, there may be an adverse impact on the liquidity and tradability of our Equity Shares.

- 15. We have not been and may continue to not be in compliance with certain covenants under some of our loan agreements and if the relevant lenders were to call an event of default, such an event may adversely affect our business, results of operations and financial conditions.**

As a consequence of COVID-19, we were unable to comply with our payment obligations under our loan agreements. Subsequently, whilst we paid the principal and interest outstanding under our loan agreements, such payments were made after the relevant due dates. For further details, please see “*Financial Statements – Restated Consolidated Financial Information – Note 42*” on page 345 of this Red Herring Prospectus. We may not be in compliance with some of the financial covenants under our loan agreements.

If our lenders demand payment of the default interest and we are unable to comply with our payment obligations or if they declare an event of default as a consequence of our failure to comply with our financial covenants or as a consequence of a cross default, our lenders have the right to, *inter alia*, cancel the outstanding facilities available for drawdown, convert the outstanding loans into equity in the Company, appoint nominee directors, declare their loans to be immediately due and payable with accrued interest and enforce rights over the security created. Such an event may have a material adverse effect on our business, results of operations and financial conditions.

- 16. There are various proceedings involving our Company, and some of our Promoters and Directors, which if determined against us or them, may have an adverse effect on our business, results of operations and our reputation.**

In respect of the orders for the assessment years 2013-14 and 2018-19, no appeals have been filed. Consequent to these assessment orders, penalty proceedings have been initiated against Kayum Dhanani on grounds such as concealment of income and underreporting of income in relation to certain assessment years. The penalty proceedings were initiated against Kayum Dhanani on December 29, 2019 and December 30, 2019, for assessment years 2015-16 and 2017-18, respectively.

An adverse outcome in any of these proceedings in respect of our Company could have an adverse effect on the business, financial condition and results of operations of our Company.

18. *If there is an outbreak of an epidemic or disease affecting our supply chains, our business, financial condition and results of operations may be adversely affected.*

Outbreak of an epidemic or disease affecting our supplies of poultry, fish products or other perishable food items could significantly affect our ability to purchase such commodities, our operations and our costs of doing business. Among the diseases that could affect our supplies are highly contagious diseases that may spread rapidly through the markets in which we operate.

For example, avian influenza is a highly contagious viral disease that affects poultry. Bird flu is another contagious disease that has affected poultry in the recent past. Our markets have been affected by avian flu and bird flu. The impact of novel coronavirus on our supply chains and business is presently unknown.

We select poultry suppliers who monitor their supply. We also perform independent tests when there is a high risk of infection in the regions in which our suppliers operate, when we change our suppliers (or our suppliers change production facilities) or in case of any guest complaints. Despite these precautions and measures, there can be no guarantee that our supplies will not be affected in the future the outbreak of any such contagious disease. If any of our suppliers are affected, we may not be able to locate additional suppliers of poultry products in a timely manner or at all. We may also be constrained to buy the affected poultry or other items at higher prices without a corresponding increase in our menu prices.

An outbreak of a disease, such as COVID-19, whether or not directly affecting our supply chain, may also attract negative publicity resulting in declining demand. As a result of these and other factors, any outbreak of disease, or the possibility of an outbreak of disease could adversely affect our business, financial condition and results of operations.

19. *If we are unable to accurately estimate the demand for our offerings, our business, financial condition and results of operation may be adversely affected.*

The supply of raw materials for our food products is based primarily on forecasts and requirements prepared by our restaurant managers in consultation with our chefs. These forecasts are based on past sales as well as anticipated demand, which is based to a certain extent on the subjective assessment of the restaurant managers. If we are unable to accurately forecast demand for our food products it would lead to excess supply or a shortage in the supply of raw materials from our suppliers, which would have a material adverse impact on our business, financial condition and results of operations.

20. *We have contingent liabilities that are not provided for on our balance sheet, as restated, as at November 30, 2020. If any of these actually occur, they may adversely impact our profitability and may have a material adverse effect on our results of operations and financial condition.*

As at November 30, 2020, we had consolidated contingent liabilities that we do not consider remote of ₹589.58 million, which relate to indirect tax matters (Sales tax and VAT) of ₹169.22 million and direct tax matters of ₹420.36 million. Further, the Company was subject to anti-profiteering investigation for the period between November 15, 2017 to March 31, 2019 by the DGAP. During the year ended March 31, 2020, the DGAP has conducted the investigation and submitted the report to the NAA with a demand amounting ₹325.88 million and we have disclosed such demand as contingent liability as of March 31, 2020. Subsequently, during the eight month period ended

November 30, 2020, NAA has examined this report and ruled that methodology adopted by DGAP while arriving at the demand is incorrect and directed to conduct further investigation. Accordingly, the demand of ₹325.88 million has been excluded from contingent liability as of November 30, 2020 as the investigation is under process. For further details of certain matters which comprise our contingent liabilities, see “*Financial Statements*” on page 278 of this Red Herring Prospectus. If at any time we are compelled to realize all or a material proportion of these contingent liabilities, it may have a material and adverse effect on our business, financial condition and results of operations.

21. *One of our Promoters and Managing Director, Kayum Dhanani has agreed to secure, or has secured, certain personal and Promoter Group debt obligations by creating a pledge on certain Equity Shares held by him within specified periods from the date of Allotment. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the enforcement of the pledge provided by our Promoter and Managing Director.*

Kayum Dhanani has agreed to secure a personal loan of ₹400 million with a pledge over substantially all of the Equity Shares held by him, which shall be created upon the expiry of a period of one year from the date of lock-in of the pre-Offer share capital of our Company. A failure by Kayum Dhanani to comply with his payment obligations or the occurrence of an event of default or any event of acceleration will entitle the lender to, *inter alia*, recall or accelerate repayment of the loan, declare Kayum Dhanani as a defaulter and/or enforce the security provided. In such circumstances, Kayum Dhanani may be required to liquidate a portion of his assets to comply with his payment obligations. As of January 31, 2021, the total amount outstanding under his personal loan was ₹246 million. Kayum Dhanani has also currently pledged 333,400 Equity Shares with RBL Bank Limited to secure loan facilities aggregating to ₹336.1 million granted to certain members of the Promoter Group (i.e., Brown House Baking Private Limited, Iconium Leather Works Private Limited and Sara Suole Private Limited) amounting to 0.98% of the pre-Offer capital. The aggregate amount outstanding under such credit facilities granted to members of the Promoter Group as on January 31, 2021 was ₹289 million. Pursuant to a letter dated March 15, 2021, RBL Bank Limited has provided its consent to a temporary release of the pledge on 333,400 Equity Shares held by Kayum Dhanani from Bid / Offer Opening Date and in accordance with the SEBI ICDR Regulations, subject to such Equity Shares being re-pledged with RBL Bank Limited after Allotment. Any default under the loan agreements following the creation of a pledge on the Equity Shares of our Company may result in, *inter alia*, the lender taking ownership of the pledged shares, selling the pledged shares to any third party purchaser, and attending and exercising voting rights in respect of the pledged shares on any matter at any meeting of the members of our Company.

22. *If we are unable to regularly offer new dishes on our menu or if we fail to respond to changes in consumer tastes and preferences in a timely manner, our business and results of operations would be adversely affected.*

We offer a wide variety of dishes at our Barbeque Nation Restaurants, our International Barbeque Nation Restaurants, through our UBQ services and at our Italian Restaurants. The markets where we operate may demand frequent change in the future including new dishes and dish variant introductions. We plan our menus and dishes based on guest consumption patterns as well as on anticipated trends and guest preferences in the forthcoming seasons. Any mismatch between our forecasts, our planning, introduction of new dishes and the actual demand by our guests could impact us adversely, leading to loss of existing customers or lower footfalls.

Before we can introduce a new dish, we must successfully execute a number of steps, including market research and guest feedback, while adapting our infrastructure networks to increase or change the nature of our raw material requirements. However, there can be no assurance that such efforts will always result in identifying successful new dishes and avoiding unsuccessful introductions. Although we rarely substantially modify our menus, an inability to successfully introduce new menu items could adversely affect our business, financial condition, results of operations and prospects.

Guest preferences in the markets we operate in are difficult to predict and changes in those preferences or the introduction of new dishes by our competitors could put our dishes at a competitive disadvantage. Our business is particularly sensitive to changing consumer preferences, including changes in consumer tastes and dining habits and consumer acceptance of our restaurant format. For example, we believe that our Barbeque Nation Restaurants and International Barbeque Nation Restaurants have benefitted from a consumer appetite for good value, ‘all you can eat’ cuisine, but that consumer preference may change. Health, dietary and other considerations may also result in changes to consumer preferences, which may in turn result in reduced demand for our products. The demand for our offering

or our costs of doing business may also be adversely affected by public concern about nutrition, food safety and other factors. Our particular restaurant format may become less attractive in light of changing consumer preferences, and we may be unable to adapt to such changes in a timely manner or such changes that we adapt to our outlet concepts may be unsuccessful. Our continued success depends on our ability to anticipate, gauge and react in a timely and cost-effective manner to changes in guest tastes for our offering, as well as to where and how guests consume these products. Any changes in consumer preferences that decrease demand for our offering our business, financial condition, results of operations and prospects would be adversely affected.

23. *If we are unable to foresee or respond effectively to significant competition our business, results of operations and financial condition could be adversely affected.*

Our Company faces competition from the restaurant industry in general and the CDR market in particular, both organised and unorganised, and potential new entrants to the CDR market, who may have more flexibility in responding to changing business and economic conditions. We face competition across our business activities from varied offerings. In relation to the organised CDR category, we face competition in India from other organised CDR chains and arguably from QSR chains. We face competition from many other global and local brands in other jurisdictions outside India where we operate.

Some of our competitors may have greater financial resources or a more experienced management team than us. They may also benefit from greater economies of scale and operating efficiencies. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost solutions than we do, which may have a negative effect on our sales. Further, our competitors may set up restaurants in the vicinity of our existing restaurants and may offer their products at more aggressive prices.

The CDR market of the Indian restaurant industry is experiencing growing competition in the markets in which we compete. Additionally, the format of over-the-table grill barbeque pioneered by us, according to the Technopak Report, may see new entrants and greater competition.

There is increasing competition in respect of price, service, location and food quality. In addition, there is competition for suitable real estate available for leasing. A growing, under-served market, such as India, is particularly attractive to new entrants, who may also offer new cuisines that appeal to consumer tastes. New entrants may include global casual dining businesses which benefit from global brand recognition and have significant experience in entering and operating in new markets and significant management, marketing and financial resources.

We may also face competition from existing, experienced casual dining businesses willing to accept low margins on investment in order to enter new markets as well as from business conglomerates willing to cross-subsidise a new casual dining business in order to enter new markets. In addition, the casual dining sector of the restaurant industry in India is fragmented. As a result, in addition to national and regional casual dining restaurant chains, we also compete with smaller restaurant chains as well as individual restaurants within the cities in which we operate.

We cannot assure you that we will be able to continue to compete effectively with our competitors. Our failure to compete effectively, including any delay in responding to changes in the industry and market conditions, together with increased spending on advertising, may affect the competitiveness of our offering, which may result in a decline in our revenues and profitability. A significant increase in competition could exert downward pressure on prices, lower demand for our products and restaurant concepts, an inability to take advantage of new business opportunities and a loss of market share, all of which would adversely affect our business, financial condition, results of operations and prospects.

24. *The premises of our Registered and Corporate Office and all our restaurants are either leased (including sub-leases) or licensed. If we fail to renew these leases / licenses and on competitive terms or if we are unable to manage our lease rental costs, our results of operations would be materially and adversely affected.*

All of our business operations are conducted on premises leased or licensed from various third parties. We may also enter into such transactions with new third parties in the future. Further, the lease deeds in respect of certain of our Barbeque Nation Restaurants and Italian Restaurants have expired and, whilst the Barbeque Nation Restaurants and

the Italian Restaurants continue to operate at the relevant premises, discussions to renew such lease deeds are currently ongoing.

Further, our Registered and Corporate office in Bengaluru is located on premises leased to us by Liberty Restaurant Private Limited, one of our Group Entities, for a period of 51 months with effect from August 1, 2020. The registered office of Red Apple is also leased to them by Liberty Restaurant Private Limited for a period of 51 months with effect from August 1, 2020. In the event that we are unable to renew our lease or our landlord loses ownership or lease rights to this property, we may be required to vacate the current premises and make alternative arrangements for our registered and corporate office. There can be no assurance that the new arrangements will be on commercially acceptable terms, which in turn may adversely affect our business, results of operations and financial condition. For further details, see “*Our Business – Property*” on page 218 of this Red Herring Prospectus.

We generally enter into long-term lease agreements or license agreements that have an initial term that typically ranges from a period of five to 19 years for our Barbeque Nation Restaurants and International Barbeque Nation Restaurants, and three to 15 for our Toscano Restaurants. Some of our lease/license agreements also grant us the right of renewal upon expiration of the current term. In some of our lease/license agreements we may terminate the arrangement by giving prior notice ranging between three and six months. Further, some of our leases/licenses in India include a lock-in period ranging between one to five years, during which period we cannot terminate the lease, except on the occurrence of a limited number of specified events. If we terminate any such lease/ license during the lock-in period, we may be liable to pay the rent including applicable taxes towards the entire lock-in period. Finally, in relation to our lease agreement for our Barbeque Nation Restaurant in Vasant Kunj, New Delhi, we have agreed to a non-compete arrangement within a six-kilometre geographical radius of our restaurant for the duration of the lease agreement.

In recent years, real estate costs including rents have escalated significantly in some of our existing locations and in new locations that we may enter and there can be no assurance that such significant increases in real estate costs will not continue to occur in the future. Further, the terms of our lease/license agreements typically include a rent escalation provision of 5% every year or 15% every three years. Our operating performance depends, in part, on our ability to secure leases/ licenses for our restaurants in appropriate locations at rents we believe are cost effective. The early termination of any of our leases/ licenses due to our non-compliance with the agreement terms or our failure to renew such leases/ licenses at commercially acceptable rentals or at all, could adversely affect our business, financial condition, results of operations and prospects.

Any adverse impact on the title, ownership rights, development rights of the owners from whose premises we operate, breach of the contractual terms of any lease and license agreements, or any inability to renew such agreements on acceptable terms may materially affect our business operations. We currently lease/ license premises for all our restaurants. Further, for one of our leased premises, we are required to obtain consent of the landlord in favour of one existing lender to our Company for creating a charge on the security deposit paid to such landlord. We are in the process of obtaining such consent from the landlord. In the event that we are unable to obtain such consent, the same may result in a breach of the terms of our loan agreement. For details, see “*Risk Factors – Some of our loan agreements contain restrictive covenants which may adversely affect our business, results of operations and financial conditions.*” on page 65. In addition, in respect of a Barbeque Nation Restaurant where we had obtained possession of an outlet leased by a third party, we are yet to execute a lease agreement for this premises in the name of our Company, or obtain consent from the landlord for the transfer of the lease in favour of our Company. In the event of failure to obtain such consent, the landlord may terminate the lease, which may adversely impact our results of operations and cash flows.

25. *We depend on third parties for a major portion of our transportation needs. Any disruptions may adversely affect our operations, business and financial condition.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our vendors and for transportation from our distribution centres to various restaurants. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. We rarely enter into written documentation in relation to the transportation services we hire which poses various additional risks including our inability to claim insurance.

Further, the cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost efficient manner. Accordingly, our business is vulnerable to increased transportation costs including as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of weather related problems, strikes, lock-outs, accidents, inadequacies in road infrastructure or other events.

Although we have experienced few disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may be cost inefficient, thereby adversely affecting our operations, profitability, reputation and market position.

26. *Our business may be affected by seasonality.*

Our revenue from our Barbeque Nation Restaurants and Italian Restaurants is subject to seasonal variations as we typically receive higher revenues between September to March. As a result, our revenues are generally higher during the second half of each Fiscal as compared to the first half of each Fiscal. This seasonality may result in quarterly fluctuations in revenue and profitability, if not offset by other business segments. Further, the timing of opening of new restaurants may result in certain variations in revenues from quarter to quarter. As a result of such seasonal fluctuations, the number of in-dining covers and sales of a given half of each Fiscal may not be reliable indicators of the in-dining covers or sale of the other half of each Fiscal or of our future performance.

27. *If we are unable to maintain consistent same restaurant sales growth, our results of operations may be adversely affected.*

One of the key parameters for our success is consistent same restaurant sales growth. We employ a number of measures to achieve this and track this closely on a regular basis. However, we may be unable to maintain consistent same restaurant sales growth due to a number of reasons including:

- relative failure of our newly introduced dishes;
- failure to increase our sales volumes through our various food festivals;
- poor inventory forecasting;
- inability to reduce purchasing and logistics costs on account of economies of scale;
- failure to efficiently use our commissaries;
- inability to reduce wastage; and
- failure to optimise restaurant-level staffing.

For example, in the past, we introduced new products to offer our clients on-demand barbeque dishes. However, we discontinued this offering due to relative lack of interest from our clients.

Any one or a combination of the factors set out above or other factors currently unknown to us may stall the growth of our sales volumes which may adversely affect our results of operations.

28. *If we are unable to maintain our high food quality standards it may lead to negative publicity which may adversely affect our reputation, business and results of operations.*

Any adverse claims, media speculation and other public statements relating to our food quality, restaurant facilities and service would materially and adversely affect our reputation and our corporate image, or otherwise affect our ability to conduct our business in the ordinary course, including, without limitation, obtaining and renewing operational licenses and regulatory approvals and establishing and maintaining our relationships with guests and suppliers, and to expand our business, including, without limitation, obtaining the necessary financing for such expansion. Further, concerns regarding the safety of products offered at our restaurants or the safety and quality of our supply chain could cause guests to avoid dining with us, or to seek alternative sources, even if the basis for the concern is outside of our control. Adverse publicity about these concerns, whether or not ultimately based on fact, and whether or not involving our restaurants, could discourage guests from dining with us and have a material and adverse effect on our turnover and results of operations. In addition, we cannot guarantee that our operational controls and employee training will be effective in preventing food-borne illnesses, food tampering and other food safety issues that may affect our operations.

Our business is susceptible to health concerns arising from, *inter alia*, food-borne illnesses, health epidemics and allergic reactions. The occurrence of an outbreak of a food-borne illness, health epidemic or other adverse public health event could cause a temporary or permanent closure of restaurants and disrupt our business and operations. We cannot assure you that there will not be incidents of contaminated products or ingredients in the future which may result in product liability claims, product recall and negative publicity. Any such claims and allegations would also distract our management from their day to day management responsibilities and may therefore have a material adverse effect on our business, financial condition and results of operations.

In addition, we rely on third-party raw material suppliers, and, although we monitor them, such reliance may increase the risk that food-borne illnesses may affect one or many of our locations supplied by such third parties. New illnesses resistant to our current precautions may develop in the future, or diseases with long incubation periods could arise that could give rise to claims or allegations on a retroactive basis. Incidents of food-borne illnesses or other food safety issues, including food tampering or contamination affecting our guests may result in litigation, negative publicity, increased costs of doing business and decreased demand at one or all of our restaurants, even if the illnesses are incorrectly attributed to our restaurants. The negative impact of adverse publicity, real or perceived, about our food quality or any illness, injury, other health concern or similar issue relating to one restaurant may extend far beyond the restaurant involved to affect some or all of our other restaurants.

In addition, nutritional, health and other scientific inquiries and studies, which can affect consumer perceptions and dining preferences, could adversely affect our business and prospects. Negative publicity, real or perceived, about food quality, illness, injury or other health concerns (including health implications of obesity and trans-fatty acids) or similar issues stemming from one outlet or a number of restaurants could materially adversely affect us, regardless of whether they pertain to our own restaurants or to restaurants owned or operated by other companies. For example, health concerns about the consumption of meat products or specific events such as the outbreak of “novel corona virus”, “swine” flu or “avian” flu could lead to changes in consumer preferences, reduce consumption of our products and adversely affect our financial performance. These events could reduce the available supply of meat products or significantly raise the price of such meat products.

We cannot make any assurances that our internal controls and training will be effective in preventing negative food-related incidents. Any publicity relating to health concerns or the perceived or specific outbreaks of food-borne illnesses, food tampering or other food safety issues attributed to one or more of our restaurants could result in a significant decrease in sales in all of our restaurants and could have a material adverse effect on our results of operations. In addition, similar publicity or occurrences with respect to other restaurants or restaurant chains could also decrease our sales and have a similar material adverse effect on us.

29. Any failure to maintain effective quality control systems or protocols for our supply chain or restaurants could have a material adverse effect on our business, reputation, results of operations and financial condition.

The quality and safety of the food we serve is critical to our success. Maintaining consistent food quality and preventing food contamination and other health hazards depends significantly on the effectiveness of the quality control systems, policies and guidelines that we and our suppliers have in place, which in turn depends on a number of factors, including the design of the quality control systems and employee implementation and compliance with those quality control systems. During the COVID-19 crisis, we implemented high standards of safety and hygiene

protocols across our Barbeque-Nation Restaurants and Toscano Restaurants in India covering guest safety, employee safety, sanitisation, physical distancing, temperature checks and safe deliveries. We have made required changes to the seating layouts and restricted movement of crowds to maintain physical distancing. We launched #NoCompromiseDining with operating procedures outlining physical distancing, contact-free experience, sanitization protocols and customer experience. There can be no assurance that the quality control systems or protocols that we or our suppliers have in place will prove to be effective. Any significant failure or deterioration of these quality control systems or protocols could have a material adverse effect on our business, reputation, results of operations and financial condition and can cause negative publicity that can affect our brand.

Due to the impact of COVID-19 and the government actions to contain it, most of our supply chains have been, and continue to be, impacted. There can be no assurance that there will not be further, or deeper, supply chain disruptions, or that the steps we are taking to mitigate such disruptions will be effective or achieve their desired results in a timely fashion.

We could also be subject to civil and/or criminal liability and other regulatory consequences in the event that a health hazard were to be found at any of our restaurants as a result of a failure of the quality control systems or protocols that we or our suppliers have in place, including the spread of any infection or disease. If such cases are determined against us, there could be an adverse effect on our reputation, business, results of operations and financial condition. For further details, please see “*Risk Factors – The outbreak of the 2019 novel coronavirus (“COVID-19”) pandemic, as well as GoI measures to reduce the spread of COVID-19, have had a substantial impact on our restaurant operations and the timing of how long the COVID- 19 pandemic and the related GoI measures will last is still uncertain.*” on page 37 of this Red Herring Prospectus.

30. *Our marketing and advertising campaigns may not be successful in increasing the popularity of our brands. If our marketing initiatives are not effective, this may adversely affect our business.*

Our revenues are influenced by brand marketing and advertising. We rely to a large extent on our senior management’s experience in defining our marketing and advertising programmes. If our senior management leads us to adopt unsuccessful marketing and advertising campaigns, we may fail to attract new guests and retain existing guests. If our marketing and advertising programmes are unsuccessful, our results of operations could be materially adversely affected.

The support of our employees, particularly our restaurant managers, is also critical for the success of our marketing programmes, such as local marketing and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programmes and strategic initiatives could adversely affect our ability to implement our business strategy and harm our business, financial condition, results of operations and prospects.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of print or radio advertising, could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business. For further details, see “*Our Business – Marketing and Advertising*” on page 216.

31. *Our Company has obtained and applied for registration of several trademarks including our corporate logo in its name. Until such registrations are granted, we may not be able to prevent unauthorised use of such trademarks by third parties, which may lead to the dilution of our goodwill.*

We have applied for registration of several trademarks, which are currently pending before the concerned authorities in India and abroad. For details of registered trademarks, see “*Government and Other Approvals – Intellectual Property*” on page 496 of this Red Herring Prospectus. We may not succeed in registering our marks or otherwise protecting our intellectual property. Our trademark registration applications have been unsuccessful in the past, for example where similar marks have already been registered in a particular jurisdiction.

With respect to applications made for registration of trademarks, some of our trademark applications are objected by other parties. Further we have filed oppositions to trademark applications filed by certain third parties. In respect of one of our Subsidiaries, Red Apple, an application made by it for the registration of the trademark 'CAFE TOSCANO' was refused. The protective steps that we take to protect our intellectual property rights, including registrations under trademark laws, confidentiality provisions and contractual arrangements, may be inadequate to deter misappropriation of our intellectual property. There can be no assurance that we will be able to protect our intellectual property rights in the future, including by successfully renewing the intellectual property rights that we own. The trademark applications filed by our Company in Egypt have been refused and the applications filed by our Company in Thailand have been abandoned. In relation to the applications in Malaysia, the trademarks registry has agreed to waive the objections previously raised and has provisionally accepted the trademark applications, subject to certain conditions. We may be unable to detect the unauthorised use of, or take appropriate steps to enforce, our intellectual property rights in India or abroad. For further details in relation to the status of our trademark applications, see "*Government and Other Approvals – Intellectual Property*" on page 496 of this Red Herring Prospectus.

Failure to protect our intellectual property and trademarks could harm our reputation and affect our ability to compete effectively. Further, defending our intellectual property rights may require significant financial and managerial resources, the expenditure of which may materially adversely affect our business, results of operations, financial condition and prospects.

Although the non-disclosure obligations under our employment contracts with certain of our key personnel extend beyond the term of the contract, we cannot assure protection of our know-how, trade-secrets or other confidential or proprietary information once these agreements are terminated. The disclosure of such information about us could have an adverse effect on our business, resulting operations, financial condition and prospects.

32. *If we are unable to acquire quality raw materials, ingredients or other necessary supplies and services in a timely manner or if we fail to pass on inflation in food costs to our guests, our business, results of operations and financial condition may be adversely affected.*

Our operations are dependent on adequate and timely deliveries of quality ingredients, including fresh produce. We depend on third-party distributors and suppliers for such deliveries, and therefore, are subject to the risk that shortages or interruptions in supply, caused by factors such as adverse weather conditions, unanticipated demand, changes in governmental regulation and recalls of food products, could adversely affect the availability, quality and cost of ingredients. If the quality of our suppliers' ingredients declines, we may not be able to obtain replacements for such ingredients on commercially agreeable terms or at all in the open market. If our food quality declines due to the inferior quality of ingredients or due to interruptions in the flow of ingredients and similar factors, guest traffic may decline and negatively affect our results.

In addition, the food supply industry in India is fragmented and unorganised and we depend on a number of local suppliers for our raw materials. Our supply agreements have varying terms and we do not have exclusive supply arrangements with our suppliers. Our suppliers may discontinue operations or choose to work with our competitors, including if, among other things, they are offered better terms by our competitors. In the event of a major disruption to the timely supply of quality ingredients, alternative suppliers of food and/or distribution services (as the case may be) may only be available at higher prices or at terms much less favourable to us.

Our profitability depends in part on our ability to anticipate and react to changes in the cost of our supplies. Increases in the cost of important products could significantly increase our restaurant expenses. Most ingredients used in our restaurants, including cooking oil, meat products and vegetables, are commodities and therefore subject to price fluctuations as a result of seasonality, weather, supply and demand in local and international markets, economic conditions and other factors which are beyond our control. Increases in the cost of important raw materials could significantly increase our restaurant expenses. Expenses from materials (cost of food and beverage consumed) represented approximately 43.96%, 41.75%, 42.80% and 34.12% of our Barbeque Nation Restaurants' total expenses for Fiscals 2018, 2019 and 2020 and for the eight months ended November 30, 2020.

We have no control over fluctuations in the price and availability of ingredients or variations in products caused by these factors. If we are not able to obtain requisite quantities of quality ingredients at commercially reasonable prices, our ability to provide the menu items that are central to our business would be adversely affected. In addition, any

shortage of raw materials in the market generally could impact the prices charged by our suppliers, making the cost of raw materials more expensive for us. This in turn could result in an increase in prices to our guests which may reduce demand and therefore adversely affect our business, financial condition, results of operations and prospects.

In addition, we purchase electricity, oil, natural gas and other related supplies needed to operate our restaurants, and our suppliers generally purchase gasoline needed to transport food and supplies to us. Any significant increase in energy costs could adversely affect us through higher rates or imposition of fuel surcharges by our suppliers. Our industry is also susceptible to power outages, which could result in restaurant closures, business disruptions and/or substantial costs associated with reliance on auxiliary power sources.

We cannot predict whether we will be able to anticipate and react favourably to changing costs by adjusting our purchasing practices and menu prices, and a failure to do so could adversely affect our business, financial condition, results of operations and prospects. In addition, because we operate in price sensitive markets, we would likely be unable to fully pass on price increases to our guests. Increases in our costs for any reason including those discussed above could adversely affect our business, financial condition, results of operations and prospects. In addition, if we are unable to adjust our significant fixed costs including lease costs and staff costs, in response to a reduction in revenues in the future, our business, financial condition, results of operations and prospects could be adversely affected.

We cannot guarantee that our third-party contractors will comply with regulatory requirements or meet their contractual obligations to us in a timely manner, or at all. Third-party providers may breach agreements they have with us because of factors beyond our control. They may also terminate or refuse to renew their agreements because of their own financial difficulties or business priorities, potentially at a time that is costly or otherwise inconvenient for us.

Our operations could be delayed or our commercial activities could be harmed due to any such event despite having continuity plans in place. In addition, if our third-party providers fail to operate in compliance with regulations or corporate and societal standards, we could suffer reputational harm, which would likely cause a material adverse effect on our business, financial condition, results of operations and prospects.

33. If we are unable to manage and run our back-end operations efficiently, including at the commissaries for our Barbeque Nation Restaurants, our business and result of operations would be adversely affected.

In addition to operating our Barbeque Nation Restaurants, we prepare some of our food items and other consumables used in our Barbeque Nation Restaurants at our own commissaries based in Delhi NCR and Mumbai. Our commissaries co-ordinate the delivery of fresh food to a limited number of our Barbeque Nation Restaurants located close to each of these commissaries. This requires a significant logistical effort for which we require robust facilities and systems. A failure in our operational and delivery systems, shortages or interruption in the supply of food (caused by weather or other conditions) and a resultant failure to maintain the frequency of deliveries to the Barbeque Nation Restaurants or the quality of the food delivered would impact guest experience at our restaurants, thus reducing overall volume of sales. Deliveries from our commissaries to our Barbeque Nation Restaurants could also be impacted by reasons beyond our control, such as a strike by transporters, loaders or fuel stations.

Furthermore, any unavailability or breakdown of equipment used by us could lead to an interruption in the supply of food items to our restaurants which would have a material adverse effect on our sales. A reduction in the volume of our sales due to a failure in our manufacturing and delivery processes would be likely to have an adverse effect on our business, results of operations and financial condition.

34. Our Company depends on the knowledge and experience of one of our Promoters and our Key Management Personnel for our growth. The loss of their services may have a material adverse effect on our business, financial condition and results of operations.

The success of our business largely depends on the continued service of our KMPs and various professionals and specialists, including our business managers and chefs. As a result of ever-increasing market competition, the market demand and competition for experienced management personnel and chefs has intensified. Our business and financial condition could suffer if we are unable to retain our senior management, or other qualified personnel, or cannot

adequately and timely replace them upon their departure and if we do not implement a smooth transition on such replacement. For further details in relation to change in our KMPs in the last three years, please see “*Our Management – Changes in the Key Management Personnel*” on page 257.

Our Company depends on the management skills and guidance of one of our Promoters and Managing Director, Kayum Dhanani, for development of business strategies, monitoring its successful implementation and meeting future challenges. Whilst Kayum Dhanani’s diploma in sole making from the Central Leather Research Institute, Chennai, cannot be located, we have relied on an affidavit executed by him in this regard. We cannot assure you that the diploma will be available in the future. For details in relation to entities engaged in similar lines of business and operated by some of our Promoters, please see “*Risk Factors – Some of our Promoters and Directors operate or control entities engaged in a similar line of business as our Company, which may lead to competition with these entities and could potentially result in a loss of business opportunity for our Company.*” on page 44. Our KMPs collectively have several years of experience in managing our various businesses and are difficult to replace. Competition for senior management in the industry in which we operate is intense, and we may not be able to recruit and retain suitable replacements in a timely manner or at all. In the event we are unable to attract and retain managerial personnel or our Key Management Personnel join our competitors or form competing companies, our ability to conduct efficient business operations may be impaired.

We do not have any keyman insurance in place. The loss of the services of such personnel or any of our Promoters and our inability to hire and retain additional qualified personnel may have an adverse effect on our business, financial condition and results of operations.

Moreover, we may be required to increase substantially the number of our professionals and specialists in connection with any future growth plans, and we may face difficulties in doing so due to the competition in the restaurant industry for such personnel. Our failure to retain or replace qualified personnel could materially impair our ability to implement any plan for growth and expansion. Competition for quality employees among restaurant companies may also require us to increase compensation, which would increase operating costs and reduce our profitability.

35. *We may be unable to attract and retain sufficient qualified and trained staff in all or any of our restaurants which may adversely affect our business.*

Providing quality services at our restaurants is one of the critical aspects for the success of our business operations. Our continued success depends in part upon our ability to attract, motivate and retain a sufficient number of qualified employees for our restaurants, including restaurant managers, chefs, and kitchen and waiting staff. As we expand our restaurant network, we will need experienced manpower that has knowledge of the local market and our industry to operate our restaurants. Typically, the F&B industry suffers from high attrition rates especially at the restaurant level. We have faced increasing competition for management and skilled personnel with significant knowledge and experience in the F&B sector in India. There can be no assurance that attrition rates for our employees, particularly our sales personnel, will not increase. A significant increase in our employee attrition rate could also result in decreased operational efficiencies and productivity, loss of market knowledge and guest relationships, and an increase in recruitment and training costs, thereby materially and adversely affecting our business, results of operations and financial condition.

We cannot assure you that we will be able to find or hire personnel with the necessary experience or expertise to operate our retail restaurants in our existing markets or new markets that we are entering into. In the event that we are unable to hire people with the necessary knowledge or the necessary expertise, our business may be severely disrupted, financial condition and results of operations may be adversely affected.

Our success depends on our ability to attract, hire, train and retain skilled service personnel. In the restaurant industry, the level and quality of ground personnel and customer service are key competitive factors and an inability to recruit and retain suitably qualified and skilled personnel could adversely impact our reputation, business prospects and results of operations.

36. *We generated a significant portion of our business from our Barbeque Nation Restaurants in three cities (Delhi NCR, Mumbai and Bengaluru) alone making us susceptible to economic and other trends and developments in these cities.*

For the fiscal year ended March 31, 2020 and for the eight months ended November 30, 2020, our Barbeque Nation Restaurants in Delhi NCR, Mumbai and Bengaluru together contributed more than 38% and 30%, respectively, of our total revenue from operations. We may continue to open more restaurants in these cities.

The concentration of our revenues from operations generated from these areas heightens our exposure to adverse developments related to competition, as well as economic, political, demographic and other changes, which may adversely affect our business prospects, financial conditions and results of operations. Any adverse development that affects the performance of our restaurants located in these areas could have a material adverse effect on our business, financial condition and results of operations. Further, existing and potential competitors to our businesses may increase their focus on these cities, which could reduce our market share. For example, our competitors may intensify their efforts in these cities to capture a larger market share by launching aggressive promotional campaigns.

37. *Prior to the filing of the Draft Red Herring Prospectus, one of Red Apple's lenders had not provided its consent to our Company's acquisition of 61.35% of the equity share capital of Red Apple on a fully diluted basis.*

Red Apple became our Subsidiary with effect from December 31, 2019. In January 2020 and February 2020, our Company acquired 61.35% of equity share capital (on a fully diluted basis) of Red Apple. Under a certain loan facility of ₹5.00 million granted to Red Apple by one of its lenders, Red Apple required the consent of this lender in connection with, *inter alia*, the acquisition of its equity shares and the consequent change of control. Prior to filing the Draft Red Herring Prospectus, Red Apple did not obtain the consent for the acquisition by our Company of 61.35% of its equity share capital (on a fully diluted basis) from this lender. Whilst the amount outstanding under this loan facility has been paid as at the date of this Red Herring Prospectus, there can be no assurance that Red Apple will obtain consents from its lenders for subsequent corporate actions prior to the completion of such actions. Failure to obtain such a consent could result in the issuance of an event of default notice and the acceleration of all amounts payable under the relevant financing arrangements. Any acceleration of the amounts outstanding under facilities granted to Red Apple will need to be immediately refinanced by Red Apple or repaid with the assistance of a capital infusion from the Company.

38. *The Company did not obtain prior consent from its lenders in relation to the Company's acquisition of 61.35% of the equity share capital of Red Apple on a fully diluted basis. These consents have since been obtained but any failure to obtain consents in future may lead to the occurrence of an event of default and acceleration of all amounts outstanding under our loan facilities.*

Under certain financing agreements between the Company and its lenders, the Company also required the consent of its lenders, in connection with, *inter alia*, the acquisition of equity shares of Red Apple and incurrence of additional indebtedness. Although, the Company did not obtain these consents prior to the acquisition of Red Apple, these consents were subsequently obtained and as on the date of this Red Herring Prospectus, the Company has received consents for the acquisition of 61.35% of the equity share capital (on a fully diluted basis) of Red Apple from its lenders. Any failure to obtain consents in future may lead to the occurrence of an event of default and acceleration of all amounts outstanding under our loan facilities.

39. *Our Statutory Auditors have placed emphasis on certain matters in relation to our Company in the Restated Consolidated Financial Information and the Special Purpose Restated Standalone Financial Information.*

Our Statutory Auditors have placed emphasis on the following matters:

- a. The note in the financial statements describes the impact of the COVID-19 pandemic on the Company's operations and the fact that its current liabilities exceeded its current assets by Rs. 2,735.05 million as of November 30, 2020 on a standalone basis and Rs. 3,101.24 million on a consolidated basis, but the financial statements having been prepared on a going concern basis considering the mitigation plans of the Company as explained in the aforementioned note in the financial statements; and
- b. Significant management estimates and assumptions have been involved in assessing the financial impact of COVID-19 pandemic in assessing the recoverability of the carrying amount of its assets as on November 30, 2020 and given the uncertainty regarding the duration, extent and eventual outcome of the impact of the

COVID-19 pandemic, the Company cannot estimate with any precision the impact on its prospective financial performance and the eventual outcome of the impact could be different than that estimated as at the date of approval of the financial statements.

The auditor's reports also mention that their opinion is not modified in respect of the above matters.

For further details, please see "Financial Statements" on page 278.

We cannot assure you that our Company, our Subsidiaries or our Group Entities will not make losses in future, and if this were to occur, it could adversely affect our operations and financial condition.

42. If we are not able to successfully develop and integrate any future brand acquisitions, it could have a material adverse effect on our business, financial condition, results of operations and prospects.

We evaluate potential acquisition targets from time to time, and we may in the future seek to acquire businesses and assets in order to expand our operations and brand portfolio or to enter new markets. The completion of acquisitions and, if completed, the successful integration of such newly acquired businesses into our operations may be difficult for a variety of reasons, including differing culture or management styles, poor records or internal controls and difficulty in establishing immediate control over cash flows. As a result, potential future acquisitions pose significant risks to our existing operations, including:

- additional demands placed on our senior management, who are also responsible for managing our existing operations;
- increased overall operating complexity of our business, requiring greater personnel and other resources;
- additional cash expenditures to integrate acquisitions;
- incurrence of additional debt to finance acquisitions and higher debt service costs related thereto; and
- the need to attract and retain sufficient numbers of qualified management and other personnel.

Moreover, when making acquisitions it may not be possible for us to conduct a detailed investigation of the nature of the assets being acquired due to, for example, time constraints in making acquisition decisions and other factors. We may also become responsible for additional liabilities or obligations not foreseen at the time of an acquisition.

Moreover, even if we are successful in integrating newly acquired assets and acquiring additional assets, expected synergies and cost savings may not materialise, resulting in lower than expected benefits from such acquisitions.

43. *Some of the lease agreements entered into by our Company and Red Apple with respect to our immovable properties may not be duly registered or may be inadequately stamped, which may adversely affect our operations.*

Some of our lease agreements with respect to our immovable properties in India may not be duly registered or may be inadequately stamped. Unless such documents are adequately stamped and duly registered, such documents may be rendered as inadmissible as evidence in a court in India or attract penalty as prescribed under applicable law, and we may lose the right to continue using the premises for the relevant restaurants, which may result in a material and adverse effect on the continuance of our operations and business. We may incur significant costs in relocating our restaurants and our investments in developing and marketing such restaurants may be lost, which may adversely affect our financial condition, business, results of operations and prospects and would negatively impact our reputation.

44. *We occupy some of the premises used for our restaurants by way of a license, and not by way of a lease. Unlike a lease, a license does not provide us an interest in the property and if the owner terminates the license, we may lose possession of the premises, which may adversely affect our operations.*

We occupy some of the premises used for our restaurants in India by way of a license, which only provides us a right to use the property, and unlike a lease, not a possessory interest. A license may be terminated by the owner of the premises at any time, subject to remedies for breach of contract by the licensee and subject to certain exceptions. A license may also not be enforceable against any transferee of the premises. If any of the licensors decides to terminate the license for premises used by us for our restaurants or transfers such premises, we may lose the right to continue using the premises for the relevant restaurants, which may result in a material and adverse effect on the continuance of the operations and business of our Company. We may incur significant costs in relocating our restaurants and our investments in developing and marketing such restaurants may be lost, which may adversely affect our financial condition, business, results of operations and prospects and would negatively impact our reputation.

Please also see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations – Changes in Accounting Policies in the last three Financial Years*” and “*Risk Factors – Significant differences exist between Ind AS and other reporting standards, such as U.S. GAAP and IFRS, which may be material to investors’ assessments of our financial condition*” on pages 448 and 77.

45. *We require a number of regulatory approvals, registrations, licenses and permits in respect of our operations. Failure to obtain or maintain licenses, registrations, permits and approvals may adversely affect our business and results of operations.*

We are governed by various laws and regulations for our business and operations. We are, and will be, required to obtain and hold relevant licenses, approvals and permits at the local, state and central government levels for doing our business. The approvals, licenses, registrations, certificates and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business. For further details, please see “*Government and Other Approvals*” on page 494 of this Red Herring Prospectus.

While we have obtained a significant number of approvals, licenses, registrations, certificates and permits from the relevant authorities, we are yet to receive or apply for several approvals, licenses, registrations and permits. We cannot assure you that we will apply for and receive these approvals and clearances in time or at all. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or issue them at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could adversely affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

We also serve alcoholic beverages in certain of our restaurants. Regulations governing sale of alcoholic beverages relate to numerous aspects of a restaurant's operations, including the hours of operation, advertising, wholesale purchasing, inventory control and the handling, storage and dispensing of alcoholic beverages. We are subject to licensing and regulation by a number of governmental authorities.

Further, certain licenses and approvals obtained by us for operating our restaurants, including liquor licenses, licenses under the Legal Metrology Act and health and trade licenses have not been obtained in the name of our Company or Red Apple, as applicable. While we are in the process of transferring some of these licenses in the name of our Company or Red Apple, as applicable, the relevant government authorities have not challenged/ issued any notices or letters in relation to the operation of our restaurants based on such licenses, as on date. We cannot assure you that no action will be initiated against our Company in future, in relation to such licenses. If found to be in non-compliance, our license maybe revoked, thereby adversely affecting our business and our results of operations.

In respect of certain restaurant outlets of our Company, we have not applied for fire safety certificates and in certain cases our landlords have not obtained fire safety certificates in respect of the properties in which we operate.

Changes to licensing and regulations could cause us to incur additional costs which we may not be able to pass on to our guests or which may lead to higher prices being charged to consumers making dining out in such restaurants less attractive and leading to a decline in sales. Additionally, a change in tax regimes applicable to our business may result in uncertainty, disruption to operations and/or implementation costs which we may not be able to pass on to our guests or which may lead to higher prices being charged to consumers, making dining out less attractive and leading to a decline in sales.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased costs and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are pending renewal, see "*Government and Other Approvals*" on page 494 of this Red Herring Prospectus. We cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may adversely affect our business and results of operations.

46. Some of our loan agreements contain restrictive covenants which may adversely affect our business, results of operations and financial conditions.

As of January 31, 2021, we had a consolidated debt of ₹1,431.20 million. We have entered into agreements for short-term and long-term loans and other borrowings. Some of these agreements contain requirements to maintain certain security margins, financial ratios and contain restrictive covenants relating to issuance of new shares, changes in capital structure, making material changes to constitutional documents, implementing any expansion scheme, incurring further indebtedness, encumbrances on, or disposal of assets, paying dividends and making investments over certain thresholds. For further details, see section "*Financial Indebtedness*" on page 433 of this Red Herring Prospectus. In addition, we also have an unsecured loan which is payable on demand. There can be no assurance that we will be able to comply with our payment obligations in relation to such loan or persuade our lender to refrain from demanding immediate repayment, which may adversely affect our operations and cash flows. Further, some of our financing arrangements specify that upon the occurrence of an event of default, the lender shall have the right to, *inter alia*, cancel the outstanding facilities available for drawdown, convert the outstanding loan into equity in the Company, appoint nominee directors, declare the loan to be immediately due and payable with accrued interest and enforce rights over the security created. There can be no assurance that we will be able to comply with these financial or other covenants, or that we will be able to obtain the consents necessary to proceed with the actions which we believe are necessary to operate and grow our business, which may in turn have a material adverse effect on our business and operations. Please see "*Risk Factors – The Company did not obtain prior consent from its lenders in relation to the Company's acquisition of 61.35% of the equity share capital of Red Apple on a fully diluted basis. These consents have since been obtained but any failure to obtain consents in future may lead to the occurrence of an event of default*"

and acceleration of all amounts outstanding under our loan facilities.” on page 61. The Company has obtained all necessary consents and approvals from its lenders with respect to the Offer.

We may be required to dedicate a significant portion of our operating cash flow to making periodic principal and interest payments on our debt, thereby limiting our ability to take advantage of significant business opportunities and placing us at a competitive disadvantage compared to our peers who have relatively less debt.

47. *If we are unable to comply with health, safety and environment laws in India and markets outside India where we operate, our business and results of operations could be adversely affected.*

Our business is subject to national, state and municipal laws and regulations, which govern the handling and storage of food products, as well as the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from our operations. In addition, we are also subject to regulation relating to local land use controls, permits planning permission, fire and safety standards, minimum wage, employment discrimination and import and export of goods and customs regulations. For further details, see the section “*Regulations and Policies*” on page 220 of this Red Herring Prospectus.

We have been subject to actions by statutory/ regulatory authorities and could be subject to substantial civil and criminal liability and other regulatory consequences in the event that a health or environmental hazard was to be found at any of our restaurants or if any of our operations result in contamination of the environment, including the spread of any infection or disease. We may be the subject of public interest litigation in India relating to allegations of such contamination, as well as in cases having potential criminal and civil liability filed by regulatory authorities. If such cases are determined against us, there could be an adverse effect on our business and operations. In addition, health, safety and environmental regulation in India may become more stringent, and the scope and extent of new regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in health, safety or environmental regulations, we may be required to incur significant amounts on health, safety and environmental audits and monitoring, pollution control equipment and emissions management. While we maintain insurance coverage, in amounts which we believe are commercially appropriate, we may be unsuccessful in asserting our claim for certain liabilities or losses under such insurance policies. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition and cash flows. For further details, see the section “*Outstanding Litigation and Material Developments*” on page 476.

48. *Our business relies on the performance of our information technology systems and any interruption or failure to migrate to more advanced systems in the future may have an adverse impact on our business operations and profitability.*

The proper functioning of our financial controls, accounting, customer database, customer service and other data processing systems, including those relating to our centralised reservation and feedback systems, together with the communications systems linking our headquarters, branches, sales and service restaurants and main information technology centres, is critical to our operations and to our ability to compete effectively. We also use our IT systems to closely track guest feedback using our internal Guest Satisfaction Index (“**GSI**”). The GSI is an important parameter to monitor the performance of each of our restaurants. However, GSI is an internally computed and managed parameter and may not be accurately calculated either due to incorrect raw data or due to a flawed methodology. Further, there is no third-party audit in relation to our internal computation of the GSI.

Our business activities would be materially disrupted in the event of a partial or complete failure of any of these information technologies or communications systems. These failures could be caused by, among others, hardware failure, software program errors, computer virus attacks, internet failure, failure to successfully implement ongoing information technology initiatives, human errors, blackouts and unanticipated problems at our existing and future offices and restaurants. Many of these events are wholly or partially outside of our control.

Our IT systems integrate and collate data of, *inter alia*, purchase, sales, reporting, accounting and inventory, project system and human resource management from all our restaurants and offices. We use our IT systems to monitor all aspects of our businesses and rely on such systems for the efficient operation of our business, including, the monitoring

of inventory levels, the allocation of products to our restaurants and budget planning and supplemental front-end billing.

Our Company's information technology systems may not always operate without interruption and may encounter temporary abnormality or become obsolete, which may affect its ability to maintain connectivity with our restaurants and offices. We cannot assure that we will be successful in developing, installing, running and migrating to new software systems or systems as required for its overall operations. Even if we are successful in this regard, significant capital expenditures may be required, and it may not be able to benefit from the investment immediately. All of these may have a material adverse impact on our operations and profitability.

In addition, we cannot guarantee that the level of information security it presently maintains is adequate or that its systems can withstand intrusions from or prevent improper usage by third parties. Our failure to continue its operations without interruption due to any of these reasons may adversely affect our business, financial condition and results of operations.

Further, while no law, regulation or policy has been adopted as on date, the Government of India in December 2019, published the Personal Data Protection Bill, 2019, which provides for a framework for protection of personal data and seeks to, among others, lay down norms for cross-border transfer of personal data, define the scope of the definition of personal data and ensure the accountability of entities processing personal data. Any such laws, if they come into force, could impose restrictions on our operations and increase our compliance costs.

49. *If we are unable to protect our credit card or debit card data or any data related to any other electronic mode of payment, or any other personal information that we collect, our reputation could be significantly harmed.*

The use of electronic payment methods and collection of other personal information exposes us to an increased risk of privacy and security breaches as well as other risks. We may experience security breaches in which payment related data and personal information may be stolen. Although we use secure private networks to transmit confidential information, third parties may have the technology or know-how to breach the security of the customer information transmitted in connection with credit and debit card sales, and our security measures and those of technology suppliers may not effectively prohibit others from obtaining improper access to this information. If a person is able to circumvent our security measures or otherwise gain access to the confidential information that we collect, they may be able to destroy or steal valuable information or otherwise disrupt our operations. We may become subject to claims for purportedly fraudulent transactions arising out of the actual or alleged theft of credit or debit card information or other confidential information, and we may also be subject to lawsuits or other proceedings relating to these types of incidents. Any such claim or proceeding could cause us to incur significant unplanned expenses, which could have an adverse impact on our financial condition, results of operations and cash flows. Further, adverse publicity resulting from these allegations could significantly harm our reputation and may have a material adverse effect on us and our restaurants.

Moreover, we receive and process certain personal financial and other information about our customers and employees when we accept credit cards for payment. While we do not store restaurant customers' credit and debit card payment information, the use and handling of this information is regulated by evolving and increasingly demanding laws and regulations. If our security and information systems are compromised as a result of data corruption or loss, cyberattack or a network security incident or our employees, sub-franchisees or suppliers fail to comply with these laws and regulations, and this information is obtained by unauthorised persons or used inappropriately, it could subject us to litigation and government enforcement actions, damage our reputation, cause us to incur substantial costs, liabilities and penalties and/or result in a loss of customer confidence, any and all of which could adversely affect our business, financial condition and results of operations.

50. *Any increase in our employee costs may adversely affect our margins and results.*

We have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. We may incur higher staff costs in the future as we continue to increase our staff count to prepare for future new restaurants. In addition, pursuant to the enactment of the Code on Wages, 2019, there may be an upward revision in the wages payable in some of the states in which we currently operate. Further, the Indian Parliament has approved the Code on Social Security, 2020 (the "**Code on Social Security**") which would

impact the contributions we make, including towards provident fund and gratuity. The effective date from which the changes are applicable is yet to be notified and the rules are yet to be finalized, but the Company will carry out an evaluation of the impact of the Code on Social Security and record the same in our financial statements in the period in which the Code of Social Security becomes effective and the related rules are published. For further details, see “*Regulations and Policies*” on page 220. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase. Any of these factors could adversely affect our business, financial condition and results of operations.

51. *Our current restaurant locations may become unattractive.*

The success of any restaurant depends substantially on its location. Given the rate of urban construction in India, there can be no assurance that our current restaurant locations will continue to be attractive as neighbourhoods or demographic patterns change. Neighbourhood or economic conditions where restaurants are located could deteriorate in the future, thus resulting in potentially reduced sales in these locations. In addition, some of our less profitable or unsuccessful restaurants may be subject to long-term leases with lock-in periods, so that even if we decide to close such restaurants, we may nonetheless be required to perform our obligations under such leases/ licenses including payment of rentals or pay penalties for terminating the leases/ licenses, which will increase our operating costs. Any of these factors could adversely affect our business, financial condition, results of operations and prospects.

52. *We have significant power requirements for continuous running of our operations and business. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an adverse effect on our business, results of operations and financial condition.*

Our restaurants have significant electricity requirements and any interruption in power supply to our restaurants may disrupt our operations. We have limited options in relation to maintenance of power back-ups such as diesel generator sets and any increase in diesel prices will increase our operating expenses which may adversely impact our business margins. Our business and financial results may be adversely affected by any disruption of operations.

Further, we depend on third parties for all of our power requirements. Since we have significant power consumption, any unexpected or significant increase in its tariff can increase the operating cost of our restaurants and distribution centres. In majority of the markets we operate in, there are limited number of electricity providers due to which in case of a price hike we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition and results of operations.

53. *General and industry-specific economic fluctuations could adversely affect our business, financial condition, results of operations and prospects.*

Our business, financial condition, results of operations and prospects depend on a variety of general economic and industry-specific factors. The CDR market of the Indian restaurant industry is highly fragmented and competitive and is affected by changes in national, regional and local economic conditions, consumer credit, taxation, unemployment and changing demographic trends. Further, in periods of economic uncertainty, consumers tend to decrease their discretionary restaurant spending, which may materially and adversely affect our business, financial condition, results of operations and prospects.

The performance of individual restaurants may also be adversely affected by factors such as changing guest traffic patterns and the establishment of nearby competing restaurants. In response to such developments, we may need to increase our marketing efforts, adjust our pricing or take other actions, which may adversely affect our results of operations. These factors are generally beyond our control, and our ability to manage the risks they present is important to our operations. Reduced guest traffic in our restaurants for any reason, increased costs of doing business or reduced prices for our products as a result of these or other considerations could adversely affect our business, financial condition, results of operations and prospects. For further details, please see “*Risk Factors - The outbreak of the 2019 novel coronavirus (“COVID-19”) pandemic, as well as GoI measures to reduce the spread of COVID-19, have had a substantial impact on our restaurant operations and the timing of how long the COVID- 19 pandemic and the related GoI measures will last is still uncertain*” on page 37 of this Red Herring Prospectus.

54. *We make significant capital improvements to our leased premises, the cost of which we may be unable to recover.*

We periodically make significant, fixed capital improvements to our facilities. We may also invest in additional power supply infrastructure at our locations or other significant, fixed capital improvements, but any such investments generally become the property of the landlord after the expiration of the lease/ license. The cost of such capital improvements has gone up in recent times. Moreover, our growth strategy primarily focuses on company owned and operated restaurants, which entail a higher capital commitment. As such, we may be unable to recover investments we make in upgrading our locations at the termination of a lease/ license, such as investments in power supply infrastructure.

The loss of investments in such capital improvements, particularly if such losses occurred at a number of our leased / licensed locations, may have an adverse effect on our business, financial condition, results of operations and prospects.

55. *We have had instances of regulatory non-compliances, including certain lapses in relation to regulatory filings, internal controls and internal record keeping under applicable law.*

The Company is required to report all transactions in securities by its promoters and promoter group to the Stock Exchanges within twenty-hours of such transactions between the date of filing the draft red herring prospectus and the date of closure of the Offer pursuant to Regulation 54 of the SEBI ICDR Regulations. However, there has been an inadvertent delay in reporting (i) certain transfers of Equity Shares made by our Promoter, Kayum Dhanani to certain third parties, who are categorized as public shareholders of the Company; and (ii) creation of pledge in favour of RBL Bank Limited, to the Company, and consequently by the Company to the Stock Exchanges. The Company has received a letter dated January 29, 2021 from SEBI in respect of such transactions undertaken by Kayum Dhanani. SEBI, in this letter, pointed out that although the Company made the requisite declarations in respect of such transactions, there was a delay in making such disclosures. SEBI went on to state that such delay in compliance was viewed seriously and the Company was warned and advised to be cautious and ensure compliance with all applicable provisions of the SEBI rules and regulations.

There have also been certain instances of discrepancies / non-compliances by our Company in relation to certain filings and disclosures made to the RBI and the RoC under applicable law, such as delays in filing of relevant forms with the RoC and non-compliance with applicable provisions of company law by our Company, including in relation to inadvertently filing a return of allotment with the RoC for a preferential allotment of equity shares by the Company for cash consideration, when the allotment was for consideration other than cash and filing of a return of allotment with the RoC stating that the issuance was for premium, when the issuance was made at par value. While our Company has filed a rectification application for the incorrect return of allotment, we cannot assure you that no penalty will be imposed on the Company for the said lapse. Any penalty applicable on the Company may adversely affect the cash flows and results of operations of our Company.

Further, our Company does not have share transfer forms in relation to transfer of 4,999 equity shares each by Suchitra Dhanani and (late) Sajid Dhanani to SHL on April 1, 2007, and we are unable to ascertain instances of contravention of, or non-compliance with, applicable laws and regulations with respect to the said transfers. For details of the said share transfers, see “*Capital Structure*” on page 103. Additionally, we do not have past records of our erstwhile subsidiary Favorite Restaurants Private Limited, which has merged with our Company, for the period prior to 2015. For details of the merger, see “*History and Certain Corporate Matters*” on page 224 of this Red Herring Prospectus. Any penalty applicable on the Company for defaults of Favorite Restaurants Private Limited may adversely affect the cash flows and results of operations of our Company.

56. *Our risk management and insurance policies may not be effective or adequate.*

Our risk management policies and procedures designed to prevent the occurrence of, or mitigate, risks such as food wastage, unaccounted cover discounts and incorrect or unapproved discounted billing may not be adequate or effective. We can provide no assurance that our IT systems, policies and procedures and personnel will always be effective or that we will always be successful in monitoring or evaluating the compliance risks to which we are or may be exposed. Non-compliance with applicable regulations could lead to reduced customers using our products and services. Further, our business involves risks and hazards which may adversely affect our profitability, including

failure of systems and employee frauds. We cannot assure you that the operation of our business will not be affected by any of the incidents and hazards listed above or by other factors.

We have a variety of insurance policies to cover our assets against external risks and for the benefit of our employees including, fidelity guarantee, standard fire and special perils policy, burglary insurance and plate glass (floating) insurance policy and such other insurance policies as required by applicable law and which are subject to certain exclusions and limits on coverage.

There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all material losses, including coverage for claims by third parties and litigation. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, that is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and our cash flows, results of operations and financial performance could be adversely affected. For a detailed description of the insurance policies obtained by us including the assets covered under such insurance, see “*Our Business – Insurance*” on page 218 of this Red Herring Prospectus.

57. *We do not have definitive agreements or fixed terms of trade with some of our suppliers. Failure to successfully maintain our supplier relationships and network or to identify new suppliers could adversely affect us.*

One of the prime reasons we are able to offer value for money dining options to our guests is our strong relationships with our suppliers. Our growth as a business depends on our ability to attract and retain high quality and cost-efficient suppliers to our network. For additional information regarding our supplier relationships, see “*Our Business – Our Strengths – Strong business processes and back-end systems leading to efficient operations*” on page 201 of this Red Herring Prospectus. As a consequence of the impact of COVID-19 on the Company’s liquidity status, the Company’s trade payables to our suppliers have increased significantly. If we are unable to maintain our relationships with our suppliers, our business will be adversely affected.

In order to maintain flexibility in procurement options, we do not have any long-term supply arrangements with our suppliers and we procure our products on a purchase order basis. If we are unable to continue to procure supplies at competitive prices, our business will be adversely affected.

Furthermore, the success of our supplier relationships depends significantly on satisfactory performance by our suppliers and their fulfilment of their obligations. If any of our suppliers fails for any reason to deliver the products in a timely manner or at all, it may affect our ability to manage our inventory levels, which in turn, may result in unavailability of certain dishes on our menu thereby adversely affecting our guest dining experience and our reputation.

While we intend to continue to enter into new supplier relationships as a part of our business strategy, we may not be able to identify or conclude appropriate or viable arrangements in a timely manner or at all. Further, there can be no assurance that our relationships with new suppliers in the future will necessarily contribute to a better experience for our customers or to our profitability. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

58. *Our use of imported ingredients and other raw materials and equipment exposes us to the risk of the imposition or increase of tariffs, duties and other levies.*

We import some of our ingredients and equipment. Further, some of our third-party suppliers may also import certain ingredients and raw materials. Our or our third parties’ imports may increase in the future. India generally imposes import quotas and tariffs which may increase in the future thereby increasing the costs of these commodities and negatively affecting our results.

In addition, Indian authorities may ban imports of certain food items into India, as a result of health or other considerations. These and other measures that reduce the supply of imported ingredients or other food items in India may cause prices for these items to increase. Consequently, our costs would increase. We may not be able to pass this increase in our costs to our guests.

If we are unable to pass such increase in the costs of our ingredients or raw materials and are unable to replace them with locally available substitutes, our business and results of operations may be adversely affected.

59. *Our funding requirements and the proposed deployment of Net Proceeds are not appraised by any independent agency.*

We intend to use the Net Proceeds for the purposes described in “*Objects of the Offer*” on page 125 of this Red Herring Prospectus. Our funding requirements are based on management estimates and our current business plans and have not been appraised by any bank or financial institution. The deployment of the Net Proceeds will be at the discretion of our Board. We are also yet to identify the exact location of our new restaurants or enter into agreements for purchase or lease of property for these restaurants. We have also not placed any orders for purchase of fit outs and construction related items for the restaurants we plan to set-up. We have relied on past expenditure in setting up restaurants for the purposes of estimating utilisation of the Net Proceeds in the future. While we have obtained the quotations from various vendors in relation to such purchase of fit outs and construction related items for the restaurants we plan to set-up, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors.

However, the deployment of the Net Proceeds will be monitored by the Monitoring Agency appointed pursuant to the SEBI ICDR Regulations. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, inability to identify suitable location for the restaurants at favourable terms and other financial and operational factors.

Accordingly, prospective investors in the Offer will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and results of operations.

60. *A portion of the Net Proceeds may be utilised for repayment or pre-payment of loans taken from an affiliate of one of the Book Running Lead Managers to the Offer.*

We propose to repay/prepay certain loans obtained from an affiliate of one of the Book Running Lead Managers from the Net Proceeds as set out in “*Objects of the Offer*” on page 125. Such affiliate is not an associate of the Company in terms of the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992. Loans and facilities sanctioned to our Company by such affiliate are part of its normal commercial lending activity in the ordinary course of business which we believe is not perceived as a current or potential conflict of interest. For further details, see “*Objects of the Offer*” on page 125.

61. *If there are delays or cost overruns in utilisation of Net Proceeds, our business, financial condition and results of operations may be adversely affected.*

We intend to utilise the Net Proceeds of the Offer as set forth in “*Objects of the Offer*” beginning from page 125 for setting-up of new Barbeque-Nation Restaurants, repayment or prepayment loans of our Company on a consolidated basis and general corporate purposes.

The fund requirement mentioned as a part of the objects of the Offer is based on internal management estimates and has not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies. We are also yet to identify the exact location of our new restaurants or enter into agreements for purchase or lease of property for these restaurants. We have also not placed any orders for purchase of fit outs and construction related items for the restaurants we plan to set-up. We have relied on past expenditure in setting up restaurants for the purposes of estimating utilisation of the Net Proceeds in the future. As a result, our actual deployment of funds may be higher than our management estimates and may cause an additional burden on our finance plans, as a result of which, our business, financial condition, results of operations and cash flows could be materially and adversely impacted.

Furthermore, we may need to vary the objects of the Offer due to several factors or circumstances including competitive and dynamic market conditions, variation in cost structures, changes in estimates due to cost overruns or

delays, which may be beyond our control. Pursuant to Section 27 of the Companies Act, any variation in the objects of the Offer would require a special resolution of our shareholders, and our Promoters or controlling shareholders will be required to provide an exit opportunity to our shareholders who do not agree to such variation which may involve considerable time or cost overrun. If our shareholders exercise such an exit option, our operations, business and share price may be adversely affected.

62. *Any downgrading of our credit rating by a domestic or international credit rating agency may increase interest rates for our future borrowings, which would increase our cost of borrowings, and adversely affect our ability to borrow on a competitive basis.*

The rating committee of ICRA in a letter dated August 31, 2020 revised the long-term ratings of our Company to BBB+ from A-. The rating committee also revised our Company's short-term ratings to A2 from A2+. According to ICRA, their outlook on the long-term rating continues to be 'negative'.

Our credit rating could have been downgraded due to various factors, including factors which may be outside our control. Any future downgrade of our credit ratings may increase interest rates for refinancing our borrowings, which would increase our cost of borrowings, and may have an adverse effect on our future issuances of debt and our ability to borrow on a competitive basis. Further, any downgrade in our credit ratings may also trigger an event of default or acceleration of repayment of certain of our borrowings. If any of these risks materialise, it could have a material adverse effect on our business, results of operations and financial condition.

63. *Our Company may not be able to pay dividends in the future.*

Our Company has declared and paid dividends for Fiscals 2018 and 2019. However, no dividend was paid for Fiscal 2020. Any dividends to be declared and paid in the future are required to be recommended by our Board of Directors and approved by its Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. Our Company's ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements. We cannot assure you that we will generate sufficient revenues to cover our operating expenses and, as such, pay dividends to our Company's shareholders in future consistent with our past practices, or at all. For details pertaining to dividend declared by our Company in the past, see "*Dividend Policy*" on page 277 of this Red Herring Prospectus.

64. *Our Promoters will continue to exercise significant influence over us after completion of the Offer*

As on the date of this Red Herring Prospectus, our Promoters, together with members of the Promoter Group, hold an aggregate of 47.80% of the issued and outstanding equity share capital of our Company. Post listing, our Promoters will continue to exercise significant influence over us through their shareholding. In accordance with our Articles of Association and applicable laws and regulations, our Promoters will have the ability to exercise, directly or indirectly, a significant influence over our business. For further details, please see "*Description of the Equity Shares and Main Terms of Articles of Association*" on page 542 of this Red Herring Prospectus. Further, one of our Promoters and Managing Director, Kayum Dhanani has executed a binding share transfer agreement, pursuant to which, PPL and AAJVIT, at their discretion, may transfer between zero to 600,000 Equity Shares to him, thereby further increasing his shareholding and the shareholding of our Promoters in our Company. The number of Equity Shares to be transferred shall be within the aforesaid range and shall be determined after the filing of the Red Herring Prospectus with the RoC, and such transfer of Equity Shares shall be completed post the Bid/Offer Closing Date, but prior to filing of the Prospectus with the RoC. For further details, please see "*History and Certain Corporate Matters – Summary of Key Agreements and Shareholders' Agreements – Shareholders' Agreements with our Company – Binding share transfer agreement dated August 14, 2017 between Kayum Dhanani, PPL and AAJVIT, as amended by the first amendment to the binding share transfer agreement dated February 19, 2018 executed among Kayum Dhanani, PPL and AAJVIT*" on page 236.

65. *Our Company has in the past entered into related party transactions and may continue to do so in the future.*

We have entered into transactions with several related parties, including our Promoters, Group Entities and Subsidiaries in recent Fiscals. Furthermore, it is likely that we will enter into related party transactions in the future.

There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. The transactions we have entered into and any future transactions with our related parties have involved or could potentially involve conflicts of interest. For more information regarding our related party transactions, please see “*Special Purpose Restated Standalone Financial Information – Note 42*” and “*Restated Consolidated Financial Information – Note 43*” on page 423 and 348 of this Red Herring Prospectus.

66. *The average cost of acquisition of Equity Shares held by our Promoters and the Selling Shareholders may be less than the Offer Price.*

The average cost of acquisition of Equity Shares held by our Promoters, SHL, Kayum Dhanani, Raof Dhanani, Suchitra Dhanani and Sayaji Housekeeping Services Limited (also a Selling Shareholder) is ₹0.00, ₹0.00, ₹0.00, ₹1.67 and ₹5.00, respectively. The average cost of acquisition of Equity Shares held by Azhar Dhanani, Sadiya Dhanani, Sanya Dhanani, TPL, AAJVIT and MPL is ₹5.00, ₹5.00, ₹5.00, ₹167.27, ₹216.32 and ₹592.00, respectively. Since the average cost of acquisition by our Promoters and the Selling Shareholders may be lesser than the Offer Price, investors who purchase the Equity Shares may do so at a cost that is higher than the average cost of acquisition of the Equity Shares of our Promoters and/or the Selling Shareholders (as applicable).

67. *The determination of the Offer Price is based on various factors and assumptions. The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchanges. Further, the current market price of some securities listed pursuant to initial public offerings managed by the BRLMs in the past is below their respective issue prices.*

The Offer Price of the Equity Shares will be determined by our Company and TPL in consultation with the BRLMs through the Book Building Process. The Offer Price will be based on numerous factors, including those described under “*Basis for Offer Price*” on page 139, and may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchanges. The price of our Equity Shares upon listing on the Stock Exchanges will be determined by the market and may be influenced by many factors outside of our control. For further details, see “*Risk Factors – The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares. The trading volume and market price of the Equity Shares may be volatile following the Offer.*” on page 78.

Further, the current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLMs is below their respective issue prices. For further details, see “*Other Regulatory and Statutory Disclosures – Price information of past issues handled by the BRLMs*” and “*Other Regulatory and Statutory Disclosures – Track record of past issues handled by the BRLMs*” on pages 504 and 509, respectively.”

68. *Certain of our Directors and Key Management Personnel hold Equity Shares in our Company and are therefore interested in our Company’s performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Directors (including our Promoters) and Key Management Personnel are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding or the shareholding of their relatives in our Company and to the extent of remuneration received by relatives of the Directors in the employment of the Company. For further details, see “*Our Management – Shareholding of Key Management Personnel*” on page 256 and “*Capital Structure – Details of Equity Shares held by our Directors and Key Management Personnel in our Company*” on page 118 and “*Our Management – Interest of Directors*” on page 247 of this Red Herring Prospectus.

69. *This Red Herring Prospectus contains information from an industry report which we have commissioned from Technopak.*

This Red Herring Prospectus in the sections “*Industry Overview*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 161, 196 and 436, respectively of this Red Herring Prospectus, includes information that is derived from an industry report titled “*Indian Food Services Market*” dated February 19, 2021 prepared by Technopak (the “**Technopak Report**”), a research house, pursuant to its engagement by the Company. We commissioned the Technopak Report for the purpose of confirming our

understanding of the Indian food services industry for which Technopak is in the process of being paid by the Company pursuant to its engagement letter dated January 12, 2021. The Technopak Report was submitted on February 19, 2021. We have no direct or indirect association with Technopak other than as a consequence of this engagement. Neither we, nor any of the BRLMs, our Directors, our Promoters, nor any other person connected with the Offer has verified the information in the Technopak Report. Technopak has advised that while it has taken due care and caution in preparing the commissioned report, which is based on information obtained from sources that it considers reliable, it does not guarantee the accuracy, adequacy or completeness of the such information and disclaims responsibility for any errors or omissions in the information or for the results obtained from the use of such information. The Technopak Report also highlights certain industry and market data, which may be subject to assumptions. Methodologies and assumptions vary widely among different industry sources. Further, such assumptions may change based on various factors. We cannot assure you that Technopak's assumptions are correct or will not change and, accordingly, our position in the market may differ from that presented in this Red Herring Prospectus. Further, the Technopak Report is not a recommendation to invest or disinvest in the Equity Shares. Prospective investors are advised not to unduly rely on the Technopak Report or extracts thereof as included in this Red Herring Prospectus, when making their investment decisions.

70. Our Company will not receive the entire proceeds from the Offer. Some of our Promoters and Promoter Group members are selling shares in the Offer and will receive proceeds as part of the Offer for Sale.

The Offer includes an offer for sale of up to 5,457,470 Equity Shares by the Selling Shareholders, which includes one of our corporate Promoters and members of our Promoter Group. The proceeds from the Offer will be paid to the Selling Shareholders, in proportion of the respective portion of their Offered Shares, and we will not receive any such proceeds. Our Promoter and our Promoter Group members being part of the Selling Shareholders will receive such proceeds from the Offer for Sale. For further details, see “*Objects of the Offer*” and “*Capital Structure*” on pages 125 and 103, respectively.

EXTERNAL RISK FACTORS

Risks Relating to India

71. Changing laws, rules and regulations and legal uncertainties may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or regulatory environment, or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations in India, applicable to us and our business. Any significant changes in relevant food safety regulations, laws or regulatory environment might materially impact the Company's operations and financials. Additionally, the regulatory environment in which we operate is subject to change both in the form of gradual evolution over time and also in form of significant reforms from time to time. For instance, a notification issued by the Government of India in 2016 withdrawing the legal tender status of currency notes of ₹500 and ₹1,000, may have had and may continue to have an adverse effect on certain sectors of the Indian economy. Further, the General Anti Avoidance Rules (“GAAR”) are effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefits among other consequences. Due to limited guidance on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us. Any such change in the future may require us to commit significant management resources and may require significant changes to our business practices and could have a material adverse effect on our business, financial condition, results of operations and prospects.

In addition, there have been various changes and proposed changes recently in the laws and regulations relating to data protection in India. Any such changes could require us to redesign our information technology systems or redesign our digital processes to comply with such laws and regulations. We cannot assure you that we will be able to redesign such systems or processes in a cost-effective manner, or at all. Since our business depends heavily on the ability of our information technology systems and digital processes, any change in the laws or regulations relating to data protection or information technology in India could have a material adverse effect on our business, financial condition, results of operations and prospects.

The Government has also announced the union budget for the Fiscal 2022. It is at present unclear whether any tax laws or regulations impacting our products will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition and results of operations.

The governmental and regulatory bodies in India and in other jurisdictions may notify other new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition and results of operations.

72. *The GoI has implemented a new national tax regime by imposing GST. Any future increases or adverse amendments to GST may adversely affect the overall tax efficiency of our Company.*

The GoI has enacted the Central Goods and Services Tax Act, 2017 to lay a framework for a comprehensive national goods and services tax (“GST”) regime that has combined taxes and levies by the Central and State Governments into a unified rate structure. The said legislation was notified and made effective from July 1, 2017. As per the GST rates notified then, our restaurants were taxed at a rate of 18% for food items with input tax credit. Subsequently, in November 2017, the GST rate was revised to 5% without input tax credit. Any future increases or adverse amendments to GST may adversely affect the overall tax efficiency of our Company and may result in significant additional taxes becoming payable.

73. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India and abroad.*

Our Company is incorporated in, and majority of our operations are located in, India, though we have recently expanded into overseas jurisdictions. As a result, we are highly dependent on prevailing economic conditions in India and abroad and our results of operations are significantly affected by factors influencing the Indian and world economy. Factors that may adversely affect the economy, particularly the Indian economy, and hence our results of operations, may include:

- any increase in interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing, resulting in an adverse impact on economic conditions and scarcity of financing for our expansions;
- prevailing income conditions among consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on stock exchanges;
- changes in tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters;
- outbreak of an epidemic or a pandemic;
- prevailing regional or global economic conditions, including in India’s principal export markets;
- any downgrading of India’s debt rating by a domestic or international rating agency;

- instability in financial markets; and
- other significant regulatory or economic developments in or affecting the food and services sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth, including as consequence of the COVID-19 pandemic, may have an adverse effect on our customers' revenues, savings and could in turn negatively affect their demand for our products. Any slowdown or perceived slowdown in the economy, particularly the Indian economy, or in specific sectors of the economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

74. We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could adversely affect our business.

The Competition Act regulates practices that have or are likely to have an appreciable adverse effect on competition in India. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition is void and attracts substantial penalties.

Further, any agreement among competitors which, directly or indirectly, involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of subscribers in the relevant market is presumed to have an appreciable adverse effect in the relevant market in India and shall be void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the CCI. Additionally, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure in regard to the Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among other things, prohibit all agreements and transactions which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. We are not currently party to any outstanding proceedings, nor have we received notice in relation to non-compliance with the Competition Act or the agreements entered into by us. However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, financial condition, results of operations and prospects.

75. Investors may have difficulty enforcing foreign judgements against our Company or its management.

Our Company is a limited liability company incorporated under the laws of India. All of our Company's Directors and executive officers are residents of India and a substantial portion of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons outside India, or to enforce judgements obtained against such parties outside India.

Recognition and enforcement of foreign judgements is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC") on a statutory basis. Section 13 of the CPC provides that foreign judgements shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgement has not been pronounced by a court of competent jurisdiction; (ii) where the judgement has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgement is founded on an incorrect view of international law or a refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgement was obtained were opposed to natural justice; (v) where the judgement has been obtained by fraud; and (vi) where the judgement sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India

shall, upon the production of any document purporting to be a certified copy of a foreign judgement, presume that the judgement was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, including the United Kingdom, UAE, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the CPC. The CPC only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favor such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action was brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgement if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgements that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgement in India is required to obtain approval from the RBI under FEMA, to execute such a judgement or to repatriate any amount recovered.

76. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and wide-spread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

77. *Significant differences exist between Ind AS and other reporting standards, such as U.S. GAAP and IFRS, which may be material to investors' assessments of our financial condition.*

As required under the SEBI ICDR Regulations, the Company has prepared its Restated Consolidated Financial Information (for the preceding three Fiscals and the eight month period ended on November 30, 2020) included in this Red Herring Prospectus in accordance with the requirements of Section 26 of Part I of Chapter III of the Companies Act, 2013, the SEBI ICDR Regulations, 2018, as amended, and the Guidance Note on Reports in Company Prospectuses (Revised 2019) issued by the ICAI, as amended. Further, on March 30, 2019, the Ministry of Corporate Affairs notified Ind AS 116, which came into effect on April 1, 2019. For further details, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations – Changes in Accounting Policies in the last three Financial Years*" on page 448. Accordingly, whilst our Restated Consolidated Financial Information has been prepared in accordance with Ind AS 116, the financial statements of our Subsidiaries for Fiscals 2018 and 2019, which have been uploaded to our website in accordance with the SEBI ICDR Regulations, have not been prepared in accordance with Ind AS 116. For Fiscal 2020 the financial statements of our Subsidiaries been prepared in accordance with Ind AS 116. In assessing our Company's financial position on a consolidated basis, reliance should not be placed on the financial statements of our Subsidiaries as uploaded on our website for the purposes of making an investment decision.

Further, no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to U.S. GAAP or IFRS or any other principles or to base it on any other standards. Ind AS differs from accounting principles and Auditing Standards with which prospective investors may be familiar in other countries, including U.S. GAAP or IFRS. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide

meaningful information is dependent on your familiarity with Ind AS, the Companies Act, and the regulations framed thereunder. Any reliance by persons not familiar with Ind AS or these laws and regulations, on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

78. *Public companies in India, including our Company, are required to compute Income Tax under the Income Computation and Disclosure Standards (the "ICDS"). The transition to ICDS in India is very recent and we may be negatively affected by such transition.*

The Ministry of Finance had issued a notification dated September 29, 2016 notifying ICDS which creates a new framework for the computation of taxable income. The ICDS shall apply from assessment year 2017-18 onwards. This will have impact on computation of taxable income for Financial Year 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Ind AS. For example, where ICDS-based calculations of taxable income differ from Indian GAAP or Ind AS-based concepts, the ICDS-based calculations have the effect of requiring taxable income to be recognised earlier, increasing overall levels of taxation or both. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operation and financial condition.

79. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect financial markets and our business.*

Terrorism or war may negatively affect the Indian markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, making travel and other services more difficult and ultimately adversely affecting our business. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares. Any of the above events could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India.

Risks Relating to Equity Shares

80. *The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares. The trading volume and market price of the Equity Shares may be volatile following the Offer.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the stock exchanges may not develop or be sustained after the Offer. Moreover, the Offer Price will be determined through the Book-Building Process and may not be indicative of the price of our Equity Shares at the time of commencement of trading of our Equity Shares or at any time thereafter. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Further, the market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments; announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

81. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months were not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which were not subject to STT. The Finance Act, 2018, has now levied taxes on such long term capital gains exceeding ₹100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of equity shares.

82. *Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the provisions of FEMA including pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

83. *Any future issuance of Equity Shares may dilute your shareholding and sales of the Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future equity issuances by our Company, including a primary offering, may lead to the dilution of investors' shareholdings in the Company. Any future issuances of Equity Shares (including under the ESOP 2015) or the disposal of Equity Shares by our Promoters or creation or invocation of pledge over Kayum Dhanani's Equity Shares or any of our other principal shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber the Equity Shares. Any future issuances could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

84. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

85. *The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.*

The Offer Price of the Equity Shares will be determined by our Company and TPL in consultation with the BRLMs, and through the Book Building Process. This price will be based on numerous factors, as described under "*Basis for Offer Price*" on page 139 of this Red Herring Prospectus and may not be indicative of the market price for the Equity Shares after the Offer. The market price of the Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price.

86. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by our Company. However, if the laws of the jurisdiction the investors are located in do not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If our Company elects not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

87. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail

Individual Investors and Eligible Employees can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

The fund requirements and the proposed deployment of funds set out above for expansion and opening of new restaurants by the Company, prepayment or repayment of all or a portion of certain outstanding borrowings obtained by our Company on a consolidated basis and general corporate purposes from the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency, and are based on current and valid quotations received from vendors and suppliers, which are subject to change in the near future. Further, these are based on current conditions and are subject to revisions as a consequence of changes in external circumstances or costs, or our financial condition, business or strategy. For further details of factors that may affect these estimates, see section “Risk Factors – Our funding

requirements and the proposed deployment of Net Proceeds are not appraised by any independent agency.” on page 71.

Given the dynamic nature of our business, we may have to revise our funding requirements and deployment of funds on account of a variety of factors such as our financial condition, business and strategy, including external factors such as market conditions, competitive environment, interest or exchange rate fluctuations and finance charges, which may not be within the control of the management of our Company. This may entail rescheduling and revising the schedule of the planned expenditure and funding requirements and increasing or decreasing the expenditure for a particular purpose from the planned expenditure at the discretion of the management of our Company in accordance with applicable law. In the event that the funds required to achieve an Object are higher than what is contemplated above, such additional funds will be raised by the Company or funded from internal accruals. If the actual utilisation is lower than the proposed deployment set out above, such excess will be used for general corporate purposes, subject to applicable law. In case of a shortfall in raising requisite capital from the Net Proceeds towards meeting the Objects, we may explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in this Offer. If surplus funds are unavailable, the required financing will be through our internal accruals and / or debt, as required subject to compliance with applicable law. Further, our Company may, during the period of scheduled deployment, consider setting up additional restaurants over and above the number of restaurants proposed to be set-up from the proposed utilisation of the Net Proceeds. The requirement of funds for setting-up such additional restaurants will be met by way of internal accruals or by seeking additional debt from existing and future lenders or such other means as available to our Company. Further, our Company may decide to accelerate the estimated expansion and opening of new restaurants by the Company ahead of the schedule specified above. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the Objects within the Fiscals as contemplated above, our Company will deploy the unutilised portion of such Net Proceeds in the succeeding Fiscal for such purpose.

Details of the Objects

1. Capital expenditure for expansion and opening of new restaurants by the Company

We propose to utilise a portion of the Net Proceeds towards capital expenditure for expansion and opening of new restaurants by the Company. The details of such expansion plans and the estimated costs proposed to be funded from the Net Proceeds are enumerated below.

We plan to leverage the brand equity of our brand, “Barbeque Nation”, to expand within our existing markets and explore new markets with the intent to expand our footprint and further increase our market share. As per our growth plans, we plan to expand by setting-up new Barbeque Nation restaurants in metros, Tier I and Tier II cities in India in order to meet the growing demand of casual dining restaurants amongst consumers within these markets.

We intend to utilise a portion of Net Proceeds aggregating to ₹546.19 million for setting up 26 new Barbeque Nation Restaurants during Fiscal 2022 and Fiscal 2023. The premises for the proposed new restaurants are expected to be leased.

We propose to open the following restaurants in Fiscal 2022 and Fiscal 2023 from the Net Proceeds.

Year	Number of Barbeque Nation Restaurants to be opened using the Net Proceeds
Fiscal 2022	20
Fiscal 2023	6

The cost of setting up new Barbeque Nation restaurants generally comprises set-up costs such as:

- (i). cost of civil interior, electrical and other related matters;
- (ii). cost of air conditioning, ventilation and other related matters;

- (iii). cost of furniture and fixtures;
- (iv). cost of kitchen equipment and other related costs;
- (v). cost of diesel generators and cables;
- (vi). information technology costs; and
- (vii). cost of kitchen accessories and other related costs.

Methodology for computation of estimated costs

The size of our Barbeque Nation restaurants varies across regions and is dependent on various factors such as availability of suitable locations, addressable market, lease rentals and competition within a given region or across regions. The average size of a Barbeque Nation restaurant i) in a metro city, ranges from about 5,000 square feet to 5,500 square feet; ii) in a Tier I city, ranges from 4,500 square feet to 5,000 square feet; and iii) in a Tier II city, ranges from about 3,500 square feet to 4,000 square feet. Considering our business plan for setting up new Barbeque Nation restaurants across regions, we have considered an average restaurant size of 4000 square feet for arriving at the estimated costs for setting up Barbeque Nation restaurants across regions and metro, Tier I and Tier II cities.

Our estimates are based on (i) valid and existing quotations received from our empanelled pan-India contractors or from vendors from whom we have purchased similar items for our restaurants in the past; and (ii) our internal estimates for specifications and item requirements based on our prior experience of setting up similar restaurants in the past.

The table below sets forth the total estimated cost for setting-up of a new Barbeque Nation restaurant:

(in ₹ million)

Particulars	Amount
Cost of civil, interiors, electrical and other related costs	9.06
Cost of air-condition, ventilation and other related costs	3.67

2. Prepayment or repayment of all or a portion of certain outstanding borrowings obtained by our Company on a consolidated basis

Our Company and our Subsidiary, Barbeque Nation (MENA) Holding Limited, have entered into financing arrangements with banks and financial institutions including borrowings in the form of terms loans, and fund based and non-fund based working capital facilities. For details of these financing arrangements including indicative terms and conditions and outstanding borrowings as of January 31, 2021, see “*Financial Indebtedness*” on page 433.

Our Company intends to utilize ₹750 million of the Net Proceeds towards repayment or prepayment of all or a portion of the principal amount on certain loans availed by our Company and our Subsidiary, Barbeque Nation (MENA) Holding Limited, and the accrued interest thereon. Pursuant to the terms of the borrowing arrangements, prepayment of certain indebtedness may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will also be funded out of the Net Proceeds. Given the nature of the borrowings and the terms of repayment or prepayment, the aggregate outstanding amounts under the borrowings may vary from time to time and our Company and our Subsidiary, Barbeque Nation (MENA) Holding Limited, may, in accordance with the relevant repayment schedule, repay or refinance some of their existing borrowings prior to Allotment. Accordingly, our Company may utilise the Net Proceeds for repayment/prepayment of any such refinanced facilities (including any prepayment fees or penalties thereon) or any additional facilities obtained by our Company and our Subsidiary, Barbeque Nation (MENA) Holding Limited. However, the aggregate amount to be utilised from the Net Proceeds towards prepayment or repayment of borrowings (including refinanced or additional facilities availed, if any), in part or full, will not exceed 750 million. Given the nature of these borrowings and the terms of repayment/pre-payment, the aggregate outstanding borrowing amounts may vary from time to time.

The selection of borrowings proposed to be prepaid or repaid amongst our borrowing arrangements availed will be based on various factors, including: (i) cost of the borrowing, including applicable interest rates; (ii) any conditions attached to the borrowings restricting our ability to prepay/ repay the borrowings and time taken to fulfil, or obtain waivers for fulfilment of such conditions; (iii) receipt of consents for prepayment from the respective lenders; (iv) terms and conditions of such consents and waivers; (v) levy of any prepayment penalties and the quantum thereof; (vi) provisions of any laws, rules and regulations governing such borrowings; and (vii) other commercial considerations including, among others, the amount of the loan outstanding and the remaining tenor of the loan.

We believe that such repayment or prepayment will help reduce our outstanding indebtedness and our debt-equity ratio on a consolidated basis and enable utilization of the internal accruals for further investment towards business growth and expansion. In addition, we believe that this will improve our ability to raise further resources in the future to fund potential business development opportunities.

To the extent the Net Proceeds of the Offer are utilized to repay/pre-pay any of the loans availed by our Subsidiary, Barbeque Nation (MENA) Holding Limited, we will, subject to compliance with Indian foreign exchange regulations, provide a portion of the Net Proceeds of the Offer to Barbeque Nation (MENA) Holding Limited in the form of debt at an interest rate of 0.25 % higher than the lending rate charged to the Company by banks and financial institutions. 3. General Corporate Purposes

The Net Proceeds will first be utilised for the Objects as set out above. Subject to this, our Company intends to deploy any balance left out of the Net Proceeds towards general corporate purposes, subject to such utilisation for general corporate purposes not exceeding 25% of the gross proceeds of the Fresh Issue, in compliance with Regulation 7(2) of the SEBI ICDR Regulations. The allocation or quantum of utilisation of funds towards the specific purposes described above will be determined by our Board, based on our business requirements and other relevant considerations, from time to time. Our management, in accordance with the policies of the Board, shall have the flexibility in utilising surplus amounts, if any.

The general corporate purposes for which our Company proposes to utilise Net Proceeds include brand building and marketing efforts, acquisition of fixed assets, meeting expenses incurred towards any strategic initiatives, partnerships, tie-ups, joint ventures or acquisitions, investment in our Subsidiaries, long term or short term working capital requirements, meeting exigencies and expenses incurred by our Company in the ordinary course of business. In addition to the above, our Company may utilise the Net Proceeds towards other expenditure (in the ordinary course of business) considered expedient and as approved periodically by the Board or a duly constituted committee thereof, subject to compliance with necessary provisions of the Companies Act. Our fund requirements and deployment of the Net Proceeds with regard to the Objects are based on internal management estimates in view of the current condition of our business and have not been appraised by any bank or financial institution or other independent agency. In case of variations in the actual utilisation of funds earmarked for the purposes set forth above, increased fund requirements may be financed through our internal accruals and/or incremental debt from existing and future lenders, as required. If the actual utilisation towards any of the Objects is lower than the proposed deployment such balance will be used for future growth opportunities including funding existing Objects, if required, and general corporate purposes, to the extent that the total amount to be utilised towards the general corporate purposes will not exceed 25% of the gross proceeds of the Fresh Issue in compliance with the SEBI ICDR Regulations.

In the event that estimated utilisation out of the Net Proceeds towards the Objects in a Fiscal is not completely met, due to any reason, the same shall be utilised (in part or full) in the subsequent period towards the Objects, as may be determined by our Company, in accordance with applicable law.

Indian Economy: Macroeconomic Overview

India’s GDP Growth

India is world’s 6th largest economy and expected to be in top 3 global economies by FY 2050: Currently, India ranks 6th in the world in terms of nominal GDP and is the 3rd largest economy in the world in PPP terms. In FY 2019, India was about 1/8th of the size of the US economy and 1/5th of the size of Chinese economy in terms of nominal GDP. It is estimated that India will be in top 3 global economies by CY 2050 in terms of nominal GDP.

India expected to fare better than developed economies and recover to a high growth path in coming years

India's real gross domestic product (“GDP”) has sustained an average growth between 6% and 7% since FY 1991. India has become the fastest-growing G20 economy since FY 2015, with annual growth rate hovering around 7%. India’s economy grew at ~7% in FY 2019. The real growth rate declined to 4% in FY 2020 and is estimated to decline to -10.3% in FY 2021 due to the outbreak of COVID-19 pandemic which led to the imposition of lockdowns towards the last quarter of FY 2020 and a major part of the first quarter of FY 2021 causing a contraction in the economy.

The impact of COVID-19 has caused several large economies to shrink. It is being estimated that India’s GDP is expected to resume its pre-COVID growth momentum by FY22.

*2012- GDP Spike in Real growth rate due to change of base from 2004-05 to 2011-12. Hence excluded from decadal growth rate as well

Since FY 2005, Indian economy’s growth rate has been twice as that of the world economy and it is expected to sustain this growth momentum in the long term. In the wake of COVID-19, India's nominal GDP is expected to contract by approximately 5.3% in FY2021 but expected to bounce back and reach US\$ 3.9 Tn by FY 2025.

COVID-19 had a massive impact on Indian economy in FY 2021, with GDP in Q1 FY 2021 contracting 24% as compared to same period last year. The contraction in Q1 FY 2021 was not uniform; it varied from state to state and sector to sector. Aviation sector was worst hit followed by tourism, realty etc. But as government eased lockdown restrictions and economy started opening, things started getting better by end of Q1 2021. Road ahead, for the above-mentioned sectors and Indian economy still stands promising and India is expected to regain its Pre-COVID growth momentum by FY 2022.

Domestic consumption share makes India uniquely positioned

India is advantaged in that its domestic consumption share (measured as Private Final Consumption Expenditure – PFCE) in its GDP was ~59% in FY 2019. In comparison China's domestic consumption share to its GDP was ~39% in the same year. High share of private consumption in the GDP insulates India from the economic shocks in other countries. In absolute terms it increased from US\$ 51 Bn to US\$ 1,635 Bn (FY 1991 to FY 2020).

However, with the outbreak of COVID-19, there has been a depression in demand with an estimated loss of revenue worth US\$ 205 Bn in merchandise retail in FY 2021. With the economic environment becoming uncertain, not only are consumers more thoughtful about their consumption but also more conscious of their savings and investments. The consumption priorities are also driven by the health and safety concerns and the other behavioural changes adopted because of the pandemic.

India's Household Final Consumption Expenditure (US\$ Bn)

Source: RBI Data; Year indicates FY, 1 US\$ = INR 75

The projections have been arrived at by considering the growth trends for the past five years.

The annual growth rate for FY 1991-2005 was ~13% and this increased to ~14% for FY 2005-2019. While in the short term, consumption will suffer a setback, it is expected to reach to ~US\$ 2.22 Tn by FY 2025.

The drop in consumption is mainly because of consumer sentiment being weak both due to health and economic reasons. Structurally, all the other variables remain the same, the quantum of consumption will not take long to revive. However, the loss suffered during COVID-19 manifest itself as loss of momentum of growth. The loss in momentum and current fall will recover bringing the economy back to FY2019 levels in FY2022.

In FY 2019, PFCE accounted for ~59% of GDP. This is much higher than that in China (~39%) and comparable to that of the US (~68%).

Top 20% of Indian households account for ~50% of the total household consumption

Household consumption in India has a skew towards the urban population. SEC (Socio Economic Classification) A, B and C1 which accounts for 45.5% of the urban and a little over 12.3% of the rural Indian population is commonly referred to as the “Top 20 %” (by income of Indian households).

Source: RBI Data, Economic Survey, World Bank, EIU, IMF

The “Top 20%” of Indian households account for 40-50% of total household consumption expenditure and 44% of household income. The next 40% of the households account for 40% of the overall household expenditure while the bottom 40% (largely comprising of SEC E) make up 10%- 20% of household consumption. The per capita consumption of SEC A, B & C1 Indian households is twice the national average.

Key growth drivers: Favourable demographics, urbanization and policy reforms

Demographic Profile

Young population

India has one of the youngest demographics as compared to other leading economies. Demographics can act as a catalyst to change the pace & pattern of the economic growth. India’s median age will continue to remain under 30 years till 2030. India’s sizeable young population augurs well on two counts. Firstly, it is contributing to a declining dependence ratio (the ratio of the dependent population size to the working-age population size).

Young consumers in India are well travelled, brand conscious, well networked and have higher discretionary spending power

Median Age: Key Emerging & Developed Economies (2020 estimated)

Country	India	China	USA	Singapore	Russia	Canada	UK
Median Age (Yrs)	28.7	38.4	38.5	35.6	40.3	41.8	40.6

Source: World Population Review, Technopak Analysis

The ratio of the number of elderly people and children to the working-age (aged 15-64 years) population declined from 64% in FY 2000 to 50% in FY 2019. This trend not only supports rising income levels, but it also leads to higher share of discretionary expenditure.

Secondly, substantial rise in the working age population (from 36% in FY 2000 to 50% in FY 2019) augurs well for growth momentum of the Indian economy going forward, as it will lead to rising income levels. Moreover, younger population is naturally pre-disposed to adopting new trends and exploration given their education profile and their exposure to media and technology. This backdrop manifests as an opportunity for domestic consumption in the form of branded behavior, organized retail and product designs.

Increasing Urbanization

India is second largest urban community in the world after China, with an urban population of about 472 Mn (FY 2019). Though, India fares lower than global average in terms of urban population's share in total population with only 34.5% (FY 2019) of India's population classified as urban compared to global average of 54%. It is the pace of India's urbanization that is a key trend to note for implication on India's economic growth. Smart city initiative by the Government to create new 'urban clusters' will further expedite urban development/ urbanization in India. India's urbanization pace will envelope two key trends that will have implications on India's domestic consumption narrative: growing middle class and nuclearization. It is estimated that by FY 2027, 37% of India's population will be living in urban centres and will contribute to 70 – 75% of India's GDP. The urbanization trend is expected to continue and by FY 2050, India will have half of total population that will stay in urban areas and will account for well over 80% of GDP. This urbanization pace is rapidly creating a segment pool of Indians that display migrant tendencies and are without past baggage of habits. Higher income and lesser time will fuel growth of eating-out and ordering-in.

Increasing Urbanization

Source: World Bank, Year Indicates CY

Growing Middle Class

The number of households with annual earnings between US\$ 5,000-10,000 have grown at a CAGR of 12% during the period of FY 2012-2018 and is expected to grow at the same CAGR of 12%, to reach 153 Mn. by FY 2020. The households with annual earnings between US\$ 10,000-50,000 have also grown at a CAGR of 25% between FY 2012-2018.

Increase in number of households with annual earnings of US\$ 10,000 to US\$ 50,000 will lead to increase in discretionary spending which is likely to create a structural trend of premiumisation, thereby leading to higher expenditure on food and beverages, apparel & accessories, luxury products, consumer durables and across other discretionary categories.

Nuclearisation

The growth in the number of households exceeds increase in population growth indicating increasing nuclearization trend in India. According to census data 2011, 74% of urban households have five or less members as compared to 65% in 2001. It is expected that fall in the average household size coupled with rising disposable income will lead to more number of urban household units that are pre-disposed to discretionary expenditure viz. jewellery, fashion, packaged food, food services etc.

Women Workforce

Several factors, including better health care and greater media focus are allowing women in India, in both urban and rural areas, to exercise greater influence on their families and society as a whole. The most important factor, however, is educational opportunity. Between 2005 and 2015, enrolment of girls in secondary education increased from 45.3% to 81% and in FY 2019 was higher than enrolment of boys. Higher education has also seen an increase in women enrolment, with almost 20% of women pursuing higher education studies compared to 22% of men.

These changes are expected to have a broad impact on societal factors, including workforce demographics and economic independence for women. The share of women workforce in the services sector has increased from 16.8% in 2010 to 24.2% in CY 2018. The overall share of working women increased from approximately 14% in 2000 to approximately 17% in 2010 and to approximately 24% in 2018. This increase of women in the workforce has seen a shift of patterns in terms of household activity, including a downward trend in home cooked meals and an increase in demand for “out of home” meals from households with working couples.

Food Services Spend

Food services is a key segment in the Indian economy, which accounted for approximately US\$ 56.5 billion in FY 2020, of which approximately US\$ 22.8 billion comes from the organized market (chain and organized standalone outlets). Changing consumer dynamics paired with increasing market proliferation of brands in India are expected to continue to boost the food services sector's growth.

The share of food services in Indian GDP is expected to increase to 2.2% by FY 2025 from 2.1% in FY 2020 on account of its growth at faster pace compared to GDP growth. Also, growth of food services market is expected to outpace its growth till now i.e., from 8.1% (FY15 to FY20) to 9% (FY20- FY25). It is rational to anticipate that the food services market will see growth in tandem with this economic growth, and there is every indication that such expansion will be substantial. Key implications of this trend are summarized below:

- Pre COVID, Indian consumers had been dining out more frequently and younger Indians have shed the biases of their elders against eating-out. With over one lakh outlets in organized segment (20 or more seats) in India as of FY 2019, there is plenty of room for growth in the industry.
- With higher disposable income with younger population who are well travelled, brand conscious and well connected through social media and along with rise in presence of branded retail chains; consumers in smaller cities i.e. Tier I & Tier II cities have been spending more on eating out and this trend is expected to continue post COVID. National and international chains are endorsing Tier I and Tier II cities as engines for growth and expansion.
- It is estimated that Indians spend 8 to 10% of their food expenditures outside the home in restaurants, cafeterias, and other food establishments. This trend is expected to strengthen in future. However, due to COVID this trend has undergone some changes. A lot of people now prefer Delivery and takeaway in comparison to dine-in. Considering this as an isolated occurrence, it is expected people will again start to dine out post COVID vaccination drive.
- Post COVID, customers have started giving immense importance to safety and hygiene. Hence, the restaurants will have to provide their services keeping both these factors in mind.
- The trend of delivery and takeaway has risen in the past few months due to COVID, hence most formats of restaurants whether it is QSR, CDR or cafe, have started these services apart from dine-in to remain competitive in the food services market.

Food Services Market in India

- India's food services market has come a long way from early 1980's when the number of organized brands were countable, and the market otherwise was dominated by un-organized players. The revolution in this sector began in FY 1996 with the opening up of restaurants by McDonald's, Pizza Hut, Domino's followed by entry of players like Subway and Barbeque Nation post 2000 and expansion of legendary home-grown players like Haldirams and Moti Mahal.
- The food services market has been growing since then with the international and domestic brands making substantial investments in building the back end consisting of suppliers and logistics segment. Since then, the market has witnessed many changes with respect to rising disposable income, availability of quality labour force, use of technology, which are collectively changing the face of the sector by enabling players to sustain efficiency at both front and back end.

Evolution of Food Services Market

	Phase I (1991-2001)	Phase II (2001-2010)	Phase III (2010 Onwards)
Geographical	High focus on Metros & Mini-Metros	Initial entry into Tier II Cities	Greater presence in newer locations
Operating Model	Ownership & Franchisee Model	More Franchisee Models	Concept of JVs
Investment Needs	Family/Self-funded	Partnerships, JVs and start of PE funding	Brand expansion driven by IPO, PE and others
Strategic Focus	Sustainable revenue growth	New opportunity areas with focus on CRM	Format diversification, birth of food technology etc.
Industry Segmentation	Indian & International Brands	Emergence of defined formats e.g. CDR, QSR, FDR, Café etc.	Further sharpening of formats based on consumer needs

Source: Technopak Analysis

- Phase 1:** Faster development (infrastructure and business opportunities) in metros and mini-metros like Delhi, Mumbai & Bengaluru rapidly increased the number of organized restaurants in the 1990s. With the help of their first mover advantage, players looked to maximize revenue. No clear segmentation based on offerings was witnessed. Most of the Indian brands were running Multi Cuisine Restaurants and were offering different products under the same roof. However, with the entry of International brands like McDonald's, Pizza Hut, KFC and Domino's in 1995-96, segmentation based on offerings and service started in India.
- Phase 2:** Demand for food joints in Tier II cities in the 2000s was powered by increasing urbanization, rising personal disposable incomes and more economic activities. A huge untapped population coupled with changing consumer lifestyles gave players an incentive to expand into Tier II cities. Also, a clear segmentation of formats started to emerge based on the offerings and service style such as QSR, CDR, FDR etc.
- Phase 3:** The current decade is overseeing a shift to a larger organized sector. Customer retention, a higher range and depth of offerings are new goals among organized players. This phase witnessed a sharper segmentation within the different formats based on consumer needs and offerings by the brands e.g. within QSRs there is a clear differentiation between pizza chains and burger chains, within CDRs a further segmentation was observed as premium and value based CDRs based on attributes like ambiance, service style and cuisines etc.. This phase has also seen the birth of food technology which is estimated to be growing at almost 15-20% per year.

Food Services Market Structure

The food services market can be broken down into three broad segments: unorganized, organized standalone and chain. The three segments can be divided further as shown below.

Structure of Indian Food Services Market

Key Segments in the Food Services Market	Average Spend per Person* (₹)
Unorganized Segment – It includes roadside eateries and dhabas which have been the most common eating out option.	10-100
Restaurant in Hotels - A full-service restaurant with premium interiors, specific cuisine specialty and high standard of service mainly present in premium Hotels. E.g. The Great Kebab Factory, Bukhara etc.	>1000
Organized Segment – Consists of: a) Standalone restaurants across all formats with less than 3 outlets. b) Chain format which has 3 or more outlets across all formats.	
Chain Segment

2. Quick Service Restaurants (QSRs)	Focused on speed of service, affordability and convenience. Strong focus on takeaway & delivery with minimal table service. E.g.: • Haldiram's, McDonald's	75-250
3. Frozen Desserts/Ice-Cream (FD/IC)	Comprises small kiosk formats of ice-cream brands and has now extended the dine-in concept to frozen yogurt brands. E.g.: • Baskin-Robbins, Red Mango etc.	50-150
4. Casual Dining Restaurants (CDRs)	A restaurant serving moderately to high priced food in an ambience oriented towards providing an affordable dining experience, with table service along with some restaurants offering eclectic high quality interiors and high standards of service. The offerings bridge the gap between QSRs and fine dining restaurants. E.g.: • Farzi Cafe, Barbeque Nation, Oh! Calcutta, Sagar Ratna, Moti Mahal Delux etc.	250-1000
5. Fine Dining Restaurants (FDRs)	A full service restaurant with premium interiors, specific cuisine specialty and high standard of service. They offer a unique ambience and an upscale service with the help of highly trained staff. E.g.: • The Great Kebab Factory, Olive Bar, Yautcha etc.	>1000

Half yearly-wise Impact of COVID 19 on Food Services Market in India

Source: Technopak Analysis

- **H2 FY 2020:**

- The impact of COVID 19 on the Food Services Market started in the last month of H2 FY 2020. As of March 2, 2020, there were 5 active cases in India (according to covid19.org).
- Starting March 2020, a lot of people refrained from eating out as frequently as earlier because of fear of COVID 19. While unorganised market was the first one to get impacted because of perceived hygiene issues followed by standalone restaurants etc., organized chain restaurants were less impacted by this change.
- Further, as on March 25, 2020, the nation went on a complete lockdown closing all the restaurants in the country. This impacted the entire food services market including chain restaurants such as CDR, QSR, Café etc.
- The food services market observed a dip of 11% in comparison to pre-COVID levels in H2 FY 2020 due to the above factors.

- **H1 FY 2021:**

- In the beginning of H1 FY 2021, most of the restaurants were closed in the country. As various state governments started easing out the strict lockdown-related restrictions in their respective states, restaurants gradually started opening in April & May 2020 but only delivery was allowed from these restaurants.
- Even though restaurants were open for delivery in the months of May and June 2020, people were conscious about hygiene and safety measures. Initially there were very few who were ordering from restaurants such as chains restaurants. As food delivery aggregators started demonstrating their capabilities on maintenance of high food quality and service standards, superior processes etc.; people gradually started ordering from these Food delivery apps and chain restaurants, and sales started to grow towards end of May and beginning of June 2020.

- Initially, only take-aways and delivery were allowed for most of the eateries, hence casual dining restaurants adopted fast to delivery and takeaway models. Players such as Barbeque Nation etc., started delivery through food aggregators apps. Barbeque Nation started “Barbeque in a box”, “Grill in a box” among other products
 - In some states such as Delhi, U.P, Tamil Nadu, etc., dine-in was also started gradually with limited capacity but the operating hours of restaurants were reduced.
 - Central and State governments had created “Containment zones” for areas having a large number of COVID cases. These containment zones observed a complete lockdown and restaurants in these areas were closed impacting sales in such locations.
 - In this quarter, sales were primarily from chain restaurants doing home delivery & takeaways, cloud kitchens, and from a few dine-in restaurants.
- **H2 FY 2021:**
 - During October 2020, as government official data and commentary indicated that India might have reached the peak of COVID 19 cases, & the food services market started to grow and show healthy growth in sales figures. More cities started opening and the number of containment zones were also reduced as compared to earlier.
 - During the start of H2 FY 2021, nearly all the restaurants started dine-in but with strict rules and regulations on hygiene & social distancing. Chain restaurants such as Pizza Hut, Dominos started contactless dining in their restaurants. Social distancing norms were followed with constant sanitization of the place. Players such as Barbeque nation started sanitising tables in the presence of customers to regain confidence in terms of hygiene and safety.
 - Moreover, during H2 FY 2021, most of the restaurants have opened for dine-in and the restrictions on operating hours of restaurants have also been removed which is expected to provide boost to the sales of the food services industry.
 - 2021 is expected to show a strong sales momentum because of vaccination drive and things are expected to start moving towards the Pre-COVID level in 2021.

The performance of Indian restaurants be it QSR chains, Café, etc., was largely affected by the government lockdown regulations. In some areas, where the cases were fewer, the government allowed restaurants to open as early as April 2020 for delivery while in the other areas, delivery started in May 2020. For example, delivery from QSR restaurants in Delhi started in April 2020, and dine in started in August 2020. However, in Maharashtra delivery and dine-in by food service players started in May and October 2020 respectively. Similarly, dine-in formats started in June 2020 in Andhra Pradesh, Karnataka, and Tamil Nadu. However, in Uttar Pradesh, dine-in formats started only in August 2020.

Owing to the number of active cases and lockdown restrictions, outlets of the same chain restaurants were performing differently in different parts of India. For example, states like Maharashtra and Andhra Pradesh had consistently

recorded the highest and the third-highest number of confirmed cases in India. Consequently, the restaurant industry was most affected in these states and the recovery has also been slower.

Moreover, within the same city, some restaurants were allowed to start services while others had to suspend operations due to containment zones related restrictions.

With no sales happening at the restaurants and closure of restaurants during first few months of lockdown, real estate sector stepped up to support the food services industry by proposing rent waivers for first few months of the lockdown. It was largely observed on a case-to-case basis and rent waivers were as high as 100% for first few months. As economy started opening, and restaurants sales started going up, mall owners and restaurants moved to a revenue-sharing basis in a number of instances.

Moreover, in H2 FY 2021 as cinema halls, entertainment zones etc. are opening, it will drive more traffic to the chain restaurants and other organized players. Also, the festive season in H2 FY 2021, is expected to drive sales of organized players

Impact of COVID 19 on various formats of the Food Services Industry

QSR: - QSR formats, primarily chained, were the first to demonstrate recovery. Home delivery from these formats started as early as April 2020 in several states as most of the QSRs had the option of “Delivery and Takeaway services”. Chains like McDonald’s, Dominos, and Burger King had modelled deliveries, drive-through and Over the Counter (OTC) pick-ups into their business long before the present crisis. So, while dine-in had been affected even for these businesses, the altered version to a delivery-based structure was not new for them and they quickly adapted to the alternate model to drive growth and revenues. Moreover, people prefer to order from reputed and international QSR chains given the highest level of hygiene and safety standards maintained by these chains.

Casual Dining Restaurant: Casual Dining restaurants were primarily built for ‘Dine in experience’ but as situation demanded most of the chain CDR also started delivery. This helped them in starting of their business in initial few months of lockdown. As restaurants started opening during July-Aug 2020, sales started rising. Players such as Barbeque Nation started delivery apart from dine-in buffet which provided additional revenue stream.

Café : Café was primarily not designed for the “Delivery and takeaway model”. The share of home delivery and takeaways has been small for these players. Cafés typically known for their dine-in experience sometimes take a fair bit of time to incorporate new safety measures, social distancing, and new ways of customer service and engagement. As the situation demanded, this format has introduced/enhanced the delivery segment. This segment has also been recovering albeit slowly.

PBCL and Fine Dining: Pubs, Bars, Lounges, and Fine Dining restaurants are the facing recovery issues primarily because most of them were shut till the end of July 2020 and in some parts of the country till Oct 2020. Moreover, even when they restarted operations, customers have been hesitant to visit and dine in pubs, bars, and fine dining restaurants.

Cloud Kitchens and Food Delivery Platforms: Cloud Kitchens and food delivery platforms such as Zomato, Swiggy played an important role during the lockdown. As of October 2020, Zomato and Swiggy have recovered to nearly 100% of the pre-COVID levels.

Unorganized Segment: The unorganized segment, which primarily includes dhabas, roadside small eateries, hawkers and street stalls, is the worst hit among all formats within the food services market. It is also estimated that this segment will be the last to start on the recovery path primarily due to hygiene and food safety issues and lack of working capital with the small entrepreneurs. The void created by this segment can be addressed by emergence of organized value segment that can address the basic food safety concerns or by the existing QSR and ACDR (Affordable Casual Dining Restaurants) players in the organized play.

Way Forward

With the reducing COVID cases in the country, progress made in vaccine development, clubbed with government official data indicating that India might have reached the peak of COVID 19 cases, opening up of economy is expected

in the near future. It is estimated that by Q2 FY 2022, the Food Services Market is expected to regain almost 99% of the market on a base of 2020 and by Q3 and Q4 it is estimated to be 110% of the base of FY2020. However, based on market projections that were made before the pandemic, the Food Services Market is estimated to reach 90% levels of the projections by Q3 of FY 2022.

- The top eight cities in India have been the centre of development, especially for the organized food services. Due to increased economic activity, rising disposable incomes, a greater need for convenience and an increasing women workforce, the chain food services brands have done well in these cities. The two mega metros: Delhi NCR & Mumbai contribute to around 42% of the chain food services market in India. The next six cities: Kolkata, Bengaluru, Chennai, Hyderabad, Pune and Ahmedabad along with Delhi NCR & Mumbai contribute around ~87% of the total chain market.
- The top eight cities together contribute 50% of the standalone market segment in the food services market. Meanwhile, the mega metros make up for 27% of the standalone market segment.
- The growth of food services has moved beyond the metros and mini metros, the same could be witnessed increasing presence of QSR and CDR chains in Tier I & II cities. This shift has happened primarily due to non-

availability of quality real estate in mega metros and mini metros and increasing competition within these cities. The Tier I & II cities have now emerged as new Urban powerhouses with higher disposable incomes clubbed with high aspirational value of the youth, fuelling growth of food services.

The millennial population of India is expected to increase at a faster rate signifying the further growth in eating out behaviour among Indians. The same has grown from 418 Mn. in FY 2011 to 447 Mn. in FY 2019.

Conscious indulgence

Indian consumer has been long exposed to the global food trends in terms of newer cuisines and formats through seamless interaction facilitated by the growth of multiple communication channels such as the internet, mobiles etc. Due to this continuous exposure, the phase of experimentation has changed to indulgence. Consumers are now aware about the various cuisines and formats even before visiting the outlet offering the same through restaurant rating and discovery platforms and take an informed decision to visit a particular format. Based on their mood, accompanying group, time of the day, they take a conscious decision where they want to indulge.

Indulgence is not only limited to eating-out but is picking up for dining-in as well. With delivery aggregators such as Zomato and Swiggy having multiple formats and brands associated with them, provide the consumer options to choose from.

Increasing availability of organized space leading to food services expansion

- Food services has recently emerged as a key sector in driving the retail space and is a leading segment to increase footfalls within a mall or high-street. With intent to leverage on higher revenues generated by the segment, malls are leasing out prime floor spaces to bring new F&B brands within their fold. On an average, ~20-25% of the mall space is dedicated to food services outlets. By the end of FY 2023 an additional supply of 9.3 Mn. Sq. Ft. of mall space is expected to get added to the existing supply of ~75 Mn. Sq. Ft. in top 7 cities in India resulting in availability of an additional space of ~2 Mn. Sq. Ft. for expansion of Food Services play.
- Continuing growth of e-commerce has resulted in B&M retailers rationalizing their store size. This has further made more space available for the food services players in organized retailing environment.
- The concept of mall spaces dedicated completely to food services is also coming up. Some key examples being Epicuria, Cyber Hub and Sangam Courtyard in Delhi NCR.

This high growth reinstates the trend that the future of growth for food services brands in India is from these emerging urban powerhouses. With increasing investments in infrastructure, business services and industries, the spending power of consumers is increasing in smaller cities. Consumers in these cities are also emerging as a strong new segment that is open to trying out branded and organized F&B dining options.

Consistent growth of Indian and International brands

The vast untapped potential in the Indian market to cater to the needs of its growing population have encouraged the entry of key international players into the domestic food services sector. These brands are not only concentrating on Mega metros, Mini Metros and Tier I cities, but over the past 2-3 years, have established their presence in the Tier II and Tier III cities as well. With the highest number of organized players, currently the QSR formats dominate the chain market, followed by the CDR and Café formats. In the CDR segment, the market in Tier I & II cities had been well penetrated by some brands with lower APC operating in the Casual Dining space such as Moti Mahal and Sagar Ratna. However, in recent past brands with higher APC like Barbeque Nation have increased their presence in Tier II cities and beyond.

Food Trends

Larger Focus on Value Meals: In the Indian food services market, value for money will continue to be the order of the day as Indians are eating-out and ordering-in much more at an average of 6-7 times per month per household. Indian consumers, irrespective of their economic class and the type of city they live in, are eat out/ ordering-in more. This is primarily to experiment, prefer to socialize and unwind over food. Indian consumers, though willing to spend more and more on experiential eating, are cost-conscious and look at value for money concepts, or for cost efficient functions when ordering-in.

- With a depressed inclination on consumer expenditure on non-essential goods, post COVID 19 consumer focus is on availing low cost meals, moving away from the need of experiential eating.
- The work from home culture and reduced availability to domestic help, a larger segment of millennials is compelled to order in or takeaway meals at their convenience. Thus, demanding high speed of service.
- Demand for ‘freshly produced’ and prepared meals have increased in order to avoid possibilities of food borne diseases and ensure high immunity to tackle COVID 19.
- Due to the demand for quality, consistency and trust branded internationally known establishments in the organized sector i.e. QSRs such as McDonald’s, KFC are in higher demand than domestic unorganized F&B services.

Unlimited Food at a Limited Price & DIY: The recent years have witnessed emergence and growth of fixed price menu concepts in the Indian Food Services space, especially in the CDR and FDR formats. The increased exposure to eating out has helped develop the market by enticing people to try new cuisines, concepts and recipes and eat out frequently to indulge the “foodie” in them. This prevalent shift in the lifestyle has encouraged the operators to try formats and concepts that can cater to the needs of this growing segment and give them a platform that requires engagement from the diner. Fixed buffet menu restaurants that have been traditionally popular within hotels have seen growth outside their traditional premises. CDR & FDR formats are now coming up with fixed buffet menu range that offers medium to large spread of options in various meal course at a fixed price. These formats are just not limited to food experience but are going a step ahead in consumer engagement by “Do it yourself” concepts, where brands place “over the table barbeques” for consumers to cook their own food items. Partially or fully cooked food is supplied from

the kitchens and consumers give the final touches at their tables. Some of the prominent restaurant chains that are tempting their consumers with these offerings are The Great Kebab Factory, Barbeque Nation, Absolute Barbeque, Sigree Global Grill etc. In the CDR segment, Barbeque Nation is the pioneer in establishing a format built around “DIY over the table barbeque”. Today it is the largest chain offering such a service in terms of stores as of Sep 30, 2020. However, in the FDR segment, The Great Kebab Factory has been offering similar menu since 1996 and has around 23 outlets presently.

Contemporising Indian Cuisine: A new development is being crafted in Indian restaurant industry where consumers can experience the traditional and regional specialities of Indian food prepared by using differentiated techniques and new world presentations. Few of the trendsetters in this category are ‘The Bombay Canteen’, ‘Farzi Café’ and ‘Soda Bottle Openerwala’

Beverage Remains the Game Changer

- Beverages, both alcoholic and non-alcoholic are a good source of boosting the bottom line of a restaurant. The beverage cost remains low at 15-20% as compared to the cost of other food items on the menu which is between 25-30% in most cases and as high as 35-40% in certain cases. A healthy sales mix of beverages in the menu certainly helps in attaining higher profitability.
- Also, an increasing trend towards higher beverage consumption is witnessed among the consumers, who are continuously looking for new ingredients, flavours and techniques to enhance their experience. Cashing in on these trends and getting inspiration from the western counterparts, the Indian QSR and casual dining chains are revamping their beverage offerings and introducing exotic and differentiated beverages to consumers.

Key Cuisines Offered across Food Services Segments

The Indian diner is also becoming more experimental in his approach to food and is open to any and all options that deliver a great dining experience and value for money. This trend can be witnessed by the growth in market share of certain cuisines in the food services segment. North Indian, Chinese and South Indian contributed ~54% of the total market offerings and American, Pizza, Italian and other western cuisines contributed ~22% of the total offerings in FY 2019. Increase in the share of American cuisine and pizza can be attributed to the growth of QSRs and CDRs offering these cuisines. Furthermore, regional Indian cuisines and bakery and desserts are also gaining market share and are presently at ~3.5% and 6% respectively. To sum up, one can say that the cuisine options in India are evolving in terms of new tastes, origin and styles and will continue to do so in the coming years.

Share of key cuisines across formats Fiscal 2019

Cuisines	Share of Cuisine	Cuisines	Share of Cuisine
North Indian	26.6%	Street Food	6.3%
Chinese	19.0%	Italian	4.5%

- In the chain market, QSRs and the CDRs constitute 81% in FY 2020 and the same is expected to grow to 86% by 2025.
- The market share of CDRs will decrease to 31% in FY 2025. However, the segment is expected to grow at a healthy CAGR of 18% to reach INR 302 Bn. The growth for CDRs will be fuelled by more CDRs in the chain segment making inroads in Tier II and Tier III cities.
- Also, as the food services market has evolved over time, each format caters to a distinct primary TG and occasions. Within the eating out space, the CDR segment is best placed in the overall chain segment based on pricing, wholesome offer, and involvement of the entire family. Apart from convenience and quick bites, the consumers are also looking at experiential format due to higher disposable income and changing eating out habits. CDRs continue to be a popular format in Tier I and Tier II cities along with the Mega Metros and Mini Metros.

Moreover, many successful domestic players like Moti Mahal, Barbeque Nation and Sagar Ratna have turned their attention to the national and international stage.
- The competition in chain CDR space is based on a number of factors, including price, type of cuisine, quality of food, quality of customer service, value, brand recognition and location of restaurants

Outlet Presence

- It is estimated that presently, the chain CDR segment has ~4,700 -5,200 outlets in FY 2020 across India which was ~1800-2000 in FY 2014. A few examples are Moti Mahal, Barbeque Nation, Toscano, Café Zoe, Flavours of Italy, Rajdhani, Pizza Hut, Sarvana Bhavan etc. Newer formats like Chilli's, Farzi Café, Carl's Jr. and Soda Bottle Openerwala have also taken a share of the pie. With the thinning lines between each format type, some players from the QSR and FDR segment have started venturing into the chain CDR segment. These transitions between various players within the chain CDR market have only added to its burgeoning growth.
- Mega Metros have the highest presence of chain CDR outlets at 31% while Mini-metros are next with a share of 24%. The remaining 45% market share is accounted for by Tier I and Tier II cities. However, with existing higher penetration in Metros and Tier I cities, most of the chain CDR formats have taken cue from the QSR players like Domino's and McDonald's and have ventured into Tier I & II cities

Trade Dynamics

- Product Sales and SKU mix:** Food dominates the Sales and SKU mix at 74% and 74% respectively for FY 2020. It is followed by beverages and desserts, where the share of beverages SKUs has increased from 14% in FY 2014 to 20% in FY 2020. Beverages having less food cost as compared to food items, the increase in beverage-based SKUs helps brands in maintaining healthy profit levels at the outlet level.

Sales Mix: Dine-in & Non-Dine-in: Paucity of time among the consumers residing in metros has fuelled the growth of delivery in these cities. Also, in FY2020 delivery services have gained traction primarily in office areas or residential complexes as evidenced by their increasing market share, currently at 35%. However, most consumers prefer to savour their meal experience, & dine-in is the preferred option at 54% in FY2020. This holds true for Chain CDRs in segments, which boasts of superior-quality interiors, variety of flavours and wide mix of food and beverage items. Due to COVID, dine in has been affected in FY 2021, and trend of Delivery and Takeaway has increased, but things are expected to get back close to normalcy post vaccination & reduction in Covid cases. Though there is expected to be a traction towards Organised food services for Quality & Hygiene reasons.

With respect to weekday and weekend sales, most of the CDRs register higher sale during the weekends as compared to weekdays. Whereas, based on the timeslots, lunch and dinner contribute to 80-81% of the overall sales. The share of Lunch sales ranges between 37-39% during the weekdays and 42-44% during weekends. As a trend the lunch sales is lower than the dinner sales across most CDR formats. However, brands like Barbeque Nation have higher proportion of the total revenues from weekday sales and lunch covers as compared to the industry average.

Chain Casual Dining Market: Key Trends

Varied Offerings and Shifting Consumer Need to Drive CDR Market

- The Chain CDR segment based on its varied cuisine offerings along with higher APC, has more chances of a faster growth as compared to other food services segments such as FDR, PBCL and even to the extent QSRs which primarily offer American cuisine based on burgers and pizzas. QSRs have a price and volume advantage over CDRs. However, the same is anticipated to undergo changes in the coming years based on shifting consumer habits, higher disposable income, increasing experimentation and urge to try new different things.
- The experimental Indian consumer is becoming increasingly demanding and gets bored with one type of restaurant/ concept/ food very fast and is continually looking for different options and newer concepts. This very nature of the consumer has reduced the life of a restaurant to 7-8 years presently from 10-12 years a decade back. To cater to this changing ecosystem, the brands have to continuously offer something different to keep on calling back consumers again and again. Brands like Pizza Hut, Barbeque Nation, Mainland China etc. keep on organizing different themes & in-store food festivals and add new products in the menu to keep the consumer loyal to the brand.

Multiple Brands vs. Single Brand

Going forward, the brands operating in the Chain CDR segment are continuously introducing newer concepts based on ambience and food offerings. These brands are just not limiting to a single brand or format and are venturing into different formats such as QSR, PBCL etc. Companies like Massive Restaurants, Impresario Hospitality and Specialty Restaurants not only have different brands in the same formats but are also venturing into different formats.

Streamlined Standard Operating Procedures

With high focus on craftsmanship and fresh produce, the very format of Chain CDR with limited usage of standardized products in the ready to cook/ eat food, restricts the fast scalability of this format along with expansion in smaller cities. Brands like Pizza Hut have been able to penetrate the Tier II market due to its robust supply chain and central commissary. However, CDR brands can also expand at a faster pace without the backing of centralized commissary and supply chain, brands such as Barbeque Nation, Moti Mahal have developed strong SOPs for every aspect of their business and ensure that all their franchisee follow the guidelines properly. The usage of SOPs clubbed along with strong training and monitoring system has helped Moti Mahal to expand fast in Tier II cities.

Efficiency Staff Development Initiatives

Also, it would be very important for the brands to communicate the same to its staff through regular training programme. Taking cue from the international brands such as Domino's, Pizza Hut, McDonald's etc., most of the home grown brands in India have started investing in various training programmes for their staff at regular intervals e.g. Barbeque Nation, one of the biggest chain in the CDR segment, has in-house training centers for its chefs, where each chef is trained prior to joining his/ her outlet and the centers also becomes the hubs for innovation and developing

new recipes. These training programmes by brands are also helping in reducing the attrition rate and attracting new talent.

The Digital Connect

- The connection between end-consumers and businesses has always played a pivotal role in the development and growth of any business. For consumer-driven segments, such communication becomes ever more important as it provides a platform by which operators can gauge the pulse of consumers. This helps businesses pull the right strings in terms of tapping into consumer behaviour. Food services is no exception to this, and the operators are increasingly using options like website, social media platforms, apps etc. for continuously communicating with consumers. The instant turnaround time is one of the biggest advantages of digital media over traditional media. The offers, incentives, product information, and promotions can be communicated in real time and the responses are also received quickly. Brands are also able to see feedback and reviews generated by consumers instantly and are able to take immediate corrective actions and carry out recoveries.
- Going a step ahead in this, Barbeque Nation launched a chat bot named #Sayhi in Jan 2017 to address enquiries by consumers and to reserve tables through Facebook Messenger. The chat bot, on the chain's official Facebook page, also lets users enquire about locations and pricing and answers queries about ongoing festivals and menus. Hence, reducing the time customers spend on the telephone or the chain's website. The chat bot also helps in building greater transparency in the reservation process. Simple and moderate issues are resolved faster, leading to greater customer satisfaction and long-term loyalty. These bots can help deflect calls from the call-centre and the interactive voice response (IVR) software, which further saves customers' time and telephonic cost. Table reservations can be made by simply sending a message on Facebook, as the bots direct customers to the preferred location, available slot, etc. Thus, it accelerates easy interaction between the restaurant and a customer, as Facebook Messenger is user-friendly and widely used.
- During COVID, digital means for 'table booking', 'food ordering', and 'payment' have seen rapid growth because people try to avoid touching surfaces in public places, and to minimise personal contact owing to social distancing.

To summarize, the following factors might help in rapid scalability of Chain CDRs in India

- Increasing experimentation, increasing spending capacity of the Indian consumer esp. in the Tier II and III cities
- Continuous innovation in terms of formats, themes and cuisines, to attract and retain consumers
- Opting a multi brand strategy, to capture bigger audience
- Leveraging learnings from QSRs and taking advantage of the increased demand in Tier II & III cities
- Building efficiencies in terms of food cost, manpower cost etc.
- Focus on developing strong SOPs and training programme to attract and retain quality staff
- Developing a mechanism to interact with the consumer in real time using the digital platforms
- Extreme hygiene to be maintained in kitchen area as well as dining area

Key Trends Influencing the Food Services Market

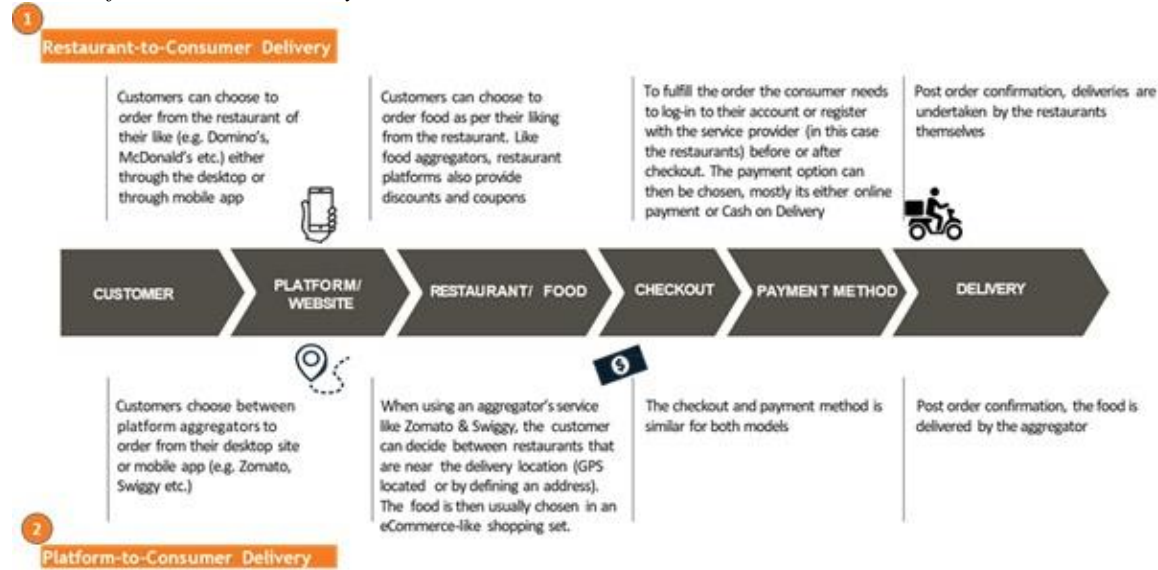

Continuing Growth of Online Food Delivery and Food Tech

The online food delivery market is segmented into two business models with different delivery methods:

- Restaurant to Consumer Delivery: Meals ordered online through a restaurant website and directly delivered by the restaurant e.g. Domino's, McDonald's etc.

- Platform to Consumer Delivery: Online meal order and delivery both carried by a platform e.g. Zomato, Swiggy etc.

Busy lifestyle, rising smartphone users, growing disposable income will continue to drive the growth of Indian Food space. Internet in India had a reach over 627 million users in FY 2019 & it has reached to 697 million in FY 2020. Smartphone penetration is also growing at a similar pace, with the user base estimated to have reached 408 million by FY 2019 and projected to over 500+ million in FY 2020.

Online Food Delivery Market in India in FY 2020 (US \$ Bn)

Source: Statista, Technopak Research & Analysis

- The overall food delivery market in India is expected to grow at a CAGR of 12.2% to reach US\$ 18.1 Bn by FY 2025 from US\$ 10.2 Bn in FY 2020. Overall food delivery market in India was US\$ 4.7 Bn in FY 2016 and has grown at a CAGR of 21.4% between FY 2016 and FY 2020
- In the overall food delivery market, the delivery through Platform to Consumer is at US\$ 4.8Bn in FY 2020. Delivery through Platform to Consumer has registered a CAGR of 100% between FY 2016 and FY 2020 and is expected to grow at a CAGR of 15.1% to reach US\$ 9.7 Bn by FY 2025

- The delivery through Restaurant to Consumer is at US\$ 5.4 Bn in FY 2020. Delivery through Restaurant to Consumer has registered a CAGR of 5% between FY 2016 and FY 2020 and is expected to grow at a CAGR of 9.2% to reach US\$ 8.4 Bn by FY 2025
- Pre COVID, the growth of “Platform to Consumer” between 2020 and 2025 was estimated to be 13% but due to COVID, the projected growth rate has increased to 15.1%. This is primarily due to people’s preference for delivery over dine-in during COVID time
- Similarly, pre COVID, the growth of “Restaurant to Consumer” between FY 2020 - FY 2025 was estimated to be 7% but due to COVID now it has increased to 9.2%. The primary reason for this increased growth is due to increased focus of the restaurants on hygienic and safe delivery. The restaurants have taken a lot of initiatives to ensure safe delivery, which motivated a lot of consumers to order directly from restaurants websites / app
- Growing user base of smartphone in India is allowing online food delivery platforms to capture market by offerings a wide range of food products. The rise of digital technology is shaping the online delivery market in India which is further helping the restaurants to improve their topline.

Technology has impacted all aspects of food services market and is not just limited to Platform to Consumer delivery formats. It has also led to the emergence to new business models, such as restaurant discovery platforms, cloud-based kitchens that support home cooks and online table reservation.

- **Food Discovery/Restaurant Search:** Earlier food enthusiasts had to wait for annual food guides and eating out directories of restaurants. These publications had expert reviews, opinions, and vital information to dine in the city. Now, these directories, expert reviews and opinions are made available by food discovery or restaurant search players on just a few clicks, a feat attained by food discovery players.

Post COVID, role of food discovery/restaurant search is expected to grow. People have now become extremely cautious about the safety and hygiene of the restaurants, and try to find reviews regarding restaurant hygiene before visiting. Role of influencers has also increased now on food discovery apps, as people now take their consideration regarding hygiene and safety norms being followed in the restaurants.

- **Table Reservation:** Of late it has become common for Casual & fine dining restaurants to offer table reservations to their clients. In fact, this service has become an integral part of a restaurant’s operation. With this service, outlets can estimate demand more accurately and improve on sourcing & staffing and can manage costs more efficiently. It is beneficial to a customer as reservation will guarantee one’s table at the time and place planned, and likely to receive better service at the outlet as details like time of arrival, no of persons etc. will be shared with the outlet in advance.

During the initial months of lockdown, as the restaurants were closed, hence there were no table reservations. Apps/websites offering table reservation features had to lay off staff to save cash and survive the pandemic. These apps also started coming with innovative ideas to have cash flow during lockdown, for example EazyDiner launched pre-paid dining vouchers which could be redeemed anytime until Dec 2020, this was an initiative of Eazydiner to support closed restaurants.

Once the lockdown restrictions were eased and restaurants started opening up, number of table reservations started increasing, & Table reservation apps such as Dineout and EazyDiner started recording an increase in table reservations. This is helping both the restaurants and consumers in the following ways:

- As customers reserve table in advance, restaurants plan accordingly for the number of walk-ins at a particular time, and are able to maintain the social distancing norms. App/websites providing table reservations are expected to grow in coming future
- On the other hand, as consumers have reserved the table, they expect restaurants to be prepared for them in terms of hygiene, sanitization and social distancing

Restaurant technology platform Dineout, collaborated with an AI based firm to help the partner restaurants in maintaining social distancing. Also, Dineout aims to provide live feed of kitchens to customers with the help of AI.

- **Cloud Kitchens:** Cloud kitchens are emerging as alternative channel for food delivery. In 2015, the food tech space went through a period of disruption. Due to significant rise in the awareness of healthy eating among consumers, the healthy food offerings-based restaurants are gaining traction among consumers. Urban markets are expected to see a continuing emphasis on health and wellness. Indeed, as consumer health-awareness becomes more sophisticated, especially amongst younger demographics, brands targeting health issues are expected to become more refined, focusing on particular conditions and nutritional requirements. Given the high rental and capex required for dine-in restaurants, the space for delivery-only kitchens is bound to increase, which can give better quality meals at more affordable prices to customers – all in the convenience of customers’ homes and offices. Due to time scarcity, Time, speed and convenience are going to matter more than ever and that is going to lead to the growth of delivery-only kitchen models. Some of the players who are into cloud kitchens are Faasos, FreshMenu, Biryani by Kilo etc.

Due to accelerating internet and smartphone penetration in India, online food delivery market is witnessing an explosive growth over last 3-4 years which is further fuelling the growth of cloud kitchens. The kitchen-only format model has certainly removed the pressure from the bottom line due to lower rentals, manpower cost and reduced cost of utilities. However, due to lack of physical presence, these brands have lower brand recall and have floating loyalty based on discounts provided against established brands such as Domino’s, McDonald’s etc. which command strong consumer loyalty, have top of the mind recall and well accepted product categories. Going forward, kitchen-only brands will be able to disrupt the market if they have strong and loyal consumer base and are able to create a brand that is scalable and well accepted across consumers in different cities.

During initial months of lockdown, when only delivery from restaurants was allowed, cloud kitchen played an important role in providing safe and hygienic food to customers at home. During the pandemic, when number of restaurants were closing permanently, cloud kitchens were showing sales growth even during Q2 2020. Cloud kitchens capable of providing both the hygiene and delivery are expected to grow Post COVID also.

Few other technology trends are as below:

- Data analysis to improve management and the customer experience
- Leveraging tools like mobile apps, messaging and social media to provide customers with a more targeted and customized virtual experience
- Allowing customers to take care of their bill expense and tip through their app
- Using point of sales tablets to take orders which intercommunicate flawlessly and right away to kitchen display screens through cloud system
- Brands are furnishing their restaurants with self-order kiosk, digital menu board, free Wi-Fi and wireless chargers

COVID Impact on Ordering & Delivery

COVID has caused the CDR & QSR chains to move to digital platforms for ordering food. Several chain restaurants already had apps and websites for online food ordering, and those who earlier did not have apps/websites, have launched new apps/websites in the last few months.

Moreover, most of these brands have started dine-in through digitization/app to develop contactless dining. Now customers have an option of ordering and making payment through app only.

Brands are noticing the major traffic of online ordering coming through their mobile application. The demand for online delivery is significantly driven by food aggregator platforms like Zomato, Swiggy, etc. These aggregators offer deep discounts and offers to increase the order density. This has helped the restaurants in increasing their reach and has positively impacted the sales. However, the discounts offered by the aggregators are putting pressure on the overall profitability of these restaurants.

During COVID, key aggregator platforms such as Zomato, Swiggy etc., played an important role in delivering food and helping the food services industry survive. Delivery was started in a number of locations in the country in April, and since then Zomato, Swiggy came into play.

Casual Dining restaurants were primarily built for 'Dine in experience' but as situation demanded, most of the chain CDR also started delivery. This helped them in restarting their business in initial few months of lockdown. As restaurants started opening during July-Aug 2020, sales started rising. Players such as Barbeque Nation started delivery apart from dine-in buffet which provided additional revenue stream. Also, 'Barbeque in a Box' initiative led to channelising the delivery-takeaway space.

Hygiene and Safety Concerns

COVID has changed eating habits of people to a very large extent. People have now become concerned about hygiene and safety issues. This change in habit of people is bound to stay post COVID. When things will go back to normal, there will be an increased demand for safe, hygienic and clean places for eating out. Organised formats like ACDR and QSR chains are well equipped to cater to the demand of safe and hygienic places and are estimated to grow in near future.

Market share shift from unorganized market to organized market

Due to COVID, behaviour of consumers has changed regarding hygiene and safety standards of the restaurants. Now consumers prefer a place with hygienic kitchen and seating area, with all safety procedures being followed. While organized market had this capability of maintaining clean & hygienic kitchen and dining area, the unorganized sector lacked it, hence unorganized sector took worst hit during lockdown. When things will move towards a new normal, a section of the customer base will again move back to unorganized sector, however there will be a section of customer base of the unorganized market that will move to the organized market due to change in preferences toward hygiene and safety.

Thus, there will be a gap created by unorganized market and share of organized market in the total food services will increase more rapidly in comparison to Pre COVID estimates. Moreover, in the organized sector, QSR and ACDR are the formats which have the capabilities to fill the gap created by unorganized market.

Digital Marketing

With increasing ubiquity of mobile and other smart devices, digital media has become quite indispensable, and the use of the medium for marketing initiatives has been on the rise. While traditional media offers mass reach and visibility, digital media provides quick response time, direct consumer feedback on the efficacy and effectiveness of the initiatives and enables dynamic campaigns targeting extremely focused audience groups. Also, the investment in creating a digital campaign that reaches out to specific target group is much lower when compared to traditional media, i.e. television and print.

The hectic pace of life and paucity of time has made convenience and ease of access through digital options a very attractive proposition. A lot has changed with the advent of digital media in India and people are increasingly becoming well versed with the global trends and well-travelled and more aware of the options they can avail through various mediums.

Brands / Outlets have started tying up with food delivery and hyperlocals as this segment of the industry is also growing at good rate and getting listed on Third Party Aggregators is proving fruitful for them.

Restaurant reviews and food blogging have gained popularity with food enthusiasts exploring new places and writing not only about the food but the entire experience. Responsiveness on the social space has become extremely crucial. Restaurants are taking Online Reputation Management (ORM) very seriously as it is an integral part of its image management now. Most restaurants are open to feedback since it helps them improvise the food and the services and lets the consumer feel like they are an integral part of the system. Digital media helps with quick feedback not only

for the quality and service but also for the marketing initiatives. Word of mouth referrals, recommendations are probably second to new lead generation through online search now.

In the food services market, marketing spends constituted 4-6% of the total revenue for majority of the players. The large players especially the chains observe 60-65% of the marketing budget being spent on traditional media and the balance 35-40% on digital media. However, for the rest of the industry 20-30% of the marketing budget is spent on traditional media whereas 70-80% is spent on digital media.

Close to 65% of the population in India is below 35 years of age and very digitally savvy. It is important to reach out to this young India on platforms where they prefer spending their maximum time and can be engaged.

- The Café segment invests heavily on Third Party Aggregators as it makes the discovery for consumers easier followed by spends on Social Media, SEO/SEM/Email Marketing and Display Marketing.
- For the QSR segment, Digital Video is the most important avenue for investment followed by Online Search / Email Marketing, Social Media and Display Marketing.
- The Casual Dining segment invests most of their marketing budget on Search / Email Marketing majorly for discovery and communicating promotional offers. This is followed by Mobile Ads / SMSs as these can be used to communicate personalized and location based promotional offers. The rest of the marketing budget is distributed between Social Media, Digital Video, Display Marketing and Third-Party aggregators.

The trend reflects that the percentage share of marketing budgets spent through digital initiatives is only going to increase over the years, given the cost effectiveness and efficacy of the medium.

Social Media & Tech-savvy Consumers

The trend of greater technology usage by consumers has led food services players to adopt new and diverse technologies as a means of enhancing their customers' experience and thereby establishing a unique brand identity and leveraging brand loyalty.

With the growth of the social media phenomenon empowering consumers and informing their choices, various players have established a presence on social media platforms as Facebook and Twitter. They have also developed exclusive mobile applications to connect with customers and adopted tools as Radian 6 and Meltwater Buzz, which allow for social media monitoring, engagement with existing customers, and promotion of the brand among target consumers.

For key food services brands, social networks like Facebook and Twitter, and blogging platforms, have become a core marketing medium to engage customers with interesting content, useful information (event, shows and latest offers), etc. Many players are also using social media platforms to encourage open consumer communication by addressing customer reviews, complaints, and grievances. Key International brands across formats (QSR, Café, CDR etc.) have adopted a mix of social media and traditional media. They, however, leverage online media significantly to offer schemes and discounts to consumers. Among key Indian brands such as Café Coffee Day, Barbeque Nation and Mainland China leverage online platforms such as Facebook for connecting with consumers. In Café segment, Café Coffee Day leads in terms of Facebook likes whereas in CDR space, Barbeque Nation leads in terms of Facebook Likes (Facebook Likes for Pizza Hut and Chilli's represent their international numbers). Food review websites have become important source of information about restaurants for the digital savvy consumers. They host details such as product menus, restaurant pictures, location maps, reviews, ratings, contact details of outlets etc. For instance, Burrrp, Times City and Zomato are sites with several listed restaurants across various cities enabling consumers to explore the best food options.

Impact of Advent of Capital Availability

Private investments can be broadly categorized into three stages – early stage, growth stage, and mature/ late stage. Private Equity investment in food services market is driven by increasing spend on eating out, increasing disposable income, higher proportion of working women etc.

Return on Investment

Restaurant sector is a long-term play for PE investors. PE investors are typically looking at making a minimum of at least 3X in a 4-5 year timeframe. Also, there is a certainty in cash flows if the model is right. That, along with growth, should allow private equity to make fair returns from this sector. PE firms not only bring funds on table but also bring management inputs on board and facilitate in scalability, improving operational efficiency for Food Services players.

Overview

We own and operate Barbeque Nation Restaurants, one of India’s leading casual dining restaurant chains (in terms of outlet count as of September 30, 2020) according to the Technopak Report, and International Barbeque Nation Restaurants. We also own and operate Toscano Restaurants and UBQ by Barbeque Nation Restaurant. The first Barbeque Nation Restaurant was launched in 2006 by SHL, one of our Promoters. We launched our first Barbeque Nation Restaurant in 2008, and subsequently acquired five Barbeque Nation Restaurants owned by SHL in 2012. We have steadily grown our owned and operated Barbeque Nation Restaurant network from a single restaurant in 2008 to 147 Barbeque Nation Restaurants (including opened, temporarily closed and under construction outlets) across 77 cities in India and six International Barbeque Nation Restaurants in three countries outside India as of December 31, 2020. We own 61.35% of the equity share capital on a fully diluted basis of one of our Subsidiaries, Red Apple, which owns and operates nine restaurants under the brand name, “Toscano”, a casual dining Italian restaurant chain and operates one restaurant each under the brand names “La Terrace” and “Collage” respectively. The first Toscano Restaurant commenced operations in June 2008 and, as of December 31, 2020, we operated eleven Italian Restaurants, nine of which are under the brand name “Toscano”, in three cities in India. In November 2018, we launched UBQ by Barbeque Nation Restaurant to provide *a la carte* Indian cuisine in the value segment. At present, UBQ by Barbeque Nation Restaurant predominantly caters to the delivery segment.

We believe the value we offer, the nature and quality of our food offerings and the ambience and service of our restaurants create a one-of-a-kind overall customer experience. Through our Barbeque Nation Restaurants, we pioneered the format of ‘over the table barbeque’ concept in Indian restaurants according to the Technopak Report. Live grills embedded in dining tables allow our guests to grill their own barbeques. We believe our Barbeque Nation Restaurants, compared to other fixed price dining options, offer competitive attractions such as a wide range of vegetarian and non-vegetarian appetisers and main courses, a popular dessert menu, a pleasant and casual dining environment and prompt service thereby making it a popular destination for celebrations. We also periodically run popular food festivals at our Barbeque Nation Restaurants offering our guests a range of Indian, international and fusion cuisines.

We diversified into another brand pursuant to our acquisition of 61.35% of the equity share capital on a fully diluted basis of Red Apple, which operates 11 Italian Restaurants in three cities in India, namely Bengaluru, Chennai and Pune. Of the Italian Restaurants operated by us as of December 31, 2020, three Toscano Restaurants were opened since March 31, 2019 and four Toscano Restaurants were opened in the three Fiscals immediately preceding Fiscal 2019. Our acquisition of Red Apple has enabled us to diversify our brand, cuisine and customer segment beyond our flagship concept of ‘over the table barbeque’.

UBQ by Barbeque Nation provides *a la carte* Indian cuisine in the value segment, initially through leading food delivery service providers for the delivery of our food. As of December 31, 2020, we were providing delivery in 77 cities in India of *a la carte* Indian cuisine under UBQ by Barbeque Nation from our existing kitchen infrastructure.

According to Technopak, the Chain Casual Dining market in India has been flourishing over the last few years. The Chain CDR segment represents the 2nd largest share in the chain food services market in India after QSR. In FY 2020, the size of the Chain Casual Dining market is estimated at INR 134 billion. The segment is expected to grow at a healthy CAGR of 18% to reach ₹302 billion by FY 2025. Our Barbeque Nation Restaurants have experienced steady growth in the number of covers over the last three Fiscals, and the proportion of total revenues from weekday sales and lunch covers at Barbeque Nation Restaurants is relatively higher as compared with the industry average according to the Technopak Report. We carefully choose the locations of our Barbeque Nation Restaurants with the objective of keeping our rent to potential revenue ratio low.

We believe our offering format positions us to capitalise on both the robust growth trend of the CDR market in India and the broader chain restaurant market within the food and services industry. The numbers of covers at Barbeque Nation Restaurants as well as our Company's revenues have grown consistently as our Barbeque Nation Restaurants have matured, particularly after being in operation for more than two years. For example, the number of in-dining covers at our Barbeque Nation Restaurants in India has grown from 6.86 million in Fiscal 2017 to 9.92 million in Fiscal 2020 at a CAGR of 13.08%. Further, out of the 147 Barbeque Nation Restaurants owned and operated by us in India as of December 31, 2020, 24 Barbeque Nation Restaurants were opened between March 31, 2019 and December 31, 2020 and 71 Barbeque Nation Restaurants have been opened since April 1, 2017. Consequently, we believe we are in a strong position to monetise the benefits of our expansion in the past few Fiscals. We also intend to leverage our experience, together with that of the management team at Red Apple, to expand Toscano Restaurants to other Metro and Tier I cities.

Our core values prioritise being customer-focused to provide excellent products and service and employee-focused by maintaining a superior quality work environment. Our Company places a strong emphasis on customer reviews and feedback and our Barbeque Nation Restaurants use our in-house call centre to obtain customer feedback for our Barbeque Nation Restaurants in accordance with our internally devised and managed Guest Satisfaction Index ("GSI"). Our Barbeque Nation Restaurants use two cloud-based systems: the Central Reservation System ("CRS") and the Central Feedback System ("CFS"). We also accept reservations for our Barbeque Nation Restaurants through our revamped smartphone application 'BBQ App', Facebook chat messenger, chat-bot and other reservation platforms. We have integrated "Business Insights", our in-house business intelligence software, which allows us to track restaurant wise data (operational and financial) for our Barbeque Nation Restaurants at a granular level and it has a direct interface with the enterprise resource planning system of the Barbeque Nation Restaurants.

Our Company was ranked amongst the top 10 retail companies to work for by Great Place to Work Institute in 2020 in collaboration with the Retailers Association of India and was ranked number 7 amongst India's best companies to work for in 2020 by the Great Place to Work Institute in collaboration with Economic Times.

Our standalone total revenue, EBITDA and Adjusted EBITDA has changed from ₹5,763.04 million ₹1,443.93 million and ₹904.45 million respectively, in Fiscal 2018 to ₹7,903.58 million, ₹1,595.47 million and ₹809.06 million respectively, in Fiscal 2020, at a CAGR of 17.11%, 5.12% and (5.42%), respectively. In Fiscals 2018, 2019 and 2020 and for eight months ended November 30, 2020, our total standalone revenues were ₹5,763.04 million, ₹7,076.29 million, ₹7,903.58 million and ₹2,087.91 million, our standalone EBITDA was ₹1,443.93 million, ₹1,653.29 million, ₹1,595.47 million and ₹99.16 million and our Adjusted EBITDA was ₹904.45 million, ₹1,011.23 million, ₹809.06

million and ₹(455.32) million, respectively. The Company also had negative net working capital in Fiscals 2018, 2019, 2020 and for eight months ended November 30, 2020.

EBITDA and Adjusted EBITDA presented in this Red Herring Prospectus is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, IFRS or US GAAP. Furthermore, EBITDA and Adjusted EBITDA are not measurements of our financial performance or liquidity under Ind AS, IFRS or US GAAP and should not be considered as alternatives to net profit/loss, revenue from operations or any other performance measures derived in accordance with Ind AS, IFRS or US GAAP or as an alternative to cash flow from operations or as a measure of our liquidity. In addition, EBITDA and Adjusted EBITDA are not standardised terms, hence a direct comparison of EBITDA and Adjusted EBITDA between companies may not be possible or meaningful. Other companies may calculate EBITDA and Adjusted EBITDA differently from us, thereby limiting its usefulness as a comparative measure.

Our Strengths

We believe that we benefit from a number of strengths that collectively differentiate us from our competitors:

Barbeque Nation is one of India's fastest growing and widely recognised restaurant brands in the rapidly growing CDR market

We have steadily grown our owned and operated Barbeque Nation Restaurant network from a single restaurant in 2008 to 147 Barbeque Nation Restaurants (including opened, temporarily closed and under construction outlets) across 77 cities in India and six International Barbeque Nation Restaurants in three countries outside India as of December 31, 2020. In addition, as of December 31, 2020, we had granted franchise rights in respect of one Barbeque Nation Restaurant.

Fixed price casual dining, given its convenience, quick service and moderate average spending, is increasingly popular amongst consumers. According to Technopak, we fall under the chain CDR market and the chain CDR market grew at a CAGR of 19.00% between Fiscal 2015 and Fiscal 2020 and is expected to further grow at a CAGR of approximately 18.00% from Fiscal 2020 to Fiscal 2025.

One of the main contributors to the brand affinity of our Barbeque Nation Restaurants has been referrals and recommendations by our customers, which we believe has enabled us to retain a strong market position whilst steadily expanding across India in a fragmented and highly competitive industry. As of December 31, 2020, our average rating of Barbeque Nation Restaurants on an online food aggregator was 4.38 out of 5.00. We also have a large social media following. As of December 31, 2020, our Company had over 1 million followers on Barbeque Nation's Facebook main page and, as of January 8, 2021, over 0.15 million followers on our Instagram page.

Steady growth in covers and consistent APC with a relatively high proportion of total revenues from weekday sales and lunch covers

We have experienced consistent cover growth in recent Fiscals. The number of in-dining covers served at our Barbeque Nation Restaurants in India increased from 6.86 million in Fiscal 2017 to 9.92 million in Fiscal 2020 at a

CAGR of 13.08%. In addition to our consistent cover growth, the APC (excluding revenues from UBQ and taxes) for dine-in customers at our Barbeque Nation Restaurants in India (excluding food delivery) has grown from ₹707 in Fiscal 2017 to ₹764 in Fiscal 2020 at a CAGR of 2.62%. Our APC from the Barbeque Nation Restaurants in India for the eight months ended November 30, 2020 was ₹762. Our business was significantly impacted due to COVID - 19, which led to our restaurants being temporarily closed from the third week of March 2020, therefore impacting our covers and sales.

We believe Barbeque Nation Restaurants has attracted groups with an average customer size of between four and five customers in last three Fiscals leading to a relatively higher average bill size. Our average bill size (excluding taxes) for Barbeque Nation Restaurants owned and operated by us in India was ₹3,026, ₹3,215, ₹3,249 and ₹2,757 in Fiscals 2018, 2019, 2020 and in the eight months ended November 30, 2020, respectively.

According to the Technopak Report, brands like Barbeque Nation have higher proportion of the total revenues from weekday sales and lunch covers as compared to the industry average. Our weekday covers from Barbeque Nation Restaurants were 48.7%, 48.4%, 48.6% and 53.4% of our total covers in India in Fiscals 2017, 2018, 2019 and 2020, respectively. Further, lunch covers at our Barbeque Nation Restaurants in India were 45.0%, 45.5%, 46.1% and 44.4% of our total covers in Fiscals 2017, 2018, 2019 and 2020, respectively.

We believe that our ability to generate a relatively high proportion of our total revenues from weekday and lunch covers arises because Barbeque Nation Restaurants are a popular choice for corporate lunches during the week and families during the weekends. Our Barbeque Nation Restaurants are located at close proximity to both commercial and residential areas and as a result we host business lunches as well as informal get-togethers, family celebrations and other events such as birthdays and social lunch get together. Our higher weekday and lunch covers also help us to increase our utilisation and efficiently manage costs at Barbeque Nation Restaurants.

Attractive offerings based on constant menu innovation and customer focus

Through our Barbeque Nation Restaurants, we pioneered the format of ‘over the table barbeque’ concept in Indian restaurants according to the Technopak Report. Our live grills embedded in dining tables allow our customers to grill their own barbeques. Indian cuisine is a natural part of the diet in the markets in which the Barbeque Nation Restaurants operate. We continue to offer new menu options, both vegetarian and non-vegetarian, largely based on Indian cuisine and use seasonal customer preferences to introduce new dishes. We also run popular food festivals at our Barbeque Nation Restaurants such as Jewels of the Sea, Barbeque Nation Festival League and Mango Mania, thereby offering our customers a range of Indian and international cuisines.

Our fixed price 'all you can eat' concept at our Barbeque Nation Restaurants offers our customers a varying spread of consistently delicious food at a value-oriented price in a pleasant and casual dining environment. We believe that barbeque cuisine is distinctively attractive as compared with other dining options due to its DIY and cooked-at-the-table nature and the flexibility and fun of mixing and matching a wide variety of meats, vegetables, sauces and condiments to create dishes according to each diner's individual tastes and preferences. In addition, fixed price dining is very popular amongst relatively larger groups, due to customers' perception of value for money and the comfort of certainty over the bill amount irrespective of varying individual appetites and consumption.

Since Fiscal 2017, we have rebranded and changed our brand logo and renovated some of our relatively older Barbeque Nation Restaurants to be more appealing and contemporary. We constantly endeavour to increase the number of live counters at our Barbeque Nation Restaurants, offering our customers customised dishes prepared in accordance with their requests. Some of our dishes may vary depending on the city in which such Barbeque Nation Restaurant is located keeping local tastes and preferences in mind. We have also introduced gift cards and vouchers as part of our offering and we tie-up with sales partners to increase our covers. We believe our approach of constant innovation assists in retaining our competitiveness, maintaining our repeat customer base and attracting new customers.

We have recently diversified into the Italian food segment pursuant to our acquisition of 61.35% of the share capital (on a fully diluted basis) of Red Apple, which operates 11 Italian Restaurants in three cities in India. Our acquisition of Red Apple has enabled us to diversify our brand, cuisine and customer segment beyond our flagship 'over the table barbeque'.

We, along with the senior management team at Red Apple, have several years of experience in catering to customer tastes and preferences in India, which has provided us with deep and informed insight of their expectations. Based on our experience and regular customer feedback, we carefully design and adjust our menus to suit what we believe are the current tastes and preferences of our customers. We aim to inculcate a service-oriented mind-set in all our staff and train them to be attentive to customer needs.

We place a strong emphasis on customer reviews and feedback. Our in-house department at Barbeque Nation Restaurant gathers feedback daily across multiple satisfaction parameters from the previous day's transactions and feeds this information into our internal GSI. The results determined by our GSI play an important role in management and staff incentive schemes in our Barbeque Nation Restaurants. The current GSI criteria include areas such as ambience, hygiene, reservation experience, food and beverage ("F&B") quality and restaurant service. On the basis of qualitative feedback received from our customers over phone calls, our employees assign a rating to the respective customer's experience. Many of our customers have rated their overall dining experience at Barbeque Nation Restaurants as either good or excellent.

Strong business processes and back-end systems leading to efficient operations

We benefit from strong processes and systems that have been established over the past 14 years of our Company's operation. Our restaurant locations are carefully chosen by a dedicated internal team. We have been successful in opening Barbeque Nation Restaurants in popular business districts, neighbourhoods and local markets without typically paying high street premium rentals. Our rent (including lease rentals, common area maintenance charges and GST to the extent input credit was not allowed) was ₹624.53, ₹863.43, ₹1,059.94 and ₹432.02 million for Fiscals 2018, 2019, 2020 and for the eight months period ended November 30, 2020 respectively and rent to revenue ratio was 10.58%, 11.63%, 12.46% and 18.26% for Fiscals 2018, 2019, 2020 and for the eight months period ended November 30, 2020, respectively, on a consolidated basis. Due to the impact of COVID-19, our restaurants were temporarily closed from the third week of March 2020 and therefore the rent to revenue ratio for the eight months period ended November 30, 2020 was not comparable.

We source our ingredients from various suppliers and, in some cases, import them from outside India. We also conduct regular audits to check our food quality and service standards. As of December 31, 2020, we also had two commissaries, one each in Delhi NCR and Mumbai, which serve a number of nearby Barbeque Nation Restaurants by preparing dishes on a volume basis and further realising economies of scale.

CRS is connected to our CRS agents, smartphone application, web-based app and in-restaurant POS reservation system. This synchronised system allows us to track all reservations for Barbeque Nation Restaurants centrally, with all interconnected booking systems feeding the central cloud database. CFS allows quick customer response from multiple media at any time of the day. The CFS allows us to store all customer feedback, centrally and initiate a quick response. We place a strong emphasis on customer reviews and feedback and use our in-house call centre to obtain customer feedback for Barbeque Nation Restaurants in accordance with our internal GSI. We have also integrated “Business Insights”, our in-house business intelligence software, which allows us to track restaurant wise data (operational and financial) for Barbeque Nation Restaurants at a granular level. “Business Insights” has a direct interface with our enterprise resource planning system for Barbeque Nation Restaurants, which is designed to handle and streamline the complex workings of our financials, inventory, warehousing, sales, purchases and manufacturing and enhance the ability to predict trends and business data through advanced detailed reporting.

We have significant online presence and we have witnessed increased reservations through our online platforms. In Fiscal 2020 and the eight months ended November 30, 2020, over 46.7% and 60.8% of total reservations at Barbeque Nation Restaurants were made online. Also, as of December 31, 2020, our BBQ App had registered over 2.2 million downloads.

Experienced staff and value-oriented business culture led by some of our Promoters and our senior management team bringing experience from well-known hospitality brands

Some of our Promoters have several years of experience in the Indian hospitality industry. A number of our senior management team have knowledge of and experience in the Indian hospitality industry, coming from well-known food and beverage and hospitality brands in India. Our management team’s experience provides us with the skills required to implement our corporate practices and growth strategies.

To assist our management, we have a dedicated team of employees across our restaurant network. We believe that a sense of ownership across all levels is very important to the success of a customer-oriented business. We place strong emphasis on instilling our core values in each of our staff. When we open new restaurants, we generally transfer some staff from existing restaurants to our new restaurants to ensure easier initial launch and set up. We believe that the experience of our Promoters and our senior management team will also be pivotal in our expansion of Toscano Restaurants to Metro and Tier I cities.

We place great emphasis on training our employees. Our training program is structured to provide a growth path for all our employees, from trainees to managers. In addition, we emphasise organic growth, having promoted some of our staff who joined our Company as trainees to chefs or management based on their performance. We have empowered our restaurant managers with authority in certain matters to maintain their engagement with our customers and business. Our efforts are geared towards aligning the goals of our staff with our vision of strengthening staff engagement. We also emphasise staff welfare including offering our staff skill enhancement, subsidised meals and accommodation in some cases and annual bonuses.

As of December 31, 2020, we had 7,298 full-time employees in our Company and its Subsidiaries organised, supported and incentivised to maximise productivity. Compensation for our Barbeque Nation Restaurant managers is linked to GSI, sales and profitability of their restaurant, which we believe promotes a culture of responsibility for customer service, revenue and costs.

*Mature stores are stores that have been in operation for more than two years as at the end of the relevant Fiscal or stub period, as applicable.

Our business was significantly impacted due to COVID-19, which led to our restaurants being temporarily closed from the third week of March 2020, therefore impacting our covers and sales.

The consolidated net working capital of our Company has been negative in Fiscals 2018, 2019, 2020 and in the eight-month period ended November 30, 2020 as set out below:

We believe we have the financial flexibility to fund our growth and expansion and allow us to respond effectively to emerging opportunities in the Indian restaurant market.

Our Strategies

Increase same store sales growth, revenue per store and profitability as the vintage of our Barbeque Nation Restaurants increases

We are committed to continuing to enhance our same store sales growth and profitability. Accordingly, we intend to implement a number of initiatives, many of which represent natural extensions and a continuing refinement of our strategy to date. These key initiatives include:

- increasing sales volume by introducing new and innovative dishes and “live counters” offering dishes customised to customers' preferences;

- increase our delivery business
- publicising to our customers the different food types available during various food festivals;
- increasing customer traffic by upgrading the decor of existing restaurants to revitalise their ambience and create a welcoming atmosphere;
- improving purchasing and logistics cost control through centralized purchases and strategic stocking of inventories in third-party central warehouses;
- increasing cost savings and operational efficiencies by further consolidating food preparation processes into our central kitchens;
- optimising restaurant-level staffing to maintain our service quality and reduce our labour costs;
- increasing profitability by introducing new and innovative dishes that utilise food ingredients that are available in high quality and at low costs;
- actively reducing wastage of food ingredients; and
- diversifying our product offerings to expand the reach of our existing core brand, including expanding the sale of alcoholic beverages in our Barbeque Nation Restaurants.

Continue expansion in Indian cities

We believe that our strong presence in the Indian market positions us well to capitalise on the anticipated growth in consumer spending from expected increases in the level of disposable income in India. We intend to increase both our revenues and profits by opening new Barbeque Nation Restaurants and new Toscano Restaurants in existing cities where we operate as well as in new cities in India and exploring additional opportunities for UBQ by Barbeque Nation. Increasing our penetration in existing cities with a greater number of restaurants will enable us to access new catchment areas within these cities and optimise our infrastructure usage. As of December 30, 2020, we were providing *a la carte* food delivery in 77 cities in India under UBQ by Barbeque Nation from our existing kitchen infrastructure.

Enhancing our reach to cover additional cities will enable us to reach out to a larger target customer base. We opened 23, 24 and 21 new Barbeque Nation Restaurants in Fiscals 2018, 2019 and 2020 respectively. As of December 31, 2020, two Barbeque Nation Restaurants were in the construction phase and we plan to launch them in Fiscal 2021. We will continue to further expand our Barbeque Nation Restaurant network in Metro cities, Tier I, Tier II and Tier III cities in India.

Toscano, as a brand, has demonstrated scalability in a single city, and we believe that it has the potential to expand to Metro and Tier I cities. For instance, we operate eight Italian Restaurants in Bengaluru where Barbeque Nation operates 13 Barbeque Nation Restaurants whereas Red Apple has no presence in other cities (other than two operational Toscano Restaurants in Chennai and one Toscano Restaurant in Pune as of December 31, 2020) where Barbeque Nation operates and where, in some of those cities, it operates in excess of five Barbeque Nation Restaurants each. Our Subsidiary, Red Apple, opened one and three Toscano Restaurants in Fiscals 2019 and 2020, respectively. Red Apple did not open any Toscano Restaurants in Fiscal 2018.

The key factor affecting the expansion of our Barbeque Nation Restaurants is the selection of suitable locations at appropriate lease rentals. For example, we have made a deliberate choice to keep most of our Barbeque Nation Restaurants away from premium locations such as premium shopping malls or other high street areas in Metro cities where lease rentals tend to be higher. We will continue to adopt a methodical approach in evaluating and selecting suitable locations to establish new restaurants. We have developed site selection processes based on our experience and enhanced by our local knowledge to evaluate multiple factors including demographics, spending capacity, market conditions and investment costs analysis in deciding where to locate our restaurants.

We currently own and operate all our Barbeque Nation Restaurants (other than our Barbeque Nation Restaurant in Kolhapur which is run on a franchise model), International Barbeque Nation Restaurants and Toscano Restaurants. We intend to continue following this model of owning and operating the restaurants but may also allow landlords to own restaurants run and operated by us located on their respective properties on a part rental part profit share or part revenue basis.

Preserve our customer and team-focused culture and values

Our employees are critical to our customer-focused business. We internally assess our employees to periodically identify competency gaps and use development inputs (such as training and job rotation) to address these gaps. We have been successful in building a team of talented professionals and intend to continue placing emphasis on managing attrition as well as attracting and retaining employees. We will continue to implement staff training policies and assessment procedures in a transparent and consistent manner as in the past and to continue investing in other resources that enhance our employees' skills and productivity. We will continue to help our employees develop understanding of our core values including our customer-oriented focus and service quality standards to enable them to meet our customers' needs and preferences.

We will continue to regularly review and update our employee compensation plans and bonuses based on their individual performance so that our employees are suitably incentivised. We also intend to continuously re-engineer our organisation to remain lean in order to respond effectively to changes in our business environment and key markets.

Expansion through owned & franchise formats in select international markets

We intend to continue to roll out primarily owned and operated restaurants and franchise owned (whether franchise or company operated) restaurants in select international cities in line with our carefully defined process for new restaurants openings. We will prioritise our expansion of restaurants in those markets where we can leverage our existing infrastructure and expertise. We currently operate two International Barbeque Nation Restaurants in Dubai, two International Barbeque Nation Restaurants in Abu Dhabi, one International Barbeque Nation Restaurant in Kuala Lumpur and one International Barbeque Nation Restaurant in Muscat. The level of operational involvement of franchisees will depend on their expertise and position in our target international markets.

Continue evaluating strategic brand acquisitions

Barbeque Nation is our core brand in the chain CDR market. We acquired 61.35% of the share capital (on a fully diluted basis) of Red Apple which operates the Italian Restaurants also in chain CDR market. We plan to continue pursuing brand diversification to capture additional market segments, take advantage of a wider range of market opportunities and ultimately increase our overall market share by enlarging our customer base. We intend to structure our brand portfolio to offer different price points and appeal to different clientele, with each brand maintaining a distinctive identity. We believe that the food services industry has potential for significant further growth and we plan to leverage our market position and experience in the food services industry by introducing other international food service brands in India or through acquisition of an existing Indian brand. A multi-brand strategy will allow us to (i) reduce our exposure to risks in a specific market segment, and (ii) derive cost efficiency and synergy from sharing operations or functions, leveraging our industry knowledge and experience, pooling negotiating powers with landlords and suppliers, and coordinating marketing and promotion initiatives across different brands and market segments.

Our assessment of the impact of COVID-19 on our business

The World Health Organization declared the outbreak of COVID-19 a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. Further, on March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses

and offices. The outbreak of COVID-19, as well as GoI measures to reduce the spread of COVID-19, have had a substantial adverse impact on our restaurant operations since March 2020, and the timing of how long the COVID-19 pandemic will last is still uncertain. In addition, our restaurants in different states and regions in India have been disproportionately affected by COVID-19 and the measures implemented in each state have varied due to regional and regulatory differences in each state in India. As a result of COVID-19, we have had to temporarily close a number of restaurants across India commencing from March 2020 and have experienced reduced store-level operations, including reduced operating hours and restaurant closures. During the initial stage of the COVID-19 crisis, footfalls and sales in our restaurants fell significantly due to the lockdown and other measures implemented by the GoI. Our footfalls and sales have since started to recover, although not yet to levels we saw prior to the COVID-19 crisis. As of the date of filing of this Red Herring Prospectus, our restaurants in 77 cities across India have reopened, often with limited operations. As of the date of the filing of this Red Herring Prospectus, the majority of our restaurants have opened for dine-in guests, however, the capacity may be limited, based on local regulations. In addition, the COVID-19 pandemic has directly impacted our same-store sales in our restaurants. The reduction in the level of business activity due to the COVID-19 crisis has also led to write offs of food inventory and a reduction in orders with our suppliers since our inventory includes food items which are perishable in nature. Similarly, our corporate offices also experienced closures and certain employees have been restricted from commuting to their places of work.

Re-opening of Outlets

As of March 31, 2020, we had a consolidated store network of 167 restaurants, which included 146 Barbeque Nation Restaurants, four Barbeque Nation Restaurants under construction, six International Barbeque Nation Restaurants and 11 Italian Restaurants.

As and when, restrictions on operations were lifted by the concerned regulatory authority, we ramped up the operations of our restaurants. The month-wise status of our restaurants is set out below.

Number of restaurants	March 31, 2020	April 30, 2020	May 31, 2020	June 30, 2020	July 31, 2020	August 31, 2020	September 30, 2020	October 31, 2020	November 30, 2020	December 31, 2020

During the COVID-19 pandemic, we implemented high standards of safety and hygiene protocols across our Barbeque-Nation Restaurants and Toscano Restaurants in India covering guest safety, employee safety, sanitisation, physical distancing, temperature checks and safe deliveries. We have made required changes to the seating layouts and restricted movement of crowds to maintain physical distancing. We launched #NoCompromiseDining with operating procedures outlining physical distancing, contact-free experience, sanitization protocols and customer experience.

Sales Recovery

Our sales have recovered month on month post lockdown and easing of various supply side restrictions like restrictions on operating hours, restrictions on operational capacity and restrictions on sales of liquor. While some of these restrictions have eased across a few states, we continue to face some restrictions across some cities. The recovery of our monthly sales has been driven both by an increase in dine-in sales and delivery sales. Our consolidated sales of food and beverages over the last few months post lockdown are as follows:

	Monthly Sales* (₹ million) Fiscal 2020 (A)	Monthly Sales* (₹ million) Fiscal 2021 (B)	Fiscal 2021 Monthly Sales* as a % of Fiscal 2020 Monthly Sales* (B/ A)	Month-on- month growth (%) in Fiscal 2021	Number of restaurants operational for dine-in at the end of each month during Fiscal 2021 (C)	Average Daily Sales per restaurants (in ₹) (D = B / (C x N**))

Note: Monthly Sales from restaurants operated by Red Apple have been consolidated in the table above from January 2020 since Red Apple became a subsidiary of the Company with effect from December 31, 2019. Red Apple operates 11 Italian Restaurants and hence, the comparison for the period between April and December of Fiscal 2020 with the corresponding period in Fiscal 2021 may not be comparable to such extent. The calculations set out in the table above are subject to rounding differences.

Delivery Focus with Product Innovation

Our delivery business has grown from ₹260.93 million in Fiscal 2020 to ₹378.90 million during the eight months ending November 30, 2020. We will continue to focus on the delivery segment and will continue to work on improving our product offering in relation to consistency, quality, recipes, delivery menu and meal combos. One of our delivery products, “Barbeque-in-a-Box,” that we launched in June 2020, provides a wide range of starters, main course and desserts. This is in addition to two other products, “Grills in a Box” and “Meals in our Box”, which are offered through delivery among other offerings. We will continue to work towards increasing the average daily sales of these products and these variants.

Our average daily delivery sales per restaurant was ₹5,354 in Fiscal 2020. Following are the details of our delivery sales over the past few months:

	Monthly delivery sales (₹ million) (A)	Number of restaurants operational for delivery at the end of the period (B)	Average Daily Delivery Sales per restaurants (in ₹) (C = A / (B x N*))
April 2020	4.58	69	2,211

*Where N for a particular month is equal to the number of days for that month and the number of restaurants used for this computation is the number of restaurants that were operational during such month. The calculations set out in the table above are subject to rounding differences.

We currently receive delivery orders both from various aggregators as well as through our own BBQ App and website.

Strengthened Digital Assets

We recently updated our BBQ App. This updated BBQ App includes: (i) option to make dine-in reservations; (ii) online ordering for our delivery products; and (iii) exclusive offers through digital coupons. The BBQ App also provides a payment option for our dine-in customers. Our share from our digital assets (BBQ App, our website and chat bots) as a percentage of total reservations has grown from 34.6% in the month of February 2020 to 47.5% in the month of December 2020. Our cumulative mobile downloads have increased from over 1.28 million at the end of November 30, 2019 to over 2.2 million at the end of December 2020.

Under our Smiles Loyalty program, we currently provide 5% of the bill value (subject to certain terms and conditions) to our customers as Smiles points which can be redeemed within a defined timeline during the customer's next dine-in visit or delivery order from our BBQ App or website. In the month of February 2020, only 0.8% of our customer bills reflected the redemption of Smiles points but this has grown to 9.6% of our customer bills for the month of December 2020. As of January 24, 2021, our average rating of the BBQ App on an internet app store was 4.5 out of 5.0.

Cost Optimisation

We have undertaken various cost optimisation efforts such as seeking rent reliefs from our landlords, renegotiating our commercial terms, temporarily reducing senior management salaries and realigning store operating costs and structures. As of December 31, 2020, we had 7,298 full time employees in our Company and its Subsidiaries as against 9,620 full time employees as on February 29, 2020.

Liquidity status

The financial impact of COVID-19 has had, and is expected to continue to have, an adverse effect on our liquidity, and we are seeking appropriate sources of liquidity in order to sustain our business throughout this crisis. This also led to temporary delays in compliance with our payment obligations to our lenders and payment of our statutory dues. We have recently completed a private placement of Equity Shares for an aggregate consideration of ₹1,499.69 million. We have also engaged in rent relief negotiations with our landlords and arrived at negotiated agreements with respect to reductions in rent and our rental obligations during the COVID-19 pandemic with a large proportion of them. In addition, the salaries of senior management and certain other support centre employees were reduced temporarily. We have also negotiated revised commercial terms during the COVID-19 pandemic with some of our other service providers, and we have managed our inventory through promotions, reorganisation and liquidation of stocks. This has provided us with working capital support and additional liquidity. However, depending on how long the COVID-19 pandemic lasts, we may need to seek additional sources of liquidity. The COVID-19 pandemic is adversely affecting the availability of liquidity generally in the credit markets, and there can be no assurance that additional liquidity from other sources will be available to us on favourable terms, or at all, especially the longer the COVID-19 pandemic lasts or if it were to worsen. While we cannot currently estimate the duration or the future negative financial impact of the COVID-19 pandemic on our business, we expect the negative effects to continue into the fourth quarter of Fiscal 2021 and beyond.

Our Operations

Overview

Our management seeks to promote a culture of sharing information and ideas, with the aim of ensuring that we benefit from our scale of operations and adopt best practices across our brands. Our restaurants are standardised in terms of offerings while allowing individual restaurant-level business managers reasonable autonomy in daily operations. Some of our standardised processes and systems at Barbeque Nation Restaurants include:

- our Barbeque Nation Restaurants typically offer customers at least five vegetarian and five non-vegetarian largely pre-cooked appetisers they can season and barbeque on a grill embedded in their table, an all-you-can-eat main course buffet and a selection of desserts, for a fixed price;
- centralised cloud-based reservation and feedback management systems;
- food preparation times are carefully calculated and our chefs have studied customer habits to forecast requirements;
- strong IT systems including centralised data processing;
- internal algorithms to forecast demands based on past trends;
- extensive training to all employees on the Company's core values, behavioural and technical competencies and in anticipation of hygiene audits; and
- customer service-focused culture through internally devised and managed GSI tracking.

We employ a management structure designed to promote efficiency in supervising, directing and supporting our operations, quality assurance systems, recruitment process and training programmes in different regions and cities. We have put a management system in place comprising three levels: corporate-level management, regional and cluster-level management. The central management of our overall business and operations is currently located in our corporate headquarters in Bengaluru. Our corporate headquarters are both responsible for the corporate and administrative management of our organisation and operational management and supervisions, such as financial planning and analysis, internal audit, IT systems development, new restaurant openings, management-level recruitment, payroll, property management, central procurement, logistics and sales and marketing. We intend to integrate the back-end operations of our Company with Red Apple.

Our management is integrated at various levels to facilitate central control and support for each restaurant. Each Barbeque Nation Restaurant has its own business manager, and we have cluster managers covering various cities within a region, depending on the density of the restaurants in a particular city or region. Cluster managers are typically former business managers and are therefore experienced in restaurant operation and management.

All business managers receive regular and centralised induction and training in basic management skills, food quality and production, financial literacy, labour management and operating procedures. Business managers are responsible for the day-to-day operation of their respective Barbeque Nation Restaurants. The performance of business managers is evaluated based on their ability to work within the designated budget and achieve year-on-year improvements in sales, profit and operating margins set by corporate-level management as well as GSI related feedback. Each of our Barbeque Nation Restaurants has its own staff, comprising chefs, captains and servers.

We seek to recognise staff members who show potential early and train and promote them within the organisation. Any restaurant staff member who demonstrates impressive performance results has opportunities to progress over time from a junior level staff member to a more senior position. We also focus on improving our workforce to achieve the highest possible motivation of our staff. We provide our staff with periodic training. We also design our workspace such that our staff has a comfortable and an effective layout to allow them to perform their work efficiently. Our staff is encouraged to take ownership of their work and learn from the responsibility it brings.

Menu and Food Preparation

In order to promote consistent quality at all of our restaurants, we apply best practices to monitor all the steps of food delivery, from the creation and maintenance of the approved products list to supplier selection, menu item approval and the training of our chefs and staff. We also aim to revise our menu in accordance with changing consumer preferences. Most of our dishes are freshly prepared by our trained chefs in each restaurant kitchen.

We commit resources to the development of a largely standard menu framework. Our restaurant menus vary in some respects based on the city in which the restaurant is located to cater to local tastes and preferences. All our menu items are evaluated on taste, ease of preparation and whether they could be introduced to the menu profitably. We have a dedicated team of trained chefs which aims to ensure that all ingredients and recipes are consistent with quality standards.

As of December 31, 2020, we also had two commissaries, one each in Delhi NCR and Mumbai. These commissaries serve a number of nearby Barbeque Nation Restaurants by preparing dishes on a volume basis and further realising economies of scale.

From time to time, we also run periodic food festivals celebrating one or more cuisines or their fusion to add to our menu offerings. Some of our popular food festivals at Barbeque Nation Restaurants include:

Name of Festival	Cuisine
Hakuna Matata	African cuisine
Jewels of the Sea	Sea food
Mango Mania	Mango centred dishes
MA Road ki Masti	Mumbai's street food
Jat Set Go	Punjabi food and drinks
Moplah Festival	Kerala's food
Med Feast	Mediterranean food
Khao Galli – Dilli 6	Delhi's street food

We also host special events at our Toscano Restaurants. Some of the popular events include:

Name of Festival	Description
Easter Brunch	Traditional Easter fare
BBQ on the Terrace	Barbeque
Chef's College Bread Baking	Bread making session
Mother's Day	Three-course lunch
Chef's College Humble Holiday Pies	Cooking demonstration of four varieties of pies

Pricing Policy

Our pricing policy is generally based on the costs of operation and raw materials, marketing analysis, including analysis of customer needs and our competitive position. We offer fixed price dining at our Barbeque Nation Restaurants, which varied approximately between ₹349 and ₹1,409 per customer (excluding taxes and pricing for kids' buffet) in Fiscal 2020. The fixed price per customer primarily depends on the city in which the restaurant is located, type of meal (lunch or dinner), whether it is a weekday or weekend, whether the customer is an adult or a child and time of dining (whether standard meal timings or earlier than standard meal timings). We also offer marginally lower pricing for customers dining ahead of typical meal timings at some of our Barbeque Nation Restaurants to ensure maximum table-turns and efficiency. UBQ by Barbeque Nation provides *a la carte* Indian cuisine options from our existing kitchen infrastructure in the value segment. Our Italian Restaurants offer *a la carte* Italian cuisine options.

We review our pricing across our restaurants from time to time, including when prompted by price fluctuations of our raw materials and staff costs.

Customer-focused Culture

We are committed to delivering high quality service and dining experiences to our customers. We believe that there is a direct correlation between the quality of service and the long-term financial performance of our restaurants. We

have also launched a loyalty programme for our customers, “Smiles” in which we provide reward points to our customers which can be redeemed at our Barbeque Nation restaurant.

Our Company undertakes formal monitoring of performance and service standards of its employees in a number of ways, including by placing a strong emphasis on customer reviews and feedback, which we obtain through our Company’s internally devised and managed GSI system, verbal feedback to any of our Barbeque Nation Restaurant staff, reviews of Barbeque Nation Restaurants on restaurant review websites and customer-initiated feedback on our Company’s cloud-based CFS. Our Company also has a dedicated customer relations team based in Indore which typically contacts a proportion of the previous day’s customers at Barbeque Nation Restaurants to gather feedback. This feedback is then added to the system, which generates a daily index across Barbeque Nation Restaurants, clusters, regions and the overall average for the Company.

Our Company strives to address any feedback requiring corrective action in a short period of time and our Company’s cloud based CFS immediately contacts the relevant business manager if his or her Barbeque Nation Restaurant receives a negative rating below our Company’s internal benchmarks. The relevant business manager then contacts the customer promptly to first understand the nature of the feedback requiring corrective action, which may be then escalated for appropriate action.

In addition, we conduct regular third-party hygiene audits to evaluate service levels both in the dining areas and the kitchen operations. Any lapses in service are immediately reported to corporate management and efforts are undertaken to quickly address or rectify such lapses.

Performance Review

We review the performance of each restaurant using a variety of KPIs including, customers served per day, average per cover, covers, table turns, raw material costs, staff costs and customer feedback. We also review financial performance based on gross margins, restaurant-level profitability and corporate-level profitability. We compare and analyse operational indicators of our restaurants by reference to geographical clusters of comparable restaurants to share best practices. Finally, we also carry out restaurant level reviews with business managers as well as cluster and regional managers on a regular basis.

Quality Monitoring

We employ a strict quality monitoring system across all our restaurants. In addition, we conduct regular internal audits on each of our restaurants. In addition, from time to time, we engage a third-party auditor, to conduct hygiene audit of the premises of our restaurants and make recommendations.

New Restaurant Development

When entering a new geographic market, our goal is to achieve meaningful market share, local recognition, critical mass and economies of scale, whilst at the same time focusing on consistency in the quality of our foods and services. Once we achieve an adequate scale of operations in a particular city, we seek to leverage our brand to expand into nearby markets. For example, we have generally concentrated our Barbeque Nation Restaurants expansion efforts by mainly targeting Metros and Tier I cities, and to some extent, Tier II cities. In Fiscals 2022 and 2023, we plan to focus on Metros and Tier I cities whilst expanding into Tier II and Tier III cities as these locations could present significant potential.

We follow a disciplined and systematic process with respect to selection and opening of our new Barbeque Nation Restaurants and International Barbeque Nation Restaurants and intend to apply this process to the Italian Restaurants. Our selection of potential locations for our restaurants is based on various factors, including penetration of chained QSRs and CDRs, existing market competition, demographics and economic conditions of each particular city. We have a central team of personnel and resources at the corporate level committed to developing and opening new locations. Generally, the process consists of four steps:

- **Business Development Team:** A suitable location is generally one of the most important elements for a restaurant’s success. Accordingly, our procedure for the development of new restaurants begins with an initial

review of potential locations in terms of other restaurants in the vicinity, types of customers, rental costs of the premises and spending capacity of the city or trade area.

- **Project Team:** Based on the input provided by the business development team, the project team reviews the technical parameters such as the kitchen design, the dining area design and layout.
- **Legal and Liaising Team:** This team is responsible for reviewing regulatory permits and licenses, drafting lease or operating agreements and requiring regulatory compliance of properties leased or operated by us.
- **Operations Team:** The team develops a detailed business case for a particular site comprising five-year projections with quantitative data including customer traffic, expected customer flow and average price per meal and qualitative criteria including presence and business results of competitors and other retailers. Where feasible and economical, we pursue restaurant locations strategically located within or near transportation infrastructure that may enable high turnover as well as within or near business districts, busy streets and office complexes.
- **Site Approval Committee:** Following preliminary analysis of the location, the site approval committee reviews the report produced by the commercial development team to give its final approval.

Once a site has been approved by our site approval committee for a new restaurant, we sign a memorandum of understanding with the property owner or lessor and negotiate lease terms whilst concurrently conducting legal and regulatory due diligence investigations. Lease negotiations are led by our head of business development and are guided by a comprehensive set of criteria, including certain financial return requirements. We typically negotiate a three to four month fit-out period to enable us to fit out the location in accordance with our brand standards without incurring lease rental costs. We typically negotiate leases on a fixed rental basis but have also negotiated leases on a variable rental basis tied to percentage of sales.

We engage contractors for our fit-outs which are carried out on a ready-to-move-in basis. From time to time, we may import certain equipment such as smoke eliminators or certain kitchen equipment where it is economic and practical to do so.

We typically only lease constructed premises, and based on recent experience and trends, management estimates that the average fit-out period for a new restaurant varies between three and four months. We generally transfer staff from existing restaurants to new restaurants to ensure the continuance of our core values at new operations. We typically incur staff costs relating to new restaurants for about 45 to 60 days prior to the restaurant launch as we typically bring in staff in advance of the restaurant launch date for training. Restaurant results are monitored by regular operational meetings.

Suitable locations are crucial for our business. For most of our Barbeque Nation restaurants in India and overseas, the initial terms of our leases range from five to 19 years.

Restaurant Maintenance

Our restaurant-level teams are responsible for managing on-going refurbishment. Minor refurbishments typically take place periodically two to four years after opening a new Barbeque Nation Restaurant. Major refurbishments typically take place approximately five to nine years after opening of a Barbeque Nation Restaurant and include replacement of food preparation equipment, tables, chairs and full redecoration at Barbeque Nation Restaurants.

Restaurant Closures

In 2016, we acquired PGPL, which obtained the franchise for operating restaurants under the brand name “Johnny Rockets”, a well-known American hamburger brand, in 2013. PGPL operated up to seven Johnny Rockets restaurants in India, however, all the Johnny Rockets restaurants were eventually closed due to commercial reasons and subsequent termination of the IMDA. PGPL closed all Johnny Rockets restaurants by October 10, 2018, and paid fees payable under the IMDA. We transferred our shares in PGPL pursuant to a share transfer agreement dated December 4, 2018. For further details, see “*Risk Factors – Our erstwhile subsidiary, PGPL, which operated Johnny Rockets*”

restaurants had incurred losses. Our experience with Johnny Rockets restaurants may influence decision of other global brands to partner with us.” and “History and Certain Corporate Matters – Details regarding material acquisition or divestments of business/undertakings, mergers, amalgamation, revaluation of assets, if any, in the last ten years – Share transfer agreement dated December 4, 2018 executed among our Company, PGPL, Salim Hajjumar Sheikh and Sabiya Sheikh” on pages 46 and 230 respectively.

In addition, since Fiscal 2018, apart from relocating some of our restaurants in the same trade area mostly due to expiry of the relevant leases, we have closed two International Barbeque Nation Restaurants in Ras al Khaima and Dubai and three Barbeque Nation Restaurants due to commercial reasons.

Marketing and Advertising

Effective branding is critical to our business success. Our branding model is based on three key factors that influence customer preferences: unlimited, quality food at affordable prices, relaxed ambience and prompt service. We centrally control our standards for the use of our brands in all aspects of our business.

Our advertising targets consumers with a preference for fresh, DIY casual dining at an affordable price. Our advertising strategy is centred on increasing our brand awareness, complemented with promotions and festivals from time to time.

We have engaged third party agencies to assist us with our marketing and advertising. We use a variety of media to convey our advertising, including billboards, city formats and banners as a key vehicle for certain of our brands. We use other media, including internet, internet aggregators, radio, print, direct marketing and other unconventional media, such as short message services and social networking sites, to optimise our media plan and coverage of target demographic profiles.

Suppliers and Purchasing Practices

Our ability to maintain consistent quality throughout our restaurants depends in part upon our ability to acquire ingredients and related raw materials from reliable sources in accordance with our specifications in each of the locations in which we operate.

Vendor identification process may be initiated if we are commencing operations in a new city or region or to identify additional or substitute vendors. We obtain information about potential vendors from our database of existing vendors and our research. Our vendor selection criteria include analysis of all potential procurement options to optimise costs.

We maintain a number of suppliers for each of our key ingredients, which we believe can help mitigate pricing volatility. Given that we often rely on direct deliveries to our Barbeque Nation Restaurants, we seek to optimise the number of suppliers for each product based on frequency of delivery and distance from the supplier. For example, for perishable items requiring frequent deliveries, such as fruits and vegetables, we may contract with more than one supplier within the same city where the transportation costs may make doing so economically efficient. We may also contract with more than one supplier for a certain item where supply of that item is known to be inconsistent.

Information Technology

We use information technology systems to help us operate efficiently, increase the scalability of our business and accommodate future growth. We currently use a combination of commercially available and custom-developed software and hardware systems. We connect all our restaurants to the system, allowing us to effectively monitor and review performance on a real time basis as well as to monitor our fixed assets and payroll. We have integrated “Business Insights”, business intelligence software, which allows us to track restaurant wise data (operational and financial) at a granular level and it has a direct interface with our enterprise resource planning system, which is designed to handle and streamline the complex workings of our financials, inventory, warehousing, sales, purchases and manufacturing and enhance the ability to predict trends and business data through advanced detailed reporting.

In addition, we also use smartphone application ‘BBQ App’ which has been registered over 2.2 million downloads as of December 31, 2020. We have recently revamped our smartphone application to make it more user friendly and interactive.

Health, Safety and Environment

We are subject to various central, state and local laws affecting the operations of our business, including health, safety and environmental laws. For further information in relation to the various laws applicable in relation to our business operations, see “*Government and Other Approvals*” on page 494 of this Red Herring Prospectus.

Human Resources

As of December 31, 2020, we had 7,298 full-time employees in our Company and its Subsidiaries. None of our staff is represented by a labour union or covered by a collective wage bargaining agreement. We emphasise employee welfare by offering our employees bonuses and other incentives. We transfer our employees across our restaurant network to maintain our core values.

Employee Training

We have a defined learning and development structure which includes:

- a certified restaurant-level trainer;
- strengthening behavioural and technical competencies for business managers;
- launching learning management systems; and
- training for hygiene audits

Competition

The Indian restaurant industry and within it, the CDR market, is competitive and fragmented. The Indian restaurant industry is also segregated into organised and unorganised segments. Data relating to the unorganised segment is scarce and unreliable. For further details, please see “*Risk Factors — This Red Herring Prospectus contains information from an industry report which we have commissioned from Technopak.*” on page 73 of this Red Herring Prospectus.

The number, size and strength of our competitors vary by location. Competition is based on a number of factors, including price, type of cuisine, quality of food, quality of customer service, value, name recognition and restaurant location. Competition within the CDR market, however, focuses primarily on the quality of food, value for money and quality of service. We compete with local, national and regional restaurant chains.

In addition, we compete with QSRs and smaller restaurant chains as well as individual restaurants in various cities where we operate. Our business benefits from our quality food offerings coupled with our unique all-you-can-eat, DIY live barbeque experience.

Finally, we also face competition from companies replicating our dining format at lower costs. For further details, please see “*Risk Factors — If we are unable to foresee or respond effectively to significant competition our business, results of operations and financial condition could be adversely affected.*” on page 53 of this Red Herring Prospectus.

REGULATIONS AND POLICIES

Given below is an indicative summary of certain relevant laws and regulations applicable to our Company in India. The information in this section has been obtained from publications available in the public domain. The description of the applicable regulations as given below has been provided in a manner to provide general information to the investors and may not be exhaustive and is neither designed nor intended to be a substitute for professional legal advice. The statements below are based on the current provisions of applicable law, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

Under the provisions of various Central Government and State Government statutes and legislations, our Company is required to obtain and regularly renew certain licenses or registrations and to seek statutory permissions to conduct our business and operations.

Key regulations applicable to our Company

Food Safety and Standards Act, 2006 (“FSSA”)

The FSSA was enacted with a view to consolidate the laws relating to food and to establish the Food Authority for setting out scientific standards for articles of food and to regulate their manufacture, storage, distribution, sale and import to ensure availability of safe and wholesome food for human consumption. The Food Authority is required to provide scientific advice and technical support to the Government of India and the state governments in framing the policy and rules relating to food safety and nutrition. The FSSA also sets out requirements for licensing and registering food businesses, general principles of food safety, responsibilities of the food business operators, liability of manufacturers and sellers, and adjudication in case of defaults.

In exercise of its powers under the FSSA, the Food Authority has framed, *inter alia*, the Food Safety and Standards (Licensing and Registration of Food Business), Regulations 2011 (“**FSSR**”). The FSSR provides the procedure for registration and the licensing process for the food business and lays down detailed standards for various food products.

The Central Government has also notified the Food Safety and Standards Rules, 2011, which set out the: (a) enforcement structure of the ‘commissioner of food safety’, ‘food safety officer’ and ‘food analyst’; and (b) procedures for extraction, seizure, sampling and analysis. The FSSA also lays down penalties for various offences (including recall procedures).

Following the outbreak of COVID-19, the Food Authority has issued a guidance note on ‘*Food Hygiene and Safety Guidelines for Food Businesses during Coronavirus Disease (COVID-19) Pandemic*’ (“**Guidance Note**”) with an intent to provide guidance to food businesses, including their personnel involved in handling food to prevent the spread of COVID-19 in the work environment and any incidental contamination of food/food packages. It also provides guidance in relation to operative mechanisms such as the establishment of an in-house emergency response team in large food businesses to deal with suspected infections effectively. It mandates that employers should have a COVID-19 screening protocol in place to screen all personnel entering the premises. The Guidance Note sets out that, *inter alia*, (i) all employees and visitors are required to be screened at entry points for symptoms of COVID-19 such as temperature (using non-contact type thermometer), cough or a cold; (ii) entrances are required to mandatorily have measures installed for hand hygiene; and (iii) employees and food handlers should be encouraged to self-declare any symptoms of any respiratory illness before visiting the premises. Additionally, to spread awareness and contain the spread of the disease, the Guidance Note requires employers to employ and ensure compliance with numerous measures such as, displaying posters/standees/audio visuals on preventive measures for COVID-19, using alcohol-based sanitisers, avoiding close contact with symptomatic personnel, using face masks, and cleaning and disinfecting surfaces frequently. Further, in accordance with the Guidance Note, food sectors involved in food services, takeaways and deliveries are required to ensure that, *inter alia*: (i) food service areas are thoroughly cleaned and disinfected after every meal; (ii) hand wash facilities are made available to workers; (iii) employees wear a clean uniform, mask/face cover, gloves and head covers at all times and (iv) contactless delivery methods are put in place. The Guidance Note also prescribes guidelines for the management of the food establishment to handle a suspected/positive case of COVID-19 in accordance with the guidelines issued by Ministry of Health and Family Welfare.

Additionally, the Guidance Note mandates strict adherence to General Hygiene and Sanitary Practices specified under Schedule 4 of the FSSR (“**Schedule**”). The Schedule enumerates multiple compulsory measures to be adopted by food business operators in the interest of human nutrition, safety and hygiene such as requiring: (i) premises to be clean, adequately lighted and ventilated with sufficient free space for movement; (ii) eating, chewing, smoking and spitting within the premises to be prohibited, especially while handling food; and (iii) persons suffering from infectious diseases to be prevented from working.

The Legal Metrology Act, 2009 (“Legal Metrology Act”)

The Legal Metrology Act has been in force since April 1, 2011 and replaces the Standards of Weights and Measures Act, 1976. The Legal Metrology Act seeks to establish and enforce standards of weights and measures, regulate trade and commerce in weights, measures and other goods which are sold or distributed by weight, measure or number and for matters connected therewith or incidental thereto. The Legal Metrology Act contains provisions in relation to, *inter alia*: (a) appointment of Government approved test centres for the verification of weights and measures; (b) punishment for violation of the provisions of the Legal Metrology Act; and (c) nomination of persons responsible for breaches committed by companies.

Shops and Establishments Legislations

Commercial establishments are required to be registered under local shops and establishments legislations. Such legislations regulate the working and employment conditions of the workers employed in shops and establishments including commercial establishments, and provide for fixation of working hours, rest intervals, overtime, holidays and leave. They also regulate other rights and obligations of employers and employees in relation to, *inter alia*, maintenance of shops and establishments and termination of service. In certain states where the local shops and establishments legislations are applicable, our restaurants are required to obtain registrations.

Police Laws and fire prevention laws

The state legislatures in India have enacted laws regulating public order and police, which provide, *inter alia*, for the registration of eating houses and obtaining a ‘no objection certificate’ for operating such eating houses from the police station located in that particular area, along with prescribing penalties for non-compliance. The state legislatures have also enacted fire control and safety rules and regulations such as the Maharashtra Fire Prevention and Life Safety Measures Act, 2006, Tamil Nadu Fire Service Act, 1985, Gujarat Fire Prevention and Life Safety Measures Act, 2013, Karnataka Fire Force Act, 1964 and Delhi Fire Service Act, 2007, which are applicable to our restaurants established in such states. The legislations include provisions in relation to fire safety and life saving measures by occupiers of buildings, licensing provisions and penalties for non-compliance.

Excise legislations of various states

State governments regulate excise and countervailing duties imposed on alcoholic liquors, grant of liquor licenses and retail supply of alcohol. Certain state governments have enacted prohibition legislations in relation to manufacture, sale, consumption, and transportation etc. of liquor. While there is a complete ban on the sale, consumption, transportation etc. of liquor in certain states, the sale, consumption, and transportation etc. of liquor is permitted in most states once the requisite licenses and permits from the concerned state departments have been obtained.

Municipality Laws

The state legislatures in India have the power to endow the municipalities with the power to implement schemes and perform functions in relation to matters listed in the Twelfth Schedule to the Constitution of India, which includes regulation of public health. The state governments have enacted laws empowering the municipalities to regulate public health including the issuance of a health trade license for operating eating outlets and implementation of regulations relating to such licenses along with prescribing penalties for non-compliance.

Trade Marks Act, 1999 (“Trade Marks Act”)

The Trade Marks Act provides for, among others, the application and registration of trademarks in India. The purpose of the Trade Marks Act is to grant exclusive rights to marks such as brands, labels and headings, and to obtain relief in case of the infringement of such marks. Applications for the registration of trademarks have to be made to Controller-General of Patents, Designs and Trade Marks who is the Registrar of Trademarks for the purposes of the Trade Marks Act. The Trade Marks Act prohibits any registration of deceptively similar trademarks. It also provides for remedies in case of infringement and penalties for falsifying and falsely applying trademarks.

Consumer Protection Act, 2019 (“COPRA”)

The COPRA, which came into force from July 2020, repealed the Consumer Protection Act, 1986. The COPRA provides a mechanism for the consumer to file a complaint against a service provider in cases of unfair trade practices, restrictive trade practices, deficiency in services, unlawful pricing and serving of food that may be hazardous to life. It provides for a three tier consumer grievance redressal mechanism at the national, state and district levels. Non-compliance of the orders of the redressal commissions attract criminal penalties. The COPRA has, *inter alia*, introduced a Central Consumer Protection Council to promote, protect and enforce the rights of consumers and provides for mediation cells for the early settlement of disputes between the parties. The COPRA places liability on a product manufacturer / product service provider / product seller to compensate for the harm caused due to a defective product or deficiency in services. The COPRA also enables the Central Government to take measures for preventing unfair trade practices in e-commerce.

Public Liability Insurance Act, 1991(“Public Liability Act”)

The Public Liability Act imposes liability on the owner or controller of hazardous substances for any damage arising out of an accident involving such hazardous substances. A list of ‘hazardous substances’ covered by the Public Liability Act has been enumerated by the Government pursuant to a notification. The owner or handler is also required to take out an insurance policy insuring against liability under this legislation.

Environment Regulations

We are subject to various environment regulations, including the Environment (Protection) Act, 1986, as the operation of our establishments might have an impact on the environment in which they are situated. The basic purpose of the statutes given below is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (“PCBs”), which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking inspection to ensure that industries are functioning in compliance with the prescribed standards. These authorities also have the power of search, seizure and investigation. Many industries are required to obtain consent orders from the PCBs which are required to renewed regularly.

Water (Prevention and Control of Pollution) Act, 1974 (“Water Act”)

The Water Act prohibits the use of any stream or well for the disposal of polluting matter in violation of the standards set down by the State Pollution Control Board (“State PCB”). The Water Act also provides that the consent of the State PCB must be obtained prior to the opening of any new outlets or discharges, or an industry, operation, or process, or any treatment and disposal system, which is likely to discharge sewage or effluent on land or into a stream, well or sewer.

Air (Prevention and Control of Pollution) Act, 1981 (“Air Act”)

The Air Act requires that any person operating an industrial plant (emitting air pollutants in the atmosphere) in specified areas must apply in a prescribed form and obtain consent from the State PCB prior to commencing any activity. The consent may contain conditions relating to specifications of pollution control equipment to be installed.

Solid Waste Management Rules, 2016 (“Solid Waste Management Rules”)

The Solid Waste Management Rules require all restaurants to segregate waste at source, facilitate collection of segregated waste in separate streams and handover recyclable material to either authorized waste pickers or authorized recyclers, in partnership with the relevant local body. The Solid Waste Management Rules prescribe specific methods for disposing off biodegradable waste and residual waste. While bio-degradable waste is required to be processed, treated and disposed through composting or biomethanation within the premises as far as possible, residual waste is required to be given to waste collectors or agencies as directed by the relevant local body.

Laws relating to taxation

Based on such assessment, the Management has concluded that the Group will recover the carrying amount of its assets as on March 31, 2020. 3. Summary of significant accounting policies

The Restated Financial Information have been prepared in accordance with the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- (a) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- (b) Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- (c) Level 3 inputs are unobservable inputs for the asset or liability.

3.1 Assessment of Going Concern assumption pursuant to the impact on account of the COVID-19 pandemic:

Assessment of Going Concern assumption in preparation of the special purpose interim consolidated financial statements for the eight month period ended November 30, 2020:

The impact of the COVID-19 pandemic and the measures put in place to control the spread of virus by the jurisdictional regulatory authorities, have triggered significant disruptions to the Group's operations during the eight month period ended November 30, 2020. Further, its current liabilities exceeded its current assets by Rs. 3,101.24 Million as of November 30, 2020.

Due to the restrictions placed by the jurisdictional regulatory authorities, the Group's restaurant outlets were closed temporarily commencing from latter part of March 2020 and pursuant to the reduced level of operations, the Group has incurred operating losses during the period of closure. The Group has resumed its operations in a phased manner depending on easing of lockdown restrictions and its evaluation of operating scenarios at respective store locations. As on date of approval of these financial statements, the Group had opened substantially all of its outlets and commenced operations.

In order to address the matter of having adequate liquidity in the Group to ensure that the Group can meet all its obligations in the normal course of business, the management of the Group has taken various measures which include the following:

- A number of cash conservation measures, including a (i) significant reduction in the level of capital expenditure in the short term, (ii) limiting the outflows to only outlets which the Group intends to operationalise, compliance and health and safety related spend, (iii) pausing all non-essential discretionary and variable spending, (iv) payroll cost reductions through store manpower rationalisation and salary cuts, and (v) extended credit with suppliers and lessors, reduction in lease rentals etc.
- Continuing focus on outdoor catering and sourcing of customers from third party platforms, its various initiatives to comply with sanitization and social distancing protocols, minimal contact experience through non-touch alternatives and strict adherence to hygiene norms.
- Raising adequate funding through incremental debt from banks with 1 year moratorium for repayment of principal and interest and fresh equity infusion. Subsequent to November 30, 2020, the Company has received funding aggregating to Rs. 1,499.69 Million towards issue of 5,951,132 equity shares of Rs. 5 each.

The Board of directors of the Company have approved the aforesaid business plan and in their assessment, based on due consideration of the business plan, the Group will be able to meet all its obligations in the normal course of business. Accordingly, the Board of directors of the Company have approved the preparation of the Special Purpose Interim Consolidated Financial Statements on a going concern basis.

The Special Purpose Interim Consolidated Financial Statements do not therefore incorporate adjustments, if any, that may be required in respect of recoverability and classification of asset carrying amounts or the amounts and classification of liabilities, should the Group not continue as a going concern.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary

All intragroup assets and liabilities, equity, income, expenses, and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

The Restated Consolidated Financial Information of the Group include subsidiaries in the table below:

3.3 Revenue recognition

Revenue is recognized at an amount that reflects the consideration to which the Group expects to be entitled in exchange for transferring the goods or services to a customer i.e. on transfer of control of the goods or service to the customer.

Revenue from sale of food and beverages is recognized at the time of underlying sale to the customer. Revenue is presented net of discounts given to the customers and any taxes collected from customers for remittance to the government. In case of discount to customers in the form of gift voucher, the value of such discount is determined based on the percentage of redemption in the past. Customer purchases of gift cards are recognized as sales upon redemption of gift card or upon expiry.

Revenue from displays and sponsorships are recognized in the period in which the products or the sponsor's advertisements are promoted/displayed.

Royalty arrangements based on sales are recognised at the time the underlying sales occur.

Government incentives are accrued for based on fulfilment of eligibility criteria for availing the incentives and when there is no uncertainty in receiving the same. These incentives include estimated realisable values/benefits from special import licenses and benefits under Serve From India Scheme.

3.4 Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

3.5 Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Company, liabilities incurred by the Company to the former owners of the acquiree and the equity interests issued by the Company in exchange of control of the acquiree. Acquisition-related costs are generally recognised in Statement of profit and loss as incurred. At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Business combinations involving entities or businesses under common control are accounted for using the pooling of interest method. The assets and liabilities of the combining entities are reflected at their carrying amounts. The difference, if any, between the amount recorded as share

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve.

3.6 Non-current assets held for sale and discontinued operations:

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the group will retain a non-controlling interest in its former subsidiary after the sale.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and: (a) represents a separate major line of business or geographical area of operations, (b) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or (c) is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit and loss

3.7 Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. For the purposes of impairment testing, goodwill is allocated to the Group's cash-generating units.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss.

3.8 Property, Plant and Equipment

Property, Plant and Equipment are carried at cost less accumulated depreciation and impairment losses, if any. The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

as the difference between the sales proceeds and the carrying amount of the asset and is recognised in Statement of profit and loss.

Depreciable amount for assets is the cost of asset less its estimated residual value. Depreciation on tangible assets have been provided on the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The useful life of assets is given below:

Leasehold improvements	Amortised over the period of the lease
Furniture and fittings	10 Years
Plant & machinery	15 Years
Service equipments	10 Years
Computer equipments	3-6 Years
Vehicles	8 Years

3.9 Intangible assets

Acquired Intangible Assets - Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Liquor licenses with perpetual term purchased for restaurant chain business:	Amortised over the lease term of the respective restaurants
Software and other licenses	3 Years
Brand name	Indefinite useful life

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in Statement of profit and loss when the asset is derecognised.

3.10 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Cost of inventories include all costs incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

3.11 Financial Instruments

Financial assets and financial liabilities:

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instruments.

Initial recognition and measurement:

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

Subsequent measurement:

Financial assets at amortised cost: Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Assets at fair value through other comprehensive Income: Financial assets are measured at fair value through other comprehensive income if these financial assets are held within business model whose objective is achieved by both collecting contractual cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding and selling financial assets.

Financial assets at fair value through profit or loss: Financial assets are measured at fair value through profit or loss unless it measured at amortised cost or fair value through other comprehensive income on initial recognition. The transaction cost directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in the statement of profit and loss.

Financial liabilities

Financial liabilities are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Equity Instrument

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments recognised by the Group are recognised at the proceeds received net off direct issue cost.

Impairment of financial assets (other than at fair value)

The Group assesses at each date of balance sheet, whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Group recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the twelve-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly, since initial recognition.

Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in Statement of profit and loss if such gain or loss would have otherwise been recognised in Statement of profit and loss on disposal of that financial asset.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Statement of profit and loss.

3.12 Share issue expense

The transaction costs of an equity transaction are accounted for as a deduction from equity to the extent they are incremental costs directly attributable to the equity transaction.

3.13 Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.14 Foreign Currency transactions and translations

The functional currency of the Company is Indian Rupee (Rs.).

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated.

Exchange differences on monetary items are recognised in statement of profit and loss in the period in which they arise except for exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

3.15 Employee Benefits

Defined Contribution Plan

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are recognised as an expense when employees have rendered service entitling them to the contributions.

Defined Benefit Plan

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period. Remeasurement, comprising actuarial gains and losses is recognised in other comprehensive income in the period in which they occur.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date less the fair value of the plan assets out of which the obligations are expected to be settled. Long Service Awards are

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

3.16 Share based payment transaction

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in Statement of profit and loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

The Company had formulated Phantom Option Scheme (POS) under which eligible members are granted phantom shares entitling them to receive cash payments for the amounts measured as a difference between market value of share and the exercise price after the completion of specified period from the date of grant. Fair value of such cash-settled options is measured at every reporting date and is recognised as expense to the Statement of Profit and loss over the remaining vesting period on a straight-line basis with a corresponding adjustment recognised as liability.

3.17 Borrowing Costs

Borrowing costs include:

- (a) interest expense calculated using the effective interest rate method,
- (b) finance charges in respect of finance leases, and
- (c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in Statement of profit and loss in the period in which they are incurred.

3.18 Leases

The Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. At the date of commencement of the lease, the Group recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Group

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

For arrangements entered into prior to the date of transition to Ind AS, the Group has determined whether the arrangement contains lease on the basis of facts and circumstances existing on the date of transition.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

Further, in respect of lease contracts of its outlet premises, the Group has elected not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

Measurement of the right-of use asset:

At the commencement date, the right-of-use asset is measured at cost and comprises:

- the amount of the initial measurement of the lease liability, to which is added, if applicable, any lease payments made at or before the commencement date, less any lease incentives received;
- where relevant, any initial direct costs incurred by the lessee for the conclusion of the contract. These are incremental costs which would not have been incurred if the contract had not been concluded;
- estimated costs for restoration and dismantling of the leased asset according to the terms of the contract, through a return obligation liability or provision determined as a discounted amount of the restoration and dismantling costs.

Following the initial recognition, the right-of-use asset is depreciated from the commencement date on a straight-line basis over the lease term. Right-of-use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

Measurement of the lease liability

At the commencement date, the lease liability is recognized for an amount equal to the present value of the lease payments over the lease term.

Amounts involved in the measurement of the lease liability are:

- fixed payments (including in-substance fixed payments; meaning that even if they are variable in form, they are in-substance unavoidable);
- variable lease payments that depend on an index or a rate, initially measured using the index or the rate in force at the lease commencement date;
- amounts expected to be payable by the lessee under residual value guarantees;
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

The lease liability is subsequently measured based on a process similar to the amortized cost method using the discount rate:

- the liability is increased by the accrued interests resulting from the discounting of the lease liability, at the beginning of the lease period;
- less payments made. The interest cost for the period as well as variable payments, not taken into account in the initial measurement of the lease liability and incurred over the relevant period are recognized as costs.

In addition, the lease liability may be remeasured in the following situations:

- change in the lease term,
- modification related to the assessment of the reasonably certain nature (or not) of the exercise of an option,
- remeasurement linked to the residual value guarantees,
- adjustment to the rates and indices according to which the rents are calculated when rent adjustments occur.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The Group has elected to apply the practical expedient of not assessing the rent concessions as a lease modification, as per MCA notification dated 24th July 2020 on Ind AS 116 for all rent concessions which are granted due to COVID-19 pandemic. As per requirements of MCA notification, rent concessions confirmed for the period ended November 30, 2020 of Rs.327.43 million have been accounted as Other Income.

3.19 Income Taxes

Income tax expense represents the sum of the tax currently payable and deferred tax. Income tax expense for the interim period is recognised based on the best estimate of the weighted average annual income tax rate expected for the full financial year 2020-21.

Current tax: The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the Consolidated statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax: Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the period

Current and deferred tax are recognised in Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

3.20 Provisions and Contingent Liabilities

A provision is recognised when the Group has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

3.21 Impairment of non-financial assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

3.22 Earnings per share (EPS)

Basic earnings per share are computed by dividing statement of profit and loss attributable to equity shareholders of the company by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares considered for deriving basic EPS and also weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

3.23 Operating Cycle

Based on the nature of products / activities of the Group and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Group has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

3.24 Use of estimates and judgements

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgement in applying accounting policies

Determining control over certain subsidiaries:

The Company's wholly-owned subsidiary, Barbeque Nation Mena Holding Limited, Dubai ('BNHL, Dubai') has 49% stake in following entities:

Name of the entity	Country of incorporation	As at			
		30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
Barbeque-Nation Restaurant LLC	Dubai	49%	49%	49%	49%
Barbeque Nation International LLC	Oman	49%	49%	49%	NA
Barbeque Nation Kitchen LLC	Dubai	49%	49%	49%	N/A

Barbeque-Nation Hospitality Limited
Restated Consolidated Financial Information

Although BNHL, Dubai holds less than half of the voting power in these entities, pursuant to its unilateral control over the relevant activities of these entities, these are considered subsidiaries of BNHL, Dubai.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Group makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Group considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the Group's operations taking into account the location of the underlying asset and the availability of suitable alternatives.

Useful lives of property, plant and equipment

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Provision for site restoration obligations

The Group has recognised provision for site restoration obligation associated with the stores opened. In determining the value of the provision, assumptions and estimates are made in respect of the expected cost to dismantle and remove the furniture/fixtures from the stores and the expected timing of those costs.

Uncertain tax positions

The Company's current tax provision relates to management's assessment of the amount of tax payable on open tax positions where the liabilities remain to be agreed with relevant tax authorities. Uncertain tax items for which a provision is made relate principally to the interpretation of tax legislation applicable to arrangements entered into by the Company. Due to the uncertainty associated with such tax items, it is possible that, on conclusion of open tax matters at a future date, the final outcome may differ significantly.

Standards issued and effective

The new and amended standards that are notified and are effective, up to the date of issuance of the Company's financial statements are disclosed below.

(i) Amendments to Ind AS 103 Business Combinations:

The amendments to the definition of a business in Ind AS 103 help entities determine whether an acquired set of activities and assets is a business or not. They clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test.

These amendments are applicable to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after the 1 April 2020 and to asset acquisitions that occur on or after the beginning of that period. These amendments are not applicable to the Group's Restated Consolidated Financial Information.

(ii) Amendments to Ind AS 1 and Ind AS 8: Definition of Material:

The amendments to Ind AS 1 Presentation of Financial Statements and Ind AS 8 Accounting Policies, Changes in Accounting Estimates and Errors align the definition of 'material' across the standards and clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity. The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements.

A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

These amendments are applicable prospectively for annual periods beginning on or after the 1 April 2020. The amendments to the definition of material do not have a significant impact on the Group's Restated Consolidated Financial Information.

(iii) Amendments to Ind AS 107 and Ind AS 109: Interest Rate Benchmark Reform

The amendments to Ind AS 109 Financial Instruments: Recognition and Measurement provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

The amendments to Ind AS 107 prescribe the disclosures which entities are required to make for hedging relationships to which the reliefs as per the amendments in Ind AS 109 are applied. These amendments are applicable for annual periods beginning on or after the 1 April 2020. These amendments are not applicable to the Group's Restated Consolidated Financial Information.

Allocation of goodwill to cash generating units:

For the purpose of impairment testing, goodwill has been allocated to cash-generating units in the following manner.

Particulars	As at			
	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
Cash generating units				
Outlets operating with the brand name				
Johny Rocket	-		-	40.31
Barbeque-Nation	189.66	189.66	189.66	189.66
Toscano / Café Toscano	583.31	583.31	-	-
Total	772.97	772.97	189.66	229.97

The recoverable amount of the above cash generating units have been determined based on a value in use approach by considering cash flow projections approved by the management. For its impairment assessment as at March 31, 2020 and November 30, 2020, the management has assessed the impact of the Covid-19 pandemic on the operations and forecasted cash flows. The following inputs have been used for arriving the said recoverable amount.

Outlets operating with the brand name "Johny Rocket"

Particulars	As at
	31-Mar-18
Input considered	
Discount rate	17.23%
Growth rate	5.00%

Outlets operating with the brand name "Barbeque-Nation" and "Toscano" / "Café Toscano"

Particulars	As at			
	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
Input considered				
Discount rate	18.00%	18.00%	13.00%	12.00%
Growth rate	2.00%	2.00%	4.00%	5.00%

In respect of restaurant outlets acquired and operating with the brand name Barbeque-Nation, an analysis of the sensitivity of the computation to a change in key parameters based on reasonably probable assumptions, did not identify any probable scenario in which the value-in use would decrease below the carrying amount.

In respect of restaurant outlets operating with the brand name "Toscano" / "Café Toscano", the above assessment resulted in impairment of goodwill amounting Rs. 50 for the year ended March 31, 2020 and Rs. Nil for the eight month period ended November 30, 2020.

As explained in note no 30H, given the uncertainty regarding the duration, extent and ultimate impact of the COVID-19 pandemic, the Group cannot estimate with any precision the impact on its prospective financial performance and accordingly the impact may be different from that estimated as at the date of approval of these restated financial statements.

The credit risk on such credit card collections is minimal, since they are primarily owned by card issuing banks. The Group also has certain receivables from corporates on credit terms ranging upto 60 days.

The Group uses a provision matrix to determine impairment loss on portfolio of its trade receivable. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in forward-looking estimates are analysed.

Refer note 33 for details of acquisition of Red Apple Kitchen Consultancy Private Limited ("Red Apple")

Note:

The non-controlling interests in Red Apple were entitled for put options to sell their equity shares in accordance with the terms of underlying agreement with shareholders. Should the option be exercised, the Company had to settle such liability by payment of cash. As at the acquisition date, the amount that may become payable on the exercise of option was recognised as a financial liability at its present value with a corresponding charge directly to the shareholders' equity. The amount so recognised on acquisition date was determined by the management based on information available as at such date. The finance cost on such gross obligation recognised as financial liability was computed at 10.5% per annum from the date of acquisition.

As at March 31, 2020, the management had re-estimated the gross obligation that may become payable due to significant changes in the business and economic conditions pursuant to COVID-19 pandemic. Based on such revised estimate, the carrying value of gross obligations as at March 31, 2020 required reduction by Rs. 236.17 which was recognised under exceptional items for the year ended March 31, 2020.

Pursuant to the terms of understanding entered into between the Group and put option holders on November 16, 2020, put option stands cancelled and accordingly, the carrying value of the gross obligation amounting Rs. 718.50 as on this date has been derecognised and the corresponding credit has been adjusted in retained earnings.

- H** As explained in Note 3, the impact of the COVID-19 pandemic and the measures put in place to control the spread of virus, have triggered significant disruptions to the Group's operations and has resulted in material uncertainty that cast significant doubt on the Group's ability to continue as a going concern. The management has considered external and internal information in assessing the impact of COVID - 19 pandemic on its financial statements, including recoverability of its assets as at the Balance Sheet date. Given the uncertainty regarding the duration, extent and ultimate impact of the COVID-19 pandemic, the Group cannot estimate with any precision the impact on its prospective financial performance and accordingly the impact may be different from that estimated as at the date of approval of restated consolidated financial information. The Group will continue to closely monitor any material changes to future economic conditions.

35 Employee benefit plans

Defined contribution plans

The Company makes Provident Fund and Employee State Insurance Scheme contributions which are defined contribution plans, for qualifying employees. Under the Schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The contributions payable to these plans by the Company are at rates specified in the rules of the schemes.

Particulars	For the eight month period ended	For the year ended		
	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
Contribution to Provident Fund and Employee State Insurance Scheme	39.13	103.65	78.39	68.82

Defined benefit plans

The Company offers gratuity, a defined employee benefit scheme to its employees. The said plan typically exposes the company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk

Investment risk

The fund has invested 100% of the funds in 'Schemes of insurance - conventional products' which are risk averse as whole of the risk is borne by the Insurance company.

Interest risk

The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

Longevity risk

This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligation is not straight forward and depends upon the combination of salary increase, discount rate and vesting criteria. It is important not to overstate withdrawals because in the financial analysis the retirement benefit of a short career employee typically costs less per year as compared to a long service employee.

Salary risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Gratuity: The principal assumptions used for the purposes of the actuarial valuations were as follows:

Actuarial assumptions	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
Discount rate	3.85%	5.00%	6.80%	6.80%

Significant actuarial assumptions for the determination of the defined benefit obligation (DBO) are discount rate and expected salary increase. The sensitivity analysis below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

Particulars	As at			
	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
1 Effect on DBO due to 100 bps increase in Discount Rate	64.07	68.33	47.78	37.51
2 Effect on DBO due to 100 bps decrease in Discount Rate	68.06	72.82	49.93	39.22
1 Effect on DBO due to 100 bps increase in salary escalation rate	67.99	72.78	49.92	39.21
2 Effect on DBO due to 100 bps decrease in salary escalation rate	64.08	68.32	47.78	37.50

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years. There has been no change in the process used by the Company to manage its risks from prior periods.

Expected future cash outflows (undiscounted) towards the plan are as follows:

Expected benefit payments for the year ending	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18
1 year	31.01	34.02	17.45	13.07
2 to 5 year	32.62	35.81	49.57	41.27

37 Phantom Stock Options Scheme

The Board of Directors in their meeting on December 1, 2015 approved the issue of 22,242 Phantom options under the Scheme titled "Phantom Option Scheme 2015 (POS 2015)". The POS 2015 allows the issue of options to the consultants of the Company and its subsidiaries. The option holder is entitled for cash equal to the difference between market value of equity shares of face value Rs. 10/- and the exercise price of each option. On April 1, 2016, the Company granted 22,242 options under said scheme for eligible personnel. Pursuant to the sub-division of equity share of Rs. 10 each into 2 equity shares of Rs. 5 each, the Company had cancelled 22,242 options issued earlier and re-issued 44,484 Phantom options wherein the option holder is entitled for cash equal to the difference between market value of equity shares of face value Rs. 5/- and the exercise price of each option.

Vesting period of each option is three years from the date of grant and all the vested options can be exercised by the option grantee within 60 days from the vesting date or at the time of liquidity event as approved by the Board.

Liability in respect of such options is measured as a difference between the fair value of market price of underlying shares and the exercise price of such options and is recognised over the vesting period on a straight-line basis.

Pursuant to the termination of retainer's agreement by way of mutual consent of the Company and retainers, "Phantom Option Scheme 2015" was withdrawn with the approval of Board of Directors at the meeting dated February 15, 2018 and accordingly, the carrying amount of this liability as on February 15, 2018 amounting to Rs. 20.50 was written-back.

The management assessed that fair value of cash and cash equivalents, trade receivables, loans and trade payables, approximate their carrying amounts largely due to the short-term maturities of these instruments. Difference between carrying amounts and fair values of bank deposits, other financial assets, borrowings and other financial liabilities subsequently measured at amortised cost is not significant in each of the years presented.

Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table presents the fair value measurement hierarchy of financial assets and liabilities measured at fair value on recurring basis

Financial risk management

The Group's activities expose it to a variety of financial risks: credit risk and liquidity risk which may adversely impact the fair value of its financial instruments. The Group has a risk management policy which covers risks associated with the financial assets and liabilities. The focus of risk management committee is to assess the unpredictability of the financial environment and to mitigate potential adverse effects on the financial performance of the company.

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Group is exposed to the credit risk from its trade receivables, investments, cash and cash equivalents, bank deposits and other financial assets. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due. Due to COVID-19 pandemic, the Group's operations have been significantly affected increasing the liquidity risk. The Group also had instances of default in repayment of loans during the eight month period ended November 30, 2020, the details of which are given below. Refer Note 3 for details of measures taken by the management of the Group to address liquidity issues so as to ensure that the Group can meet all its obligations in the normal course of business.

Statement of Adjustments to the Audited Consolidated Financial Statements

Effective April 1, 2019, the Group adopted Ind AS 116 - "Leases", which sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires Lessees to account for leases in a manner similar to accounting for finance leases under erstwhile Ind AS 17. The Group adopted Ind AS 116 using the full retrospective method. Accordingly the comparative figures for each of the years presented in these restated consolidated financial information have been adjusted in accordance with the policy mentioned in Note 3.18 of Notes to Restated Consolidated Financial Information. The cumulative adjustment on application of this Standard has been adjusted to retained earnings as at April 1, 2017.

The following is the summary of practical expedients elected by the Group on the initial application:

- Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly Ind AS 116 is applied to all the lease contracts entered before 1st April, 2018 on the initial date of application of Ind AS 116.
- Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.
- In respect of lease contracts of its outlet premises, the Group has elected not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

The Group has also rectified certain prior period items so as to account for the same in respective years.

3. Summary of significant accounting policies

The Restated Financial Information have been prepared in accordance with the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- (a) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- (b) Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- (c) Level 3 inputs are unobservable inputs for the asset or liability.

3.1 Assessment of Going Concern assumption pursuant to the impact on account of the COVID-19 pandemic:

Assessment of Going Concern assumption in preparation of the special purpose interim standalone financial statements for the eight month period ended November 30, 2020:

The Company has resumed its operations in a phased manner depending on easing of lockdown restrictions and its evaluation of operating scenarios at respective store locations. As on date of approval of these financial statements, the Company had opened substantially all of its outlets and commenced operations.

In order to address the matter of having adequate liquidity in the Company to ensure that the Company can meet all its obligations in the normal course of business, the management of the Company has taken various measures which include the following:

- Continuing focus on outdoor catering and sourcing of customers from third party platforms, its various initiatives to comply with sanitization and social distancing protocols, minimal contact experience through non-touch alternatives and strict adherence to hygiene norms.
- Raising adequate funding through incremental debt from banks with 1 year moratorium for repayment of principal and interest and fresh equity infusion. Subsequent to November 30, 2020, the Company has received funding aggregating to Rs. 1,499.69 Million towards issue of 59,51,132 equity shares of Rs. 5 each.

The Board of directors of the Company have approved the aforesaid business plan and in their assessment, based on due consideration of the business plan, the Company will be able to meet all its obligations in the normal course of business. Accordingly, the Board of directors of the Company have approved the preparation of the special purpose interim standalone financial statements on a going concern basis.

The special purpose interim standalone financial statements do not therefore incorporate adjustments, if any, that may be required in respect of recoverability and classification of asset carrying amounts or the amounts and classification of liabilities, should the Company not continue as a going concern.

3.2 Revenue recognition

Revenue is recognized at an amount that reflects the consideration to which the Company expects to be entitled in exchange for transferring the goods or services to a customer i.e. on transfer of control of the goods or service to the customer.

Revenue from sale of food and beverages is recognized at the time of underlying sale to the customer. Revenue is presented net of discounts given to the customers and any taxes collected from customers for remittance to the government. In case of discount to customers in the form of gift voucher, the value of such discount is determined based on the percentage of redemption in the past. Customer purchases of gift cards are recognized as sales upon redemption of gift card or upon expiry.

Revenue from displays and sponsorships are recognized in the period in which the products or the sponsor's advertisements are promoted/displayed.

Royalty arrangements based on sales are recognised at the time the underlying sales occur.

Government incentives are accrued for based on fulfilment of eligibility criteria for availing the incentives and when there is no uncertainty in receiving the same. These incentives include estimated realisable values/benefits from special import licenses and benefits under Serve From India Scheme.

3.3 Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

3.4 Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Company, liabilities incurred by the Company to the former owners of the acquiree and the equity interests issued by the Company in exchange of control of the acquiree. Acquisition-related costs are generally recognised in Statement of profit and loss as incurred. At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Business combinations involving entities or businesses under common control are accounted for using the pooling of interest method. The assets and liabilities of the combining entities are reflected at their carrying amounts. The difference, if any, between the amount recorded as share

capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve.

3.5 Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. For the purposes of impairment testing, goodwill is allocated to the Company's cash-generating units.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss.

3.6 Property, Plant and Equipment

Property, Plant and Equipment are carried at cost less accumulated depreciation and impairment losses, if any. The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in Statement of profit and loss.

Depreciable amount for assets is the cost of asset less its estimated residual value. Depreciation on tangible assets have been provided on the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The useful life of assets is given below:

Leasehold improvements	Amortised over the period of the lease
Furniture and fittings	10 Years
Plant & machinery	15 Years
Service equipments	10 Years
Computer equipments	3-6 Years
Vehicles	8 Years

3.7 Intangible assets

Acquired Intangible Assets - Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets

Barbeque-Nation Hospitality Limited
Special Purpose Restated Standalone Financial Information

with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Liquor licenses with perpetual term purchased for restaurant chain business: Amortised over the lease term of the respective restaurants

Software and other licenses 3 Years

Brand name Indefinite useful life

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in Statement of profit and loss when the asset is derecognised.

3.8 Investments in subsidiary

Investment in subsidiaries are measured at cost less impairment.

3.9 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Cost of inventories include all costs incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

3.10 Financial Instruments

Financial assets and financial liabilities:

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Initial recognition and measurement:

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

Subsequent measurement:

Financial assets at amortised cost: Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Assets at fair value through other comprehensive Income: Financial assets are measured at fair value through other comprehensive income if these financial assets are held within business model whose objective is achieved by both collecting contractual cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding and selling financial assets.

Financial assets at fair value through profit or loss: Financial assets are measured at fair value through profit or loss unless it measured at amortised cost or fair value through other comprehensive income on initial recognition. The transaction cost directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in the statement of profit and loss.

Financial liabilities

Financial liabilities are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Equity Instrument

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments recognised by the Company are recognised at the proceeds received net off direct issue cost.

Impairment of financial assets (other than at fair value)

The Company assesses at each date of balance sheet, whether a financial asset or a Company of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the twelve-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly, since initial recognition.

Derecognition of financial assets

Barbeque-Nation Hospitality Limited
Special Purpose Restated Standalone Financial Information

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in Statement of profit and loss if such gain or loss would have otherwise been recognised in Statement of profit and loss on disposal of that financial asset.

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Statement of profit and loss.

3.11 Share issue expense

The transaction costs of an equity transaction are accounted for as a deduction from equity to the extent they are incremental costs directly attributable to the equity transaction.

3.12 Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.13 Foreign Currency transactions and translations

The functional currency of the Company is Indian Rupee (Rs.).

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated.

Exchange differences on monetary items are recognised in statement of profit and loss in the period in which they arise except for:

- (a) exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

3.14 Employee Benefits

Defined Contribution Plan

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are recognised as an expense when employees have rendered service entitling them to the contributions.

Defined Benefit Plan

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period. Remeasurement, comprising actuarial gains and losses is recognised in other comprehensive income in the period in which they occur.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date less the fair value of the plan assets out of which the obligations are expected to be settled. Long Service Awards are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

3.15 Share based payment transaction

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in Statement of profit and loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

The Company had formulated Phantom Option Scheme (POS) under which eligible members are granted phantom shares entitling them to receive cash payments for the amounts measured as a difference between market value of share and the exercise price after the completion of specified period from the date of grant. Fair value of such cash-settled options is measured at every reporting date and is recognised as expense to the Statement of Profit and loss over the remaining vesting period on a straight-line basis with a corresponding adjustment recognised as liability.

3.16 Borrowing Costs

Borrowing costs include:

- (a) interest expense calculated using the effective interest rate method,
- (b) finance charges in respect of finance leases, and
- (c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in Statement of profit and loss in the period in which they are incurred.

3.17 Leases

The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. At the date of commencement of the lease, the Company recognizes a right-of-use asset (“ROU”) and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

For arrangements entered into prior to the date of transition to Ind AS, the Company has determined whether the arrangement contains lease on the basis of facts and circumstances existing on the date of transition.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

Further, in respect of lease contracts of its outlet premises, the Company has elected not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

Measurement of the right-of use asset:

At the commencement date, the right-of-use asset is measured at cost and comprises:

Barbeque-Nation Hospitality Limited
Special Purpose Restated Standalone Financial Information

- the amount of the initial measurement of the lease liability, to which is added, if applicable, any lease payments made at or before the commencement date, less any lease incentives received;
- where relevant, any initial direct costs incurred by the lessee for the conclusion of the contract. These are incremental costs which would not have been incurred if the contract had not been concluded;
- estimated costs for restoration and dismantling of the leased asset according to the terms of the contract, through a return obligation liability or provision determined as a discounted amount of the restoration and dismantling costs.

Following the initial recognition, the right-of-use asset is depreciated from the commencement date on a straight-line basis over the lease term. Right-of-use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

Measurement of the lease liability

At the commencement date, the lease liability is recognized for an amount equal to the present value of the lease payments over the lease term.

Amounts involved in the measurement of the lease liability are:

- fixed payments (including in-substance fixed payments; meaning that even if they are variable in form, they are in-substance unavoidable);
- variable lease payments that depend on an index or a rate, initially measured using the index or the rate in force at the lease commencement date;
- amounts expected to be payable by the lessee under residual value guarantees;
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

The lease liability is subsequently measured based on a process similar to the amortized cost method using the discount rate:

- the liability is increased by the accrued interests resulting from the discounting of the lease liability, at the beginning of the lease period;
- less payments made. The interest cost for the period as well as variable payments, not taken into account in the initial measurement of the lease liability and incurred over the relevant period are recognized as costs.

In addition, the lease liability may be remeasured in the following situations:

- change in the lease term,
- modification related to the assessment of the reasonably certain nature (or not) of the exercise of an option,
- remeasurement linked to the residual value guarantees,
- adjustment to the rates and indices according to which the rents are calculated when rent adjustments occur.

Barbeque-Nation Hospitality Limited
Special Purpose Restated Standalone Financial Information

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The Company has elected to apply the practical expedient of not assessing the rent concessions as a lease modification, as per MCA notification dated 24th July 2020 on IND- AS 116 for all rent concessions which are granted due to COVID-19 pandemic. As per requirements of MCA notification, rent concessions confirmed for the period ended November 30, 2020 have been accounted as Other Income.

3.18 Income Taxes

Income tax expense represents the sum of the tax currently payable and deferred tax. Income tax expense for the interim period is recognised based on the best estimate of the weighted average annual income tax rate expected for the full financial year 2020-21.

Current tax: The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the Standalone statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax: Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the period

Current and deferred tax are recognised in Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

3.19 Provisions and Contingent Liabilities

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

3.20 Impairment of non-financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

3.21 Earnings per share (EPS)

Basic earnings per share are computed by dividing statement of profit and loss attributable to equity shareholders of the company by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares considered for deriving basic EPS and also weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

3.22 Operating Cycle

Barbeque-Nation Hospitality Limited
Special Purpose Restated Standalone Financial Information

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

3.23 Use of estimates and judgements

In the application of the Company's accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

Impairment of investments made and loans given to subsidiaries

The Company reviews its carrying value of investments made and loans given to subsidiaries at cost, annually, or more frequently when there is an indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the Company's operations taking into account the location of the underlying asset and the availability of suitable alternatives.

Useful lives of property, plant and equipment

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Provision for site restoration obligations:

The Company has recognised provision for site restoration obligation associated with the stores opened. In determining the value of the provision, assumptions and estimates are made in respect of the expected cost to dismantle and remove the furniture/fixtures from the stores and the expected timing of those costs.

Uncertain tax positions

The Company's current tax provision relates to management's assessment of the amount of tax payable on open tax positions where the liabilities remain to be agreed with relevant tax authorities. Uncertain tax items for which a provision is made relate principally to the interpretation of tax legislation applicable to arrangements entered into by the Company. Due to the uncertainty associated with such tax items, it is possible that, on conclusion of open tax matters at a future date, the final outcome may differ significantly.

3.24 Standards issued and effective

The new and amended standards that are notified and are effective, up to the date of issuance of the special purpose restated standalone financial information are disclosed below.

(i) Amendments to Ind AS 103 Business Combinations:

The amendments to the definition of a business in Ind AS 103 help entities determine whether an acquired set of activities and assets is a business or not. They clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test.

These amendments are applicable to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after the 1 April 2020 and to asset acquisitions that occur on or after the beginning of that period. These amendments are not applicable to the Company's special purpose restated standalone financial information.

(ii) Amendments to Ind AS 1 and Ind AS 8: Definition of Material:

The amendments to Ind AS 1 Presentation of Financial Statements and Ind AS 8 Accounting Policies, Changes in Accounting Estimates and Errors align the definition of 'material' across the standards and clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity. The amendments clarify that materiality will

depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements.

A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

These amendments are applicable prospectively for annual periods beginning on or after the 1 April 2020. The amendments to the definition of material do not have a significant impact on the Company's special purpose restated standalone financial information.

(iii) Amendments to Ind AS 107 and Ind AS 109: Interest Rate Benchmark Reform

The amendments to Ind AS 109 Financial Instruments: Recognition and Measurement provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

The amendments to Ind AS 107 prescribe the disclosures which entities are required to make for hedging relationships to which the reliefs as per the amendments in Ind AS 109 are applied. These amendments are applicable for annual periods beginning on or after the 1 April 2020. These amendments are not applicable to the Company's special purpose restated standalone financial information.

The recoverable amount of the above cash generating units have been determined based on a value in use approach by considering cash flow projections approved by the management. The following inputs have been used for arriving the said recoverable amount.

Growth rate	2.00%	2.00%	4.00%	5.00%

The carrying value of brand referred in Note 7 and the goodwill referred above have been allocated to the business of operating restaurant outlets, which is considered cash generating unit by the Company for the purpose of impairment assessment. The recoverable amount of the above cash generating unit has been determined based on 'Value in use' model, wherein, the value of cash generating unit is determined as a sum of the net present value of the projected post tax cash flows for a period of 4 to 5 years and terminal value. The terminal value of each cash generating unit is arrived at by extrapolating cash flows of latest forecasted year to perpetuity using a constant long term growth rate. The Directors and the Management have assessed and concluded that the reasonably possible change in the key assumptions would not result in carrying amount of brand and goodwill to exceed the aggregate of their recoverable amounts.

These estimates and assumptions, primarily include, but are not limited to, the revenue growth and profitability during the forecast period, the discount rate and the terminal growth rate.

For its impairment assessment as at November 30, 2020 and as at March 31, 2020, the management has assessed the impact of the Covid 19 on the operations and forecasted cash flows. The following inputs have been used for arriving the said recoverable amount.

- H** As explained in Note 3, the impact of the COVID-19 pandemic and the measures put in place to control the spread of virus, have triggered significant disruptions to the Company's operations. The management has considered external and internal information in assessing the impact of COVID - 19 pandemic on its financial statements, including recoverability of its assets as at the Balance Sheet date. Given the uncertainty regarding the duration, extent and eventual outcome of the impact of the COVID-19 pandemic, the Company cannot estimate with any precision, the impact on its prospective financial performance and accordingly the eventual outcome of the impact may be different from that estimated as at the date of approval of these financial statements.

Defined benefit plans

The Company offers gratuity, a defined employee benefit scheme to its employees. The said plan typically exposes the company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk

Barbeque-Nation Hospitality Limited

Notes to Special Purpose Restated Standalone Financial Information
(Amount in Rupees Millions except for share data or as otherwise stated)

Note
No.

Investment risk

The fund has invested 100% of the funds in 'Schemes of insurance - conventional products' which are risk averse as whole of the risk is borne by the Insurance company.

Interest risk

The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

Longevity risk

This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligation is not straight forward and depends upon the combination of salary increase, discount rate and vesting criteria. It is important not to overstate withdrawals because in the financial analysis the retirement benefit of a short career employee typically costs less per year as compared to a long service employee.

Salary risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Gratuity: The principal assumptions used for the purposes of the actuarial valuations were as follows:

Actuarial assumptions	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18

2 Effect on DBO due to 100 bps decrease in salary escalation rate	59.07	63.98	47.78	36.91

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years. There has been no change in the process used by the Company to manage its risks from prior periods.

Expected future cash outflows (undiscounted) towards the plan are as follows:

Expected benefit payments for the year ending	30-Nov-20	31-Mar-20	31-Mar-19	31-Mar-18

The management assessed that fair value of cash and cash equivalents, trade receivables, loans and trade payables, approximate their carrying amounts largely due to the short-term maturities of these instruments. Difference between carrying amounts and fair values of bank deposits, other financial assets, borrowings and other financial liabilities subsequently measured at amortised cost is not significant in each of the periods presented.

Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table presents the fair value measurement hierarchy of financial assets and liabilities measured at fair value on recurring basis

Financial risk management

The company's activities expose it to a variety of financial risks: credit risk, liquidity risk and price risks which may adversely impact the fair value of its financial instruments. The company has a risk management policy which covers risks associated with the financial assets and liabilities. The focus of risk management committee is to assess the unpredictability of the financial environment and to mitigate potential adverse effects on the financial performance of the company.

Statement of Adjustments to the Audited Standalone Financial Statements

Effective April 1, 2019, the company adopted Ind AS 116 - "Leases", which sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires Lessees to account for leases in a manner similar to accounting for finance leases under erstwhile Ind AS 17. The company adopted Ind AS 116 using the full retrospective method. Accordingly the comparative figures for each of the years presented in these restated consolidated financial information have been adjusted in accordance with the policy mentioned in Note 3.17 of Notes to Restated Standalone Financial Information. The cumulative adjustment on application of this Standard has been adjusted to retained earnings as at April 1, 2017.

The following is the summary of practical expedients elected by the Company on the initial application:

- Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly Ind AS 116 is applied to all the lease contracts entered before 1st April, 2018 on the initial date of application of Ind AS 116.
- Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.
- In respect of lease contracts of its outlet premises, the company has elected not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

The company has also rectified certain prior period items so as to account for the same in respective years.

Overview

We own and operate Barbeque Nation Restaurants, one of India's leading casual dining restaurant chains (in terms of outlet count as of September 30, 2020) according to the Technopak Report, and International Barbeque Nation Restaurants. We also own and operate Toscano Restaurants and UBQ by Barbeque Nation. The first Barbeque Nation Restaurant was launched in 2006 by SHL, one of our promoters. We launched our first Barbeque Nation Restaurant in 2008, and subsequently acquired five Barbeque Nation Restaurants owned by SHL in 2012. We have steadily grown our owned and operated Barbeque Nation Restaurant network from a single restaurant in 2008 to 147 Barbeque Nation Restaurants (including opened, temporarily closed and under construction outlets) across 77 cities in India and six International Barbeque Nation Restaurants in three countries outside India as of December 31, 2020. We own 61.35% of the equity share capital on a fully diluted basis of one of our Subsidiaries, Red Apple, which owns and operates nine restaurants under the brand name, "Toscano", a casual dining Italian restaurant chain and operates one restaurant each under the brand names "La Terrace" and "Collage" respectively. The first Toscano Restaurant commenced operations in June 2008 and, as of December 31, 2020, we operated eleven Italian Restaurants, nine of which are under the brand name "Toscano", in three cities in India. In November 2018, we launched UBQ by Barbeque Nation to provide *a la carte* Indian cuisine in the value segment. At present, UBQ by Barbeque Nation predominantly caters to the delivery segment.

We believe the value we offer, the nature and quality of our food offerings and the ambience and service of our restaurants create a one-of-a-kind overall customer experience. Through our Barbeque Nation Restaurants, we pioneered the format of ‘over the table barbeque’ concept in Indian restaurants according to the Technopak Report. Live grills embedded in dining tables allow our guests to grill their own barbeques. We believe our Barbeque Nation Restaurants, compared to other fixed price dining options, offer competitive attractions such as a wide range of vegetarian and non-vegetarian appetisers and main courses, a popular dessert menu, a pleasant and casual dining environment and prompt service thereby making it a popular destination for celebrations. We also periodically run popular food festivals at our Barbeque Nation Restaurants offering our guests a range of Indian, international and fusion cuisines.

We diversified into another brand pursuant to our acquisition of 61.35% of the equity share capital on a fully diluted basis of Red Apple, which operates 11 Italian Restaurants in three cities in India, namely Bengaluru, Chennai and Pune. Of the Italian Restaurants operated by us as of December 31, 2020, three Toscano Restaurants were opened since March 31, 2019 and four Toscano Restaurants were opened in the three Fiscals immediately preceding Fiscal 2019. Our acquisition of Red Apple has enabled us to diversify our brand, cuisine and customer segment beyond our flagship concept of ‘over the table barbeque’.

UBQ by Barbeque Nation provides *a la carte* Indian cuisine in the value segment, initially through leading food delivery service providers for the delivery of our food. As of December 31, 2020, we were providing delivery in 77 cities in India of *a la carte* Indian cuisine under UBQ by Barbeque Nation from our existing kitchen infrastructure.

According to Technopak, the Chain Casual Dining market in India has been flourishing over the last few years. The Chain CDR segment represents the 2nd largest share in the chain food services market in India after QSR. In FY 2020, the size of the Chain Casual Dining market is estimated at ₹134 billion. The segment is expected to grow at a healthy CAGR of 18% to reach ₹302 billion by FY 2025. Our Barbeque Nation Restaurants have experienced steady growth in the number of covers over the last three Fiscals, and the proportion of total revenues from weekday sales and lunch covers at Barbeque Nation Restaurants is relatively higher as compared with the industry average according to the Technopak Report. We carefully choose the locations of our Barbeque Nation Restaurants with the objective of keeping our rent to potential revenue ratio low.

We believe our offering format positions us to capitalise on both the robust growth trend of the CDR market in India and the broader chain restaurant market within the food and services industry. The numbers of covers at Barbeque Nation Restaurants as well as our Company’s revenues have grown consistently as our Barbeque Nation Restaurants have matured, particularly after being in operation for more than two years. For example, the number of in-dining covers at our Barbeque Nation Restaurants in India has grown from 6.86 million in Fiscal 2017 to 9.92 million in Fiscal 2020 at a CAGR of 13.08%. Further, out of the 147 Barbeque Nation Restaurants owned and operated by us in India as of December 31, 2020, 24 Barbeque Nation Restaurants were opened between March 31, 2019 and December 31, 2020 and 71 Barbeque Nation Restaurants have been opened since April 1, 2017. Consequently, we believe we are in a strong position to monetise the benefits of our expansion in the past few Fiscals. We also intend to leverage our experience, together with that of the management team at Red Apple, to expand Toscano Restaurants to other Metro and Tier I cities.

Our core values prioritise being customer-focused to provide excellent products and service and employee-focused by maintaining a superior quality work environment. Our Company places a strong emphasis on customer reviews and feedback and our Barbeque Nation Restaurants use our in-house call centre to obtain customer feedback for our Barbeque Nation Restaurants in accordance with our internally devised and managed Guest Satisfaction Index (“GSI”). Our Barbeque Nation Restaurants use two cloud-based systems: the Central Reservation System (“CRS”) and the Central Feedback System (“CFS”). We also accept reservations for our Barbeque Nation Restaurants through our revamped smartphone application ‘BBQ App’, Facebook chat messenger, chat-bot and other reservation platforms. We have integrated “Business Insights”, our in-house business intelligence software, which allows us to track restaurant wise data (operational and financial) for our Barbeque Nation Restaurants at a granular level and it has a direct interface with the enterprise resource planning system of the Barbeque Nation Restaurants.

Our Company was ranked amongst the top 10 retail companies to work for by Great Place to Work Institute in 2020 in collaboration with the Retailers Association of India and was ranked number 7 amongst India’s best companies to work for in 2020 by the Great Place to Work Institute in collaboration with Economic Times.

In Fiscals 2018, 2019, 2020 and for the eight months ended November 30, 2020, our total consolidated revenues from continuing operations were ₹5,904.48 million, ₹7,425.41 million, ₹8,507.94 million and ₹2,366.08 million, our consolidated EBITDA from continuing operations was ₹1,403.68 million, ₹1,493.87 million, ₹1,680.39 million and ₹125.91 million, and our Adjusted EBITDA from continuing operations was ₹823.94 million, ₹777.31 million, ₹782.48 million and ₹(521.69) million, respectively.

Our standalone total revenue, EBITDA and Adjusted EBITDA have changed from ₹5,763.04 million, ₹1,443.93 million and ₹904.45 million respectively, in Fiscal 2018 to ₹7,903.58 million, ₹1,595.47 million and ₹809.06 million respectively, in Fiscal 2020, at a CAGR of 17.11%, 5.12% and (5.42%), respectively. In Fiscals 2018, 2019 and 2020 and for eight months ended November 30, 2020, our total standalone revenues were ₹5,763.04 million, ₹7,076.29 million, ₹7,903.58 million and ₹2,087.91 million, our standalone EBITDA was ₹1,443.93 million, ₹1,653.29 million, ₹1,595.47 million and ₹99.16 million and our Adjusted EBITDA was ₹904.45 million, ₹1,011.23 million, ₹809.06 million and ₹(455.32) million, respectively. The Company also had negative net working capital in Fiscals 2018, 2019, 2020 and for eight months ended November 30, 2020.

EBITDA and Adjusted EBITDA presented in this Red Herring Prospectus is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, IFRS or US GAAP. Furthermore, EBITDA and Adjusted EBITDA are not measurements of our financial performance or liquidity under Ind AS, IFRS or US GAAP and should not be considered as alternatives to net profit/loss, revenue from operations or any other performance measures derived in accordance with Ind AS, IFRS or US GAAP or as an alternative to cash flow from operations or as a measure of our liquidity. In addition, EBITDA and Adjusted EBITDA are not standardised terms, hence a direct comparison of EBITDA and Adjusted EBITDA between companies may not be possible or meaningful. Other companies may calculate EBITDA and Adjusted EBITDA differently from us, thereby limiting its usefulness as a comparative measure.

Significant Factors Affecting our Results of Operations

The following is a discussion of certain factors that have had, and will continue to have, a significant effect on our financial results:

COVID-19

The World Health Organization declared the outbreak of COVID-19 a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. Further, on March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. The outbreak of COVID-19, as well as GoI measures to reduce the spread of COVID-19, have had a substantial adverse impact on our restaurant operations since March 2020, and the timing of how long the COVID-19 pandemic will last is still uncertain. In addition, our restaurants in different states and regions in India have been disproportionately affected by COVID-19 and the measures implemented in each state have varied due to regional and regulatory differences in each state in India. As a result of COVID-19, we have had to temporarily close a number of restaurants across India commencing from March 2020 and have experienced reduced store-level operations, including reduced operating hours and restaurant closures. During the initial stage of the COVID-19 crisis, footfalls and sales in our restaurants fell significantly due to the lockdown and other measures implemented by the GoI. Our footfalls and sales have since started to recover, although not yet to levels we saw prior to the COVID-19 crisis. As of the date of filing of this RHP, our restaurants in 77 cities across India have reopened, often with limited operations. As of the date of the filing of this RHP, the majority of our restaurants have opened for dine-in guests, however, the capacity may be limited, based on local regulations. In addition, the COVID-19 pandemic has directly impacted our same-store sales in our restaurants. The reduction in the level of business activity due to the COVID-19 crisis has also led to write offs of food inventory and a reduction in orders with our suppliers since our inventory includes food items which are perishable in nature. Similarly, our corporate offices also experienced closures and certain employees have been restricted from commuting to their places of work.

Our sales have recovered month on month post lockdown and easing of various supply side restrictions like restrictions on operating hours, restrictions on operational capacity and restrictions on sales of liquor. While some of these restrictions have eased across a few states, we continue to face some restrictions across some cities. The recovery of our monthly sales has been driven both by an increase in dine-in sales and delivery sales. Our consolidated sales of food and beverages over the last few months post lockdown are as follows:

	Monthly Sales* (₹ million) Fiscal 2020 (A)	Monthly Sales* (₹ million) Fiscal 2021 (B)	Fiscal 2021 Monthly Sales* as a % of Fiscal 2020 Monthly Sales* (B/ A)	Month-on-month growth (%) in Fiscal 2021	Number of restaurants operational for dine-in at the end of each month during Fiscal 2021 (C)	Average Daily Sales per restaurants (in ₹) (D = B / (C x N**))

* Monthly Sales means the consolidated sales of food and beverages

**Where N for a particular month is equal to the number of days for that month.

Note: Monthly Sales from restaurants operated by Red Apple have been consolidated in the table above from January 2020 since Red Apple became a subsidiary of the Company with effect from December 31, 2019. Red Apple operates 11 Italian Restaurants and hence, the comparison for the period between April and December of Fiscal 2020 with the corresponding period in Fiscal 2021 may not be comparable to such extent. The calculations set out in the table above are subject to rounding differences.

We have undertaken various cost optimisation efforts such as seeking rent reliefs from our landlords, renegotiating our commercial terms, temporarily reducing senior management salaries and realigning store operating costs and structures. As of December 31, 2020, we had 7,298 full time employees in our Company and its Subsidiaries as against 9,620 full time employees as on February 29, 2020.

The financial impact of COVID-19 has had, and is expected to continue to have, an adverse effect on our liquidity, and we are seeking appropriate sources of liquidity in order to sustain our business throughout this crisis. This also led to temporary delays in compliance with our payment obligations to our lenders and payment of our statutory dues. We have recently completed a private placement of Equity Shares for an aggregate consideration of ₹1,499.69 million. We have also engaged in rent relief negotiations with our landlords and arrived at negotiated agreements with respect to reductions in rent and our rental obligations during the COVID-19 pandemic with a large proportion of them. In addition, the salaries of senior management and certain other support centre employees were reduced temporarily. We have also negotiated revised commercial terms during the COVID-19 pandemic with some of our other service providers, and we have managed our inventory through promotions, reorganisation and liquidation of stocks. This has provided us with working capital support and additional liquidity. However, depending on how long the COVID-19 pandemic lasts, we may need to seek additional sources of liquidity. The COVID-19 pandemic is adversely affecting the availability of liquidity generally in the credit markets, and there can be no assurance that additional liquidity from other sources will be available to us on favourable terms, or at all, especially the longer the COVID-19 pandemic lasts or if it were to worsen. While we cannot currently estimate the duration or the future negative financial impact of the COVID-19 pandemic on our business, we expect the negative effects to continue beyond the fourth quarter of Fiscal 2021.

Customer spending and general economic and market conditions

Our success depends to a significant extent on customer confidence and spending, which is influenced by general economic condition and discretionary income levels. Many factors affect the level of customer confidence and spending in the overall food services market and the casual dining market, including recession, inflation, deflation, political uncertainty, availability of consumer credit, taxation, stock market performance and unemployment. Our performance may decline during recessionary periods or in other periods where one or more macro-economic factors, or potential macro-economic factors, negatively affect the level of customer confidence and spending including the amount that consumers spend on eating out and our restaurants' cover turnaround.

Urbanisation rate may also influence our financial results as most of our customers are currently concentrated in the urban areas. Developments in the economy and the rate of urbanisation have in the past increased the supply and demand and affected pricing trends in food service market in the cities and the regions where we operate or intend to operate. We believe that this factor will continue to impact our business, financial condition, results of operations and prospects.

In addition, an increasing number of government and media initiatives to create increased awareness of healthy eating could have an impact on the public's perception of casual dining, and customers may turn to our competitors offering healthier food options such as lower calorie meals, which could adversely affect our business, financial condition, results of operations and prospects.

Furthermore, our business and results of operations to a large extent also depend on our ability to respond to changing trends. The experimental Indian consumer is becoming increasingly demanding and gets bored with one type restaurant/ concept/ food very fast and is continually looking for different options and newer concepts. We will need to keep up with continuous innovation in terms of formats, themes and products to attract and retain customers. The success of our business depends on our ability to anticipate the tastes of customers and to offer products and services that appeal to their preferences.

Number of restaurants and results of their operation

We generate a majority of our revenue from food and beverages sales at our restaurants. Accordingly, our revenues are affected to a significant extent by the number of restaurants we have in operation.

A new restaurant generally experiences lower results of operations due to initially lower sales and higher start-up operating costs. For example, the daily average revenue per restaurant for our Barbeque Nation Restaurants which commenced operations prior to the start of Fiscal 2020 was ₹167,758 for Fiscal 2020, while the daily average revenue per restaurant for our Barbeque Nation Restaurants newly added during Fiscal 2020 was ₹115,828 for Fiscal 2020. Further, the location of a new restaurant is an important factor affecting the restaurant's business and results of operations and the length of its ramp-up period.

Restaurants incur various costs and expenses before they open and newly opened restaurants typically incur materially greater operating costs during the first few months of their operations. Therefore, new restaurants may temporarily lower our results of operations on a per restaurant basis.

Cost of materials (food and beverages)

Cost of food and beverages consumed is the largest component of our expenses, representing 33.51% 33.35%, 34.34% and 32.30% of our total consolidated revenue from continuing operations, in Fiscals 2018, 2019 and 2020 and in the eight months ended November 30, 2020, respectively. Therefore, any change in the market prices of food and beverages will have a significant and direct impact on our profitability. Our APC in Fiscals 2018, 2019 and 2020 and in the eight months ended November 30, 2020 at consolidated level was ₹750, ₹793, ₹789 and ₹809 respectively and on a standalone basis was ₹741, ₹777, ₹764 and ₹762 respectively (excluding revenues from UBQ and taxes). Our cost of food and beverages is also impacted by the quality of food and beverages we offer in our restaurants. Our results of operations are therefore affected by our on-going ability to procure and prepare quality food and beverage offerings at an optimum price.

Our supply arrangements (see section “*Our Business – Suppliers and Purchasing Practices*” on page 216 of this Red Herring Prospectus) have a direct impact on our results of operations. Our cost of food and beverages is therefore impacted by our relationships with our suppliers. As a casual dining operator in India, we believe we are also a key customer for many of our suppliers. This has historically enabled us to negotiate discounts and other favourable terms in contracts with our suppliers. Such favourable terms can help reduce our cost of materials and can therefore help improve our gross margin. In addition, we maintain more than one supplier for each of our key ingredients, including meat, chicken, seafood, rice and vegetables, which we believe can help mitigate price volatility. Given the increase in the number of restaurants in our network and scale of operations, we have increased our efforts to centralise supply sources by having national and regional level vendor management and supplies and consequently, enhance our bargaining power with suppliers.

In addition, we reduce cost of materials by controlling and reducing food wastage in the restaurants. We have adopted an inventory model for some of our raw materials such as fruits and vegetables and have reduced the holding period over time. We follow forecast and projection methods to ensure our production volumes are in accordance with our sale volumes.

Effectiveness of marketing strategies

We devote significant attention to our brand-building efforts. Our advertising strategy is centred on increasing our brand awareness, complemented with certain promotions and festivals from time to time. We use a variety of media to convey our advertising, including internet, radio, direct marketing and other unconventional media, such as short message services and social networking sites, to optimise our media plan and coverage of target demographic profiles. We also believe in word of mouth marketing by delivering good food and service to our customers. We plan on continuing to build our brand and retail sales by satisfying consumer preferences for fresh, wholesome, flavourful food and an affordable casual dining experience typically expected only in a five-star hotel setting. In Fiscals 2018, 2019 and 2020 and in the eight months ended November 30, 2020, we spent at consolidated level ₹99.34 million, ₹174.37 million, ₹174.28 million and ₹31.86 million, respectively, on business promotion, which represented 1.68%, 2.35%, 2.05% and 1.35% of our total consolidated revenue in respect of continuing operations for the corresponding years/period, respectively.

Digital marketing is becoming more and more important in business operations. We launched a chat bot in January 2017 to address enquiries by consumers and to reserve tables through social networking sites. It also lets users enquire about locations and pricing and answers queries about ongoing festivals and menus. Table reservations can be made by simply sending a message on social networking sites. We also enable our consumers to make online reservations through other online reservation platforms. We have recently revamped our smartphone application to make it more user friendly and interactive. We intend to continue developing such mechanism/platform to interact with the consumer in real time and accelerate easy interaction with our customers.

We have also launched a loyalty programme for our customers, “Smiles” in which we provide reward points to our customers which can be redeemed at our Barbeque Nation restaurant. Under our Smiles Loyalty program, we currently provide 5% of the bill value (subject to certain terms and conditions) to our customers as Smiles points which can be redeemed within a defined timeline during the customer’s next dine-in visit or delivery order from our BBQ App or website. In the month of February 2020, only 0.8% of our customer bills reflected the redemption of Smiles points but this has grown to 9.6% of our customer bills for the month of December 2020. As of January 24, 2021, our average rating of the BBQ App on an internet app store was 4.5 out of 5.0.

Employee benefits expenses

Restaurant operations are highly service-oriented, and consequently, our success, to a considerable extent, depends upon our ability to attract, motivate and retain a sufficient number of qualified employees, including restaurant managers and restaurant staff. We offer competitive wages and benefits to our restaurant employees to manage employee attrition. Employee remuneration includes wages, salaries and bonuses paid to employees at our restaurants, as well as employee benefits such as employee accommodation, medical insurance and contributions to provident funds. These costs are subject to certain factors that are out of our control, including amendments to the minimum wage laws and other employee benefit laws in India.

In addition, for Fiscal 2018, 2019 and 2020 and for the eight months ended November 30, 2020, these costs were primarily affected by the opening of new restaurants, hiring of additional restaurant staff and annual salary increments. The salary level of employees in the consumer food services industry in India has been rising in recent years. In addition, when we open new restaurants, we typically have to hire staff approximately 30-60 days in advance of the restaurant opening and consequently we normally incur obligations to pay wages for the hired staff of those restaurants before they begin to generate revenue.

Our expenses related to employee benefits as a percentage of total consolidated revenue in respect of continuing operations, was 21.29% in Fiscal 2018, 22.62% in Fiscal 2019, 23.21% in Fiscal 2020 and 30.12% in the eight months ended November 30, 2020. In Fiscals 2018, 2019 and 2020 and in the eight months ended November 30, 2020, we opened 23, 24, 21 and 2 new Barbeque Nation Restaurants, respectively. As of December 31, 2020, we had 7,298 full-time employees on a consolidated basis. We expect our restaurant wages and related expenses, in absolute terms, to continue to increase as inflationary pressures in India, drive up wages and as we continue to increase the number of our restaurants.

We believe the resulting upward pressure on our expenses related to employee benefits as a percentage of total revenue from operations could be mitigated by (i) our increasing operating leverage expected from the use of commissaries as our restaurant network expands, (ii) keeping the number of staff requirements as static, which will be based on table turn and helps us to mitigate the cost escalation to certain extent, (iii) hiring interns and part-time employees, (iv) tracking numbers of employees in each restaurant and (v) effective management of operations to reduce the number of employees in each restaurant.

Rent including lease rentals

We lease properties for all the restaurants operated by us and intend to continue to do so. In order to grow our business operations, we must identify suitable and available restaurant locations and successfully negotiate and finalise the terms of leases at such location. Our inability to identify suitable new restaurant locations at reasonable rentals, or a general increase in commercial real estate rentals in India, particularly in cities where we have significant operations, would negatively impact the growth of our revenue and profit.

We generally enter into long-term lease agreements or license agreements that have an initial term that typically ranges from a period of five to 19 years for our Barbeque Nation restaurants in India and overseas and five to 15 years for our Toscano Restaurants. Some of our lease/license agreements also grant us the right of renewal upon expiration of the current term. We enter into three types of leases depending on location and commercial viability: fixed rental leases, revenue sharing leases with a minimum guarantee and revenue sharing leases without a minimum guarantee. Our rental payments in respect of our revenue sharing leases (both with and without a minimum guarantee) are determined as a percentage of sales as defined by the terms of the applicable lease agreement. As a percentage of our consolidated total revenue, our rent (including lease rentals) expenses were 10.58%, 11.63%, 12.46% and 18.26% in Fiscals 2018, 2019 and 2020 and in the eight months ended November 30, 2020, respectively. In Fiscal 2018, due to a change in law, our GST payment on rent increased to 18% due to the unavailability to input tax credit and, accordingly, our rent increased.

Seasonality

Certain aspects of our businesses are subject to seasonal factors that can impact our results of operations. We typically experience slightly higher revenue from operations during the second half of our financial year than during the first half of our financial year resulting from the festive season including Diwali, Christmas, Dussehra and New Year. Certain of our restaurants, particularly those with outdoor seating or in areas with high tourist traffic, enjoy higher income from operations during the winter months than during the summer months.

Competition

We compete in India with national and regional restaurant chains. In addition, we compete with smaller restaurant chains as well as individual restaurants within the cities in which we operate. We also face competition from companies replicating our restaurant concepts at lower costs. Due to increased competition, we could experience

downward pressure on prices, lower demand for our products, reduced margins, an inability to take advantage of new business opportunities and a loss of market share, all of which may have an adverse impact on our business, results of operations, financial condition and prospects.

We also compete on a broader scale with casual dining and other international, national, regional and local food service businesses. The overall food service markets, particularly the casual dining market, are highly competitive with respect to food quality, price, service, convenience and concept. Furthermore, technology and digitisation are making our operating environment more competitive. The offers, incentives, product information, and promotions can be communicated in real time. Restaurant operators are also able to see feedbacks and reviews generated by consumers instantly and are able to take immediate corrective actions and carry out recoveries. We also compete with other businesses for management, staff and restaurant locations. Difficulty in securing suitable management, staff and suitable restaurant locations may have an adverse impact on our business, results of operations, financial condition and prospects.

Significant Accounting Policies

Our significant accounting policies are those that we believe are the most important to the portrayal of our financial condition and results of operations and that require our management's most difficult, subjective or complex judgements. In many cases, the accounting treatment of a particular transaction is specifically dictated by applicable accounting policies with no need for the application of our judgement. In certain circumstances, however, the preparation of financial statements in conformity with applicable accounting policies requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent assets and liabilities at the end of the reporting period. Actual results could differ from those estimates. We base our estimates on historical experience and on various other assumptions that our management believes are reasonable under the circumstances. However, significant accounting estimates are reflective of significant judgements and uncertainties and are sufficiently sensitive to result in materially different results under different assumptions and conditions. We believe that our significant accounting estimates are those described below.

Basis of Preparation of Financial Information

Our Restated Consolidated Financial Information and Special Purpose Restated Standalone Financial Information has been prepared in accordance with the IndAS to comply with the Accounting Standards specified under Section 133 and the relevant provisions of the Companies Act, 2013. Accordingly, we have made adjustments to the Restated Consolidated Financial Information and Special Purpose Restated Standalone Financial Information for the change in our accounting policy retrospectively in respective financial years to reflect the same accounting treatment as per changed accounting policy for all the reporting periods and after incorporating adjustment for the material amounts in the respective financial years to which they relate. There were no extraordinary items that

need to be disclosed separately and there were no qualifications in the audit report of our consolidated financial statements for the respective years requiring adjustment.

Revenue Recognition

Revenue is recognized at an amount that reflects the consideration to which the Company expects to be entitled in exchange for transferring the goods or services to a customer i.e. on transfer of control of the goods or service to the customer.

Food and beverages

Revenue from sale of food and beverages is recognized at the time of underlying sale to the customer. Revenue is presented net of discounts given to the customers and any taxes collected from customers for remittance to the government. In case of discount to customers in the form of a gift voucher, the value of such discount is determined based on the percentage of redemption in the past. Customer purchases of gift cards are recognized as sales upon redemption of gift card or upon expiry.

Displays and sponsorships

Revenue from displays and sponsorships are recognized in the period in which the products or the sponsor's advertisements are promoted/ displayed.

Royalty

Royalty arrangements based on sales are recognised at the time the underlying sales occur.

Government incentives

Government incentives are accrued for based on fulfilment of eligibility criteria for availing the incentives and when there is no uncertainty in receiving the same. These incentives include estimated realisable values/benefits from special import licenses and benefits under Serve From India Scheme.

Employee Benefits

Our employee benefits include provident fund, employee state insurance scheme, gratuity fund and compensated absences.

Defined contribution plan

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are recognised as an expense when employees have rendered service entitling them to the contributions.

Defined benefit plans

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period. Remeasurement, comprising actuarial gains and losses is recognised in other comprehensive income in the period in which they occur.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

- a. in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- b. in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date less the fair value of the plan assets out of which the obligations are expected to be settled. Long Service Awards are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

Leases

The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. At the date of commencement of the lease, the Company recognizes a right-of-use asset (“**ROU**”) and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

For arrangements entered into prior to the date of transition to Ind AS, i.e., April 1, 2016, the Company has determined whether the arrangement contains lease on the basis of facts and circumstances existing on the date of transition.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

Further, in respect of lease contracts of its outlet premises, the Company has elected not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

Measurement of the right-of use asset:

At the commencement date, the right-of-use asset is measured at cost and comprises:

- the amount of the initial measurement of the lease liability, to which is added, if applicable, any lease payments made at or before the commencement date, less any lease incentives received;
- where relevant, any initial direct costs incurred by the lessee for the conclusion of the contract. These are incremental costs which would not have been incurred if the contract had not been concluded;
- estimated costs for restoration and dismantling of the leased asset according to the terms of the contract, through a return obligation liability or provision determined as a discounted amount of the restoration and dismantling costs.

Following the initial recognition, the right-of-use asset is depreciated from the commencement date on a straight-line basis over the lease term. Right-of-use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

Measurement of the lease liability

At the commencement date, the lease liability is recognized for an amount equal to the present value of the lease payments over the lease term.

Amounts involved in the measurement of the lease liability are:

- fixed payments (including in-substance fixed payments; meaning that even if they are variable in form, they are in-substance unavoidable);
- variable lease payments that depend on an index or a rate, initially measured using the index or the rate in force at the lease commencement date;
- amounts expected to be payable by the lessee under residual value guarantees;
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

The lease liability is subsequently measured based on a process similar to the amortized cost method using the discount rate:

- the liability is increased by the accrued interests resulting from the discounting of the lease liability, at the beginning of the lease period;
- less payments made. The interest cost for the period as well as variable payments, not taken into account in the initial measurement of the lease liability and incurred over the relevant period are recognized as costs.

In addition, the lease liability may be remeasured in the following situations:

- change in the lease term,
- modification related to the assessment of the reasonably certain nature (or not) of the exercise of an option,
- remeasurement linked to the residual value guarantees,
- adjustment to the rates and indices according to which the rents are calculated when rent adjustments occur.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

Taxes on income

Current tax

The tax currently payable is based on taxable profit for the year. The current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither

the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Our current and deferred tax are recognised in statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Provisions and Contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Foreign Currency Transaction and Translation

The functional currency of the Company is Indian Rupee (₹).

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated.

Exchange differences on monetary items are recognised in statement of profit and loss in the period in which they arise except for exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;

Our expenses increased by 31.79% to ₹5,931.54 million in Fiscal 2019 from ₹4,500.80 million in Fiscal 2018. This increase was primarily due to increases in (i) cost of food and beverages consumed, (ii) employee benefits expenses, and (iii) other operating expenses. Our total expenses in Fiscal 2019 were also adversely affected by the annualised impact of GST on our restaurants and the unavailability of a GST input credit compared with Fiscal 2018, which was a transitional year for the application of GST.

Cost of food and beverages consumed

Our cost of food and beverages consumed increased by 25.16% to ₹2,476.25 million in Fiscal 2019 from ₹1,978.41 million in Fiscal 2018. This increase was primarily due to (i) an increase in our sales of food and beverages by 26.54% to ₹7,358.90 million in Fiscal 2019 from ₹5,815.67 million in Fiscal 2018 and (ii) price inflation on cost of food and beverages during the year. The increase in the cost of food and beverages consumed was driven by the addition of 24 new Barbeque Nation Restaurants and 3 new International Barbeque Nation Restaurants in Fiscal 2019, costs associated with full year revenues in respect of our restaurants opened in Fiscal 2018 as well as to some extent due to same store sales growth driven by an increase in price and footfall during the year.

Employee benefits expenses

Our employee benefits expenses increased by 33.65% to ₹1,679.80 million in Fiscal 2019 from ₹1,256.88 million in Fiscal 2018. This increase was primarily due to an increase in the number of employees for new Barbeque Nation

Restaurants and an increase in salary and wages by 27.95% to ₹1,189.19 million in Fiscal 2019 from ₹929.39 million in Fiscal 2018.

Other operating expenses

Our other operating expenses increased by 40.30% to ₹1,775.49 million in Fiscal 2019 from ₹1,265.51 million in Fiscal 2018. This increase was primarily due to increases in number of Barbeque Nation Restaurants, increases in consumption of stores & operating supplies by 69.27% to ₹138.50 million in Fiscal 2019 from ₹81.82 million in Fiscal 2018, increases in power and fuel expenses by 31.44% to ₹584.99 million in Fiscal 2019 from ₹445.07 million in Fiscal 2018, rent including lease rentals by 227.91% to ₹146.87 million in Fiscal 2019 from ₹44.79 million in Fiscal 2018, Housekeeping services by 20.24% to ₹180.42 million in Fiscal 2019 from ₹150.05 million in Fiscal 2018, Business promotion by 75.53% to ₹174.37 million in Fiscal 2019 from ₹99.34 million in Fiscal 2018 and other miscellaneous expenses by 69.61% to ₹86.89 million in Fiscal 2019 from ₹51.23 million in Fiscal 2018.

EBITDA

Finance costs

Our finance costs increased by 5.29% to ₹564.01 million in Fiscal 2019 from ₹535.66 million in Fiscal 2018. This increase was primarily due to increase in interest on lease liabilities by 12.43% to ₹394.32 million in Fiscal 2019 from ₹350.73 million in Fiscal 2018.

Depreciation and amortisation expenses

Our depreciation and amortisation expenses increased by 27.42% to ₹895.36 million in Fiscal 2019 from ₹702.70 million in Fiscal 2018. This increase was primarily due to an increase in our fixed assets and right-of-use asset as a result of opening of new Barbeque Nation Restaurants and globally in Fiscal 2019.

Exceptional items

We recorded exceptional item loss of ₹102.72 million in Fiscal 2019. This loss was because of forfeiture of lease deposits and additional payments to lessors of ₹103.43 million, primarily in our international business and net losses incurred on disposal of certain property, plant and equipment in our India business of ₹3.07 million and partially adjusted by gains on early termination of lease contracts of ₹3.78 million.

Tax expense

Our net tax expense from continuing operations increased by 16.12% to ₹143.80 million in Fiscal 2019 from ₹123.84 million in Fiscal 2018. This increase was primarily due to increase in our current tax, partially offset by an increase in our deferred tax benefits.

Loss from discontinued operations

Our net loss from discontinued operations of PGPL increased by 36.61% to ₹171.84 million in Fiscal 2019 from a loss of ₹125.79 million in Fiscal 2018.

This was primarily due to loss from discontinued operations of ₹226.70 million including loss on disposal of ₹89.68 million, partially offset by tax benefit from discontinued operations of ₹54.86 million.

Net profit/ loss for the year

Due to the factors discussed above, our net loss for the year increased to ₹383.86 million in Fiscal 2019 from a loss of ₹58.00 million in Fiscal 2018.

Liquidity and Capital Resources

Our primary sources of liquidity have historically been cash generated from operations and borrowings from banks and other financial institution. Our cost of food and beverages consumed increased by 16.34% to ₹2,752.97 million in Fiscal 2020 from ₹2,366.30 million in Fiscal 2019. This increase was primarily due to (i) an increase in our sales of food and beverages and (ii) price inflation on cost of food and beverages during the year. The increase in the cost of food and beverages consumed was driven by the addition of 21 new Barbeque Nation Restaurants in Fiscal 2020, costs associated with full year revenues in respect of our restaurants opened in Fiscal 2019 as well as to some extent due to same store sales growth driven by an increase in price and footfall during the year.

Finance costs

Our finance costs increased by 33.56% to ₹631.61 million in Fiscal 2020 from ₹472.91 million in Fiscal 2019. Revenue from operations

Our revenue from operations increased by 23.16% to ₹7,034.55 million in Fiscal 2019 from ₹5,711.66 million in Fiscal 2018. This increase was primarily due to increase in sale of food and beverages by 23.74% to ₹6,995.03 million from ₹5,652.92 million. The increase in our sales of food and beverages were driven by addition of 24 new Barbeque Nation Restaurants in Fiscal 2019, full year revenues in respect of our restaurants opened in Fiscal 2018 as well as to some extent due to same store sales growth driven by an increase in price and footfall during the year.

Other income

Our other income decreased by 18.76% to ₹41.74 million in Fiscal 2019 from ₹51.38 million in Fiscal 2018. This decrease was primarily due to withdrawal of the “Phantom Option Scheme 2015” and the consequent write back of the carrying amount of such liability in Fiscal 2018.

Expenses

Our expenses increased by 25.56% to ₹5,423.00 million in Fiscal 2019 from ₹4,319.11 million in Fiscal 2018. This increase was primarily due to increases in (i) cost of food and beverages consumed, (ii) employee benefits expenses, and (iii) other operating expenses. Our total expenses in Fiscal 2019 were also adversely affected by the annualised impact of GST on our restaurants and the unavailability of a GST credit compared with Fiscal 2018, which was a transitional year for the application of GST.

EBITDA

As a result of foregoing, our EBITDA increased by 14.50% to ₹1,653.29 million in Fiscal 2019 from ₹1,443.93 million in Fiscal 2018.

Finance costs

Our finance costs decreased by 3.85% to ₹472.91 million in Fiscal 2019 from ₹491.85 million in Fiscal 2018. Tax expense

Our net tax expense decreased by 28.18% to ₹88.94 million in Fiscal 2019 from ₹123.84 million in Fiscal 2018. This decrease was primarily due to decrease in our current tax and an increase in our deferred tax benefits.

Disciplinary action including penalty imposed by SEBI or stock exchanges against SHL in the last five financial years including outstanding action

1. Orders dated December 10, 2015 and May 17, 2016 and show cause notice dated May 17, 2017 issued by SEBI in respect of SHL

An order bearing reference WTM/PS/101/CFD/DEC/2015 dated December 10, 2015, was issued by SEBI in respect of SHL in the matter of non-compliance with the requirements of minimum public shareholding norms by listed companies. During February 2013, one of the promoters of SHL, Raof Dhanani (who is also

a Promoter and a Director of our Company) had acquired 27.16% shareholding of SHL from Clearwater Capital Partners Cyprus Limited. The said acquisition triggered an open offer under the Takeover Regulations. Accordingly, the open offer was undertaken and it was completed on September 11, 2013. However, pursuant to the said open offer, the total promoters' shareholding in SHL increased to 79.90%, thereby breaching the requirement of maintaining minimum public shareholding of 25% under rule 19A of the SCRR. Such fall in public shareholding occurred on October 3, 2013. Thereafter, SHL failed to increase its public shareholding to 25% within the prescribed period of 12 months from the date of fall in minimum public shareholding, under rule 19A(2) of the SCRR. Accordingly, SEBI passed the aforesaid order, (a) directing freezing of voting rights and corporate benefits like dividend, rights, bonus shares and split with respect to the excess of proportionate promoter/ promoter group shareholding; (b) prohibiting the promoters/ promoter group members of SHL and directors of SHL from directly/ indirectly dealing in securities of SHL, except for complying with minimum public shareholding requirements; and (c) prohibiting the promoter/ promoter group shareholders of SHL and the directors of SHL from holding any new position as a director in any listed company, till such time that SHL met the minimum public shareholding requirements.

The aforesaid order issued by SEBI was subsequently vacated by SEBI order bearing reference WTM/PS/38/CFD/MAY/2016 dated May 17, 2016, whereby SEBI noted that the promoters had divested (a) 3.61% shareholding of SHL through an offer for sale on February 12, 2016; and (b) 1.37% shareholding of SHL through offers for sale on March 2, 2016 and March 3, 2016, thereby reducing promoter shareholding in SHL to 74.93%, and bringing SHL in compliance with the minimum public shareholding limits prescribed under the SCRR. However, in light of the delayed compliance with the minimum public shareholding requirements, SEBI referred the matter for adjudication, and stated that an adjudicating officer shall be appointed by SEBI to conduct an inquiry as per law. SEBI issued a show cause notice bearing reference EAD/NP/AS/OW/11093/1/2017 dated May 17, 2017 directing SHL to show cause within 15 days from the date of receipt of the show cause notice as to why an enquiry should not be held against SHL under section 23E of the SCRA for its failure to comply with listing conditions. SHL replied to the show cause notice on June 21, 2017. Subsequently, SEBI issued an adjudication order no. EAD/SR/SM/AO/01/2017-18 dated September 29, 2017 against SHL, imposing a penalty of ₹1.20 million on SHL. SHL paid the penalty on November 9, 2017.

SEBI directed SHL to reply to the show cause notice within 14 days from the date of receipt of the show cause notice, failing which the matter would be proceeded with on the basis of the evidence on record. SHL replied to the show cause notice on April 29, 2017, stating that while SHL was in compliance with the reporting requirements, it was unable to trace the copies of intimations made to the stock exchanges. Subsequently, SEBI issued an adjudication order no. RA/DPS/287/2018 dated January 31, 2018, directing SHL to pay a penalty of ₹1.50 million, within 45 days of receipt of the said adjudication order. Phased implementation of UPI for Bids by Retail Individual Bidders

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circular, the UPI Mechanism is being introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Bidders through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

- (a) **Phase I:** This phase was applicable from January 1, 2019 till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid cum Application Form with any of the Designated Intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- (b) **Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, SEBI vide circular no circular SEBI/HO/CFD/DIL2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of Phase II until March 31, 2020. Under this phase, submission of the Bid cum Application Form by a RII through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- (c) **Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Bid/Offer Opening Date. If the Offer is made under UPI Phase III of the UPI Circular, the same will be advertised in all editions of the English national newspaper Financial Express, all editions of the Hindi national newspaper Jansatta and the Bengaluru edition of the Kannada newspaper Hosadigantha (Kannada being the regional language of Karnataka where our Registered and Corporate Office is located) on or prior to the Bid/Offer Opening Date and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their respective websites.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders using the UPI Mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the RBI and the relevant ministry or ministries of the Government of India.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”), issued the Consolidated FDI Policy Circular of 2020 by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020 (“**FDI Policy**”) which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DPIIT that were in force and effect as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular.

Subject to certain conditions, the transfer of shares by way of sale between an Indian resident and a non-resident does not require the prior approval of the RBI or the relevant ministry or ministries of the Government of India, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and the transfer does not attract the provisions of the Takeover Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI and the RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Offer Period.
